A stylized world map serves as the background for the title. The map is oriented with North at the top, showing continents in green and oceans in blue. A thick red arc curves across the top of the map, passing behind the 'CIA' text. The title 'THE WORLD FACTBOOK' is centered over the map. 'CIA' is in large red letters with a white outline, while 'THE' and 'WORLD' are in white serif font. 'FACTBOOK' is also in white serif font, positioned below 'WORLD'.

INTRODUCTION

The *World Factbook* is prepared by the Central Intelligence Agency for the use of US Government officials, and the style, format, coverage, and content are designed to meet their specific requirements. Information is provided by Antarctic Information Program (National Science Foundation), Armed Forces Medical Intelligence Center (Department of Defense), Bureau of the Census (Department of Commerce), Bureau of Labor Statistics (Department of Labor), Central Intelligence Agency, Council of Managers of National Antarctic Programs, Defense Intelligence Agency (Department of Defense), Department of Energy, Department of State, Fish and Wildlife Service (Department of the Interior), Maritime Administration (Department of Transportation), National Geospatial-Intelligence Agency (Department of Defense), Naval Facilities Engineering Command (Department of Defense), Office of Insular Affairs (Department of the Interior), Office of Naval Intelligence (Department of Defense), US Board on Geographic Names (Department of the Interior), US Transportation Command (Department of Defense), Oil & Gas Journal, and other public and private sources.

The *Factbook* is in the public domain. Accordingly, it may be copied freely without permission of the Central Intelligence Agency (CIA). The official seal of the CIA, however, may NOT be copied without permission as required by the CIA Act of 1949 (50 U.S.C. section 403m). Misuse of the official seal of the CIA could result in civil and criminal penalties.

*The Intelligence Cycle is the process by which information is acquired, converted into intelligence, and made available to policymakers. **Information** is raw data from any source, data that may be fragmentary, contradictory, unreliable, ambiguous, deceptive, or wrong. **Intelligence** is information that has been collected, integrated, evaluated, analyzed, and interpreted. **Finished intelligence** is the final product of the Intelligence Cycle ready to be delivered to the policymaker.*

The three types of finished intelligence are: basic, current, and estimative. Basic intelligence provides the fundamental and factual reference material on a country or issue. Current intelligence reports on new developments. Estimative intelligence judges probable outcomes. The three are mutually supportive: basic intelligence is the foundation on which the other two are constructed; current intelligence continually updates the inventory of knowledge; and estimative intelligence revises overall interpretations of country and issue prospects for guidance of basic and current intelligence. *The World Factbook*, *The President's Daily Brief*, and the *National Intelligence Estimates* are examples of the three types of finished intelligence.

The United States has carried on foreign intelligence activities since the days of George Washington but only since World War II have they been coordinated on a government-wide basis. Three programs have highlighted the development of coordinated basic intelligence since that time: (1) *the Joint Army Navy Intelligence Studies (JANIS)*, (2) *the National Intelligence Survey (NIS)*, and (3) *The World Factbook*.

During World War II, intelligence consumers realized that the production of basic intelligence by different components of the US Government resulted in a great duplication of effort and conflicting information. The Japanese attack on Pearl Harbor in 1941 brought home to leaders in Congress and the executive branch the need for integrating departmental reports to national policymakers. Detailed and coordinated information was needed not only on such major powers as Germany and Japan, but also on places of little previous interest. In the Pacific Theater, for example, the Navy and Marines had to launch amphibious operations against many islands about which information was unconfirmed or nonexistent. Intelligence authorities resolved that the United States should never again be caught unprepared.

In 1943, Gen. George B. Strong (G-2), Adm. H. C. Train (Office of Naval Intelligence—ONI), and

Gen. William J. Donovan (Director of the Office of Strategic Services—OSS) decided that a joint effort should be initiated. A steering committee was appointed on 27 April 1943 that recommended the formation of a Joint Intelligence Study Publishing Board to assemble, edit, coordinate, and publish the *Joint Army Navy Intelligence Studies (JANIS)*. JANIS was the first interdepartmental basic intelligence program to fulfill the needs of the US Government for an authoritative and coordinated appraisal of strategic basic intelligence. Between April 1943 and July 1947, the board published 34 JANIS studies. JANIS performed well in the war effort, and numerous letters of commendation were received, including a statement from Adm. Forrest Sherman, Chief of Staff, Pacific Ocean Areas, which said, "JANIS has become the indispensable reference work for the shore-based planners."

The need for more comprehensive basic intelligence in the postwar world was well expressed in 1946 by George S. Pettee, a noted author on national security. He wrote in *The Future of American Secret Intelligence* (Infantry Journal Press, 1946, page 46) that world leadership in peace requires even more elaborate intelligence than in war. "The conduct of peace involves all countries, all human activities—not just the enemy and his war production."

The Central Intelligence Agency was established on 26 July 1947 and officially began operating on 18 September 1947. Effective 1 October 1947, the Director of Central Intelligence assumed operational responsibility for JANIS. On 13 January 1948, the National Security Council issued Intelligence Directive (NSCID) No. 3, which authorized the *National Intelligence Survey (NIS)* program as a peacetime replacement for the wartime JANIS program. Before adequate NIS country sections could be produced, government agencies had to develop more comprehensive gazetteers and better maps. The US Board on Geographic Names (BGN) compiled the names; the Department of the Interior produced the gazetteers; and CIA produced the maps.

The Hoover Commission's Clark Committee, set up in 1954 to study the structure and administration of the CIA, reported to Congress in 1955 that: "The National Intelligence Survey is an invaluable publication which provides the essential elements of basic intelligence on all areas of the world. There will always be a continuing requirement for keeping the Survey up-

to-date." The *Factbook* was created as an annual summary and update to the encyclopedic NIS studies. The first classified *Factbook* was published in August 1962, and the first unclassified version was published in June 1971. The NIS program was terminated in 1973 except for the *Factbook*, map, and gazetteer components. The 1975 *Factbook* was the first to be made available to the

public with sales through the US Government Printing Office (GPO). The *Factbook* was first made available on the Internet in June 1997. The year 2007 marks the 60th anniversary of the establishment of the Central Intelligence Agency and the 64th year of continuous basic intelligence support to the US Government by *The World Factbook* and its two predecessor programs.

NOTES AND DEFINITIONS

Abbreviations This information is included in **Appendix A: Abbreviations**, which includes all abbreviations and acronyms used in the Factbook, with their expansions.

Acronyms An acronym is an abbreviation coined from the initial letter of each successive word in a term or phrase. In general, an acronym made up solely from the first letter of the major words in the expanded form is rendered in all capital letters (NATO from North Atlantic Treaty Organization; an exception would be ASEAN for Association of Southeast Asian Nations). In general, an acronym made up of more than the first letter of the major words in the expanded form is rendered with only an initial capital letter (Comsat from Communications Satellite Corporation; an exception would be NAM from Nonaligned Movement). Hybrid forms are sometimes used to distinguish between initially identical terms (ICC for International Chamber of Commerce and ICCt for International Criminal Court).

Administrative divisions This entry generally gives the numbers, designatory terms, and first-order administrative divisions as approved by the US Board on Geographic Names (BGN). Changes that have been reported but not yet acted on by the BGN are noted.

Age structure This entry provides the distribution of the population according to age. Information is included by sex and age group (0–14 years, 15–64 years, 65 years and over). The age structure of a population affects a nation's key socioeconomic issues. Countries with young populations (high percentage under age 15) need to invest more in schools, while countries with older populations (high percentage ages 65 and over) need to invest more in the health sector. The age structure can also be used to help predict potential political issues. For example, the rapid growth of a young adult population unable to find employment can lead to unrest.

Agriculture—products This entry is an ordered listing of major crops and products starting with the most important.

Airports This entry gives the total number of airports or airfields recognizable from the air. The runway(s) may be paved (concrete or asphalt surfaces) or unpaved (grass, earth, sand, or gravel surfaces) but may include closed or abandoned installations. Airports or airfields that are no longer recognizable (overgrown, no facilities, etc.) are not included. Note that not all airports have accommodations for refueling, maintenance, or air traffic control.

Airports—with paved runways This entry gives the total number of airports with paved runways (concrete or asphalt surfaces) by length. For airports with more than one runway, only the longest runway is included according to the following five groups—(1) over 3,047 m, (2) 2,438 to 3,047 m, (3) 1,524 to 2,437 m, (4) 914

to 1,523 m, and (5) under 914 m. Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control.

Airports—with unpaved runways This entry gives the total number of airports with unpaved runways (grass, dirt, sand, or gravel surfaces) by length. For airports with more than one runway, only the longest runway is included according to the following five groups—(1) over 3,047 m, (2) 2,438 to 3,047 m, (3) 1,524 to 2,437 m, (4) 914 to 1,523 m, and (5) under 914 m. Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control.

Appendixes This section includes Factbook-related material by topic.

Area This entry includes three subfields. Total area is the sum of all land and water areas delimited by international boundaries and/or coastlines. Land area is the aggregate of all surfaces delimited by international boundaries and/or coastlines, excluding inland water bodies (lakes, reservoirs, rivers). Water area is the sum of the surfaces of all inland water bodies, such as lakes, reservoirs, or rivers, as delimited by international boundaries and/or coastlines.

Area—comparative This entry provides an area comparison based on total area equivalents. Most entities are compared with the entire US or one of the 50 states based on area measurements (1990 revised) provided by the US Bureau of the Census. The smaller entities are compared with Washington, DC (178 sq km, 69 sq mi) or The Mall in Washington, DC (0.59 sq km, 0.23 sq mi, 146 acres).

Background This entry usually highlights major historic events and current issues and may include a statement about one or two key future trends.

Birth rate This entry gives the average annual number of births during a year per 1,000 persons in the population at midyear; also known as crude birth rate. The birth rate is usually the dominant factor in determining the rate of population growth. It depends on both the level of fertility and the age structure of the population.

Budget This entry includes revenues, expenditures, and capital expenditures. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Capital This entry gives the name of the seat of government, its geographic coordinates, the time difference relative to Coordinated Universal Time (UTC) and the time observed in Washington, DC, and, if applicable, information on daylight saving time (DST). Where appropriate, a special note has been added to highlight those countries that have multiple time zones.

Climate This entry includes a brief description of typical weather regimes throughout the year.

Coastline This entry gives the total length of the boundary between the land area (including islands) and the sea.

Communications This category deals with the means of exchanging information and includes the telephone, radio, television, and Internet host entries.

Communications—note This entry includes miscellaneous communications information of significance not included elsewhere.

Constitution This entry includes the dates of adoption, revisions, and major amendments.

Coordinated Universal Time (UTC) UTC is the international atomic time scale that serves as the basis of timekeeping for most of the world. The hours, minutes, and seconds expressed by UTC represent the time of day at the Prime Meridian (0° longitude) located near Greenwich, England as reckoned from midnight. UTC is calculated by the Bureau International des Poids et Mesures (BIPM) in Sevres, France. The BIPM averages data collected from more than 200 atomic time and frequency standards located at about 50 laboratories worldwide. UTC is the basis for all civil time with the Earth divided into time zones expressed as positive or negative differences from UTC. UTC is also referred to as “Zulu time.” See the Standard Time Zones of the World map included with the Reference Maps.

Country data codes see **Data codes**.

Country map Most versions of the Factbook provide a country map in color. The maps were produced from the best information available at the time of preparation. Names and/or boundaries may have changed subsequently.

Country name This entry includes all forms of the country’s name approved by the US Board on Geographic Names (Italy is used as an example): conventional long form (Italian Republic), conventional short form (Italy), local long form (Repubblica Italiana), local short form (Italia), former (Kingdom of Italy), as well as the abbreviation. Also see the **Terminology** note.

Crude oil See entry for oil.

Currency (code) This entry identifies the national medium of exchange and, in parenthesis, gives the International Organization for Standardization (ISO) 4217 alphabetic currency code for each country.

Current account balance This entry records a country’s net trade in goods and services, plus net earnings from rents, interest, profits, and dividends, and net transfer payments (such as pension funds and worker remittances) to and from the rest of the world during the period specified. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Data codes This information is presented in **Appendix D: Cross-Reference List of Country Data Codes** and **Appendix E: Cross-Reference List of Hydrographic Data Codes**.

Date of information In general, information available as of 1 January 2007 was used in the preparation of this edition.

Daylight Saving Time (DST) This entry is included for those entities that have adopted a policy of adjusting the official local time forward, usually one hour, from Standard Time during summer months. Such policies are most common in mid-latitude regions.

Death rate This entry gives the average annual number of deaths during a year per 1,000 population at midyear; also known as crude death rate. The death rate, while only a rough indicator of the mortality situation in a country, accurately indicates the current mortality impact on population growth. This indicator is significantly affected by age distribution, and most countries will eventually show a rise in the overall death rate, in spite of continued decline in mortality at all ages, as declining fertility results in an aging population.

Debt—external This entry gives the total public and private debt owed to nonresidents repayable in foreign currency, goods, or services. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Dependency status This entry describes the formal relationship between a particular nonindependent entity and an independent state.

Dependent areas This entry contains an alphabetical listing of all nonindependent entities associated in some way with a particular independent state.

Diplomatic representation The US Government has diplomatic relations with 188 independent states, including 187 of the 192 UN members (excluded UN members are Bhutan, Cuba, Iran, North Korea, and the US itself). In addition, the US has diplomatic relations with 1 independent state that is not in the UN, the Holy See, as well as with the EU.

Diplomatic representation from the US This entry includes the chief of mission, embassy address, mailing address, telephone number, FAX number, branch office locations, consulate general locations, and consulate locations.

Diplomatic representation in the US This entry includes the chief of mission, chancery, telephone, FAX, consulate general locations, and consulate locations.

Disputes—international This entry includes a wide variety of situations that range from traditional bilateral boundary disputes to unilateral claims of one sort or another. Information regarding disputes over international terrestrial and maritime boundaries has been reviewed by the US Department of State. References to other situations involving borders or frontiers may also be included, such as resource disputes, geopolitical questions, or irredentist issues; however, inclusion does not necessarily constitute official acceptance or recognition by the US Government.

Distribution of family income—Gini index This index measures the degree of inequality in the distribution of family income in a country. The index is calculated from the Lorenz curve, in which cumulative family income is plotted against the number of families arranged from the poorest to the richest. The index is the ratio of (a) the area between a country’s Lorenz

curve and the 45 degree helping line to (b) the entire triangular area under the 45 degree line. The more nearly equal a country's income distribution, the closer its Lorenz curve to the 45 degree line and the lower its Gini index, e.g., a Scandinavian country with an index of 25. The more unequal a country's income distribution, the farther its Lorenz curve from the 45 degree line and the higher its Gini index, e.g., a Sub-Saharan country with an index of 50. If income were distributed with perfect equality, the Lorenz curve would coincide with the 45 degree line and the index would be zero; if income were distributed with perfect inequality, the Lorenz curve would coincide with the horizontal axis and the right vertical axis and the index would be 100.

Economic aid—donor This entry refers to net official development assistance (ODA) from Organization for Economic Cooperation and Development (OECD) nations to developing countries and multilateral organizations. ODA is defined as financial assistance that is concessional in character, has the main objective to promote economic development and welfare of the less developed countries (LDCs), and contains a grant element of at least 25%. The entry does not cover other official flows (OOF) or private flows. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Economic aid—recipient This entry, which is subject to major problems of definition and statistical coverage, refers to the net inflow of Official Development Finance (ODF) to recipient countries. The figure includes assistance from the World Bank, the IMF, and other international organizations and from individual nation donors. Formal commitments of aid are included in the data. Omitted from the data are grants by private organizations. Aid comes in various forms including outright grants and loans. The entry thus is the difference between new inflows and repayments. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Economy This category includes the entries dealing with the size, development, and management of productive resources, i.e., land, labor, and capital.

Economy—overview This entry briefly describes the type of economy, including the degree of market orientation, the level of economic development, the most important natural resources, and the unique areas of specialization. It also characterizes major economic events and policy changes in the most recent 12 months and may include a statement about one or two key future macroeconomic trends.

Electricity—consumption This entry consists of total electricity generated annually plus imports and minus exports, expressed in kilowatt-hours. The discrepancy between the amount of electricity generated and/or imported and the amount consumed and/or exported is accounted for as loss in transmission and distribution.

Electricity—exports This entry is the total exported electricity in kilowatt-hours.

Electricity—imports This entry is the total imported electricity in kilowatt-hours.

Electricity—production This entry is the annual electricity generated expressed in kilowatt-hours. The discrepancy between the amount of electricity generated and/or imported and the amount consumed and/or exported is accounted for as loss in transmission and distribution.

Elevation extremes This entry includes both the highest point and the lowest point.

Entities Some of the independent states, dependencies, areas of special sovereignty, and governments included in this publication are not independent, and others are not officially recognized by the US Government. "Independent state" refers to a people politically organized into a sovereign state with a definite territory. "Dependencies" and "areas of special sovereignty" refer to a broad category of political entities that are associated in some way with an independent state. "Country" names used in the table of contents or for page headings are usually the short-form names as approved by the US Board on Geographic Names and may include independent states, dependencies, and areas of special sovereignty, or other geographic entities. There are a total of 268 separate geographic entities in *The World Factbook* that may be categorized as follows:

INDEPENDENT STATES

193 Afghanistan, Albania, Algeria, Andorra, Angola, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, The Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Canada, Cape Verde, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, East Timor, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Holy See, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kiribati, North Korea, South Korea, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Federated States of Micronesia, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, Netherlands, NZ, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Samoa, San Marino, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, Seychelles, Sierra Leone,

Environment—current issues This entry lists the most pressing and important environmental problems. The following terms and abbreviations are used throughout the entry:

Acidification—the lowering of soil and water pH due to acid precipitation and deposition usually through precipitation; this process disrupts ecosystem nutrient flows and may kill freshwater fish and plants dependent on more neutral or alkaline conditions (see acid rain).

Acid rain—characterized as containing harmful levels of sulfur dioxide or nitrogen oxide; acid rain is damaging and potentially deadly to the earth's fragile ecosystems; acidity is measured using the pH scale where 7 is neutral, values greater than 7 are considered alkaline, and values below 5.6 are considered acid precipitation; note—a pH of 2.4 (the acidity of vinegar) has been measured in rainfall in New England.

Aerosol—a collection of airborne particles dispersed in a gas, smoke, or fog.

Afforestation—converting a bare or agricultural space by planting trees and plants; reforestation involves replanting trees on areas that have been cut or destroyed by fire.

Asbestos—a naturally occurring soft fibrous mineral commonly used in fireproofing materials and considered to be highly carcinogenic in particulate form.

Biodiversity—also biological diversity; the relative number of species, diverse in form and function, at the genetic, organism, community, and ecosystem level; loss of biodiversity reduces an ecosystem's ability to recover from natural or man-induced disruption.

Bio-indicators—a plant or animal species whose presence, abundance, and health reveal the general condition of its habitat.

Biomass—the total weight or volume of living matter in a given area or volume.

Carbon cycle—the term used to describe the exchange of carbon (in various forms, e.g., as carbon dioxide) between the atmosphere, ocean, terrestrial biosphere, and geological deposits.

Catchments—assemblages used to capture and retain rainwater and runoff; an important water management technique in areas with limited freshwater resources, such as Gibraltar.

DDT (dichloro-diphenyl-trichloro-ethane)—a colorless, odorless insecticide that has toxic effects on most animals; the use of DDT was banned in the US in 1972.

Defoliants—chemicals which cause plants to lose their leaves artificially; often used in agricultural practices for weed control, and may have detrimental impacts on human and ecosystem health.

Deforestation—the destruction of vast areas of forest (e.g., unsustainable forestry practices, agricultural and range land clearing, and the over exploitation of wood products for use as fuel) without planting new growth.

Desertification—the spread of desert-like conditions in arid or semi-arid areas, due to overgrazing, loss of agriculturally productive soils, or climate change.

Dredging—the practice of deepening an existing waterway; also, a technique used for collecting bottom-dwelling marine organisms (e.g., shellfish) or harvesting coral, often causing significant destruction of reef and ocean-floor ecosystems.

Drift-net fishing—done with a net, miles in extent, that is generally anchored to a boat and left to float with the tide; often results in an over harvesting and waste of large populations of non-commercial marine

species (by-catch) by its effect of “sweeping the ocean clean.”

Ecosystems—ecological units comprised of complex communities of organisms and their specific environments.

Effluents—waste materials, such as smoke, sewage, or industrial waste which are released into the environment, subsequently polluting it.

Endangered species—a species that is threatened with extinction either by direct hunting or habitat destruction.

Freshwater—water with very low soluble mineral content; sources include lakes, streams, rivers, glaciers, and underground aquifers.

Greenhouse gas—a gas that “traps” infrared radiation in the lower atmosphere causing surface warming; water vapor, carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, and ozone are the primary greenhouse gases in the Earth’s atmosphere.

Groundwater—water sources found below the surface of the earth often in naturally occurring reservoirs in permeable rock strata; the source for wells and natural springs.

Highlands Water Project—a series of dams constructed jointly by Lesotho and South Africa to redirect Lesotho’s abundant water supply into a rapidly growing area in South Africa; while it is the largest infrastructure project in southern Africa, it is also the most costly and controversial; objections to the project include claims that it forces people from their homes, submerges farmlands, and squanders economic resources.

Inuit Circumpolar Conference (ICC)—represents the 145,000 Inuits of Russia, Alaska, Canada, and Greenland in international environmental issues; a General Assembly convenes every three years to determine the focus of the ICC; the most current concerns are long-range transport of pollutants, sustainable development, and climate change.

Metallurgical plants—industries which specialize in the science, technology, and processing of metals; these plants produce highly concentrated and toxic wastes which can contribute to pollution of ground water and air when not properly disposed.

Noxious substances—injurious, very harmful to living beings.

Overgrazing—the grazing of animals on plant material faster than it can naturally regrow leading to the permanent loss of plant cover, a common effect of too many animals grazing limited range land.

Ozone shield—a layer of the atmosphere composed of ozone gas (O₃) that resides approximately 25 miles above the Earth’s surface and absorbs solar ultraviolet radiation that can be harmful to living organisms.

Poaching—the illegal killing of animals or fish, a great concern with respect to endangered or threatened species.

Pollution—the contamination of a healthy environment by man-made waste.

Potable water—water that is drinkable, safe to be consumed.

Salination—the process through which fresh (drinkable) water becomes salt (undrinkable) water; hence, desalination is the reverse process; also involves the accumulation of salts in topsoil caused by evaporation of excessive irrigation water, a process that can eventually render soil incapable of supporting crops.

Siltation—occurs when water channels and reservoirs become clotted with silt and mud, a side effect of deforestation and soil erosion.

Slash-and-burn agriculture—a rotating cultivation technique in which trees are cut down and burned in order to clear land for temporary agriculture; the land is used until its productivity declines at which point a new plot is selected and the process repeats; this practice is sustainable while population levels are low and time is permitted for regrowth of natural vegetation; conversely, where these conditions do not exist, the practice can have disastrous consequences for the environment.

Soil degradation—damage to the land’s productive capacity because of poor agricultural practices such as the excessive use of pesticides or fertilizers, soil compaction from heavy equipment, or erosion of topsoil, eventually resulting in reduced ability to produce agricultural products.

Soil erosion—the removal of soil by the action of water or wind, compounded by poor agricultural practices, deforestation, overgrazing, and desertification.

Ultraviolet (UV) radiation—a portion of the electromagnetic energy emitted by the sun and naturally filtered in the upper atmosphere by the ozone layer; UV radiation can be harmful to living organisms and has been linked to increasing rates of skin cancer in humans.

Water-borne diseases—those in which bacteria survive in, and are transmitted through, water; always a serious threat in areas with an untreated water supply.

Environment—international agreements This entry separates country participation in international environmental agreements into two levels—party to and signed, but not ratified. Agreements are listed in alphabetical order by the abbreviated form of the full name.

Environmental agreements This information is presented in **Appendix C: Selected International Environmental Agreements**, which includes the name, abbreviation, date opened for signature, date entered into force, objective, and parties by category.

Ethnic groups This entry provides an ordered listing of ethnic groups starting with the largest and normally includes the percent of total population.

Exchange rates This entry provides the official value of a country’s monetary unit at a given date or over a given period of time, as expressed in units of local currency per US dollar and as determined by international market forces or official fiat.

Executive branch This entry includes several subfields. Chief of state includes the name and title of the titular leader of the country who represents the state at official and ceremonial functions but may not be involved with the day-to-day activities of the government. Head of

government includes the name and title of the top administrative leader who is designated to manage the day-to-day activities of the government. For example, in the UK, the monarch is the chief of state, and the prime minister is the head of government. In the US, the president is both the chief of state and the head of government. Cabinet includes the official name for this body of high-ranking advisers and the method for selection of members. Elections includes the nature of election process or accession to power, date of the last election, and date of the next election. Election results includes the percent of vote for each candidate in the last election.

Exports This entry provides the total US dollar amount of merchandise exports on an f.o.b. (free on board) basis. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Exports—commodities This entry provides a rank ordering of exported products starting with the most important; it sometimes includes the percent of total dollar value.

Exports—partners This entry provides a rank ordering of trading partners starting with the most important; it sometimes includes the percent of total dollar value.

Fiscal year This entry identifies the beginning and ending months for a country's accounting period of 12 months, which often is the calendar year but which may begin in any month. All yearly references are for the calendar year (CY) unless indicated as a noncalendar fiscal year (FY).

Flag description This entry provides a written flag description produced from actual flags or the best information available at the time the entry was written. The flags of independent states are used by their dependencies unless there is an officially recognized local flag. Some disputed and other areas do not have flags.

Flag graphic Most versions of the Factbook include a color flag at the beginning of the country profile. The flag graphics were produced from actual flags or the best information available at the time of preparation. The flags of independent states are used by their dependencies unless there is an officially recognized local flag. Some disputed and other areas do not have flags.

GDP (official exchange rate) This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at official exchange rates (OER) is the home-currency-denominated annual GDP figure divided by the bilateral average US exchange rate with that country in that year. The measure is simple to compute and gives a precise measure of the value of output. Many economists prefer this measure when gauging the economic power an economy maintains vis-à-vis its neighbors, judging that an exchange rate captures the purchasing power a nation enjoys in the international marketplace. Official exchange rates, however, can be artificially fixed and/or subject to manipulation—resulting in claims of the country having an under- or over-valued currency—and are not necessarily the equivalent of a market-determined exchange rate.

Moreover, even if the official exchange rate is market-determined, market exchange rates are frequently established by a relatively small set of goods and services (the ones the country trades) and may not capture the value of the larger set of goods the country produces. Furthermore, OER-converted GDP is not well suited to comparing domestic GDP over time, since appreciation/depreciation from one year to the next will make the OER GDP value rise/fall regardless of whether home-currency-denominated GDP changed.

GDP (purchasing power parity) This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at purchasing power parity (PPP) exchange rates is the sum value of all goods and services produced in the country valued at prices prevailing in the United States. This is the measure most economists prefer when looking at per-capita welfare and when comparing living conditions or use of resources across countries. The measure is difficult to compute, as a US dollar value has to be assigned to all goods and services in the country regardless of whether these goods and services have a direct equivalent in the United States (for example, the value of an ox-cart or non-US military equipment); as a result, PPP estimates for some countries are based on a small and sometimes different set of goods and services. In addition, many countries do not formally participate in the World Bank's PPP project that calculates these measures, so the resulting GDP estimates for these countries may lack precision. For many developing countries, PPP-based GDP measures are multiples of the official exchange rate (OER) measure. The difference between the OER- and PPP-denominated GDP values for most of the wealthy industrialized countries are generally much smaller.

GDP—composition by sector This entry gives the percentage contribution of agriculture, industry, and services to total GDP. The distribution will total less than 100 percent if the data are incomplete.

GDP—per capita (PPP) This entry shows GDP on a purchasing power parity basis divided by population as of 1 July for the same year.

GDP—real growth rate This entry gives GDP growth on an annual basis adjusted for inflation and expressed as a percent.

GDP methodology In the **Economy** category, GDP dollar estimates for countries are reported both on an official exchange rate (OER) and a purchasing power parity (PPP) basis. Both measures contain information that is useful to the reader. The PPP method involves the use of standardized international dollar price weights, which are applied to the quantities of final goods and services produced in a given economy. The data derived from the PPP method probably provide the best available starting point for comparisons of economic strength and well-being between countries. In contrast, the currency exchange rate method involves a variety of international and domestic financial forces that may not capture the value of domestic output.

Furthermore, exchange rates may suddenly go up or down by 10% or more because of market forces or official fiat whereas real output has remained unchanged. On 12 January 1994, for example, the 14 countries of the African Financial Community (whose currencies are tied to the French franc) devalued their currencies by 50%. This move, of course, did not cut the real output of these countries by half. Whereas PPP estimates for OECD countries are quite reliable, PPP estimates for developing countries are often rough approximations. In developing countries with weak currencies, the exchange rate estimate of GDP in dollars is typically one-fourth to one-half the PPP estimate. Most of the GDP estimates for developing countries are based on extrapolation of PPP numbers published by the UN International Comparison Program (UNICP) and by Professors Robert Summers and Alan Heston of the University of Pennsylvania and their colleagues. GDP derived using the OER method should be used for the purpose of calculating the share of items such as exports, imports, military expenditures, external debt, or the current account balance, because the dollar values presented in the Factbook for these items have been converted at official exchange rates, not at PPP. One should use the OER GDP figure to calculate the proportion of, say, Chinese defense expenditures in GDP, because that share will be the same as one calculated in local currency units. Comparison of OER GDP with PPP GDP may also indicate whether a currency is over- or under-valued. If OER GDP is smaller than PPP GDP, the official exchange rate may be undervalued, and vice versa. However, there is no strong historical evidence that market exchange rates move in the direction implied by the PPP rate, at least not in the short- or medium-term. Note: the numbers for GDP and other economic data should not be chained together from successive volumes of the Factbook because of changes in the US dollar measuring rod, revisions of data by statistical agencies, use of new or different sources of information, and changes in national statistical methods and practices.

GNP Gross national product (GNP) is the value of all final goods and services produced within a nation in a given year, plus income earned by its citizens abroad, minus income earned by foreigners from domestic production. The Factbook, following current practice, uses GDP rather than GNP to measure national production. However, the user must realize that in certain countries net remittances from citizens working abroad may be important to national well-being.

GWP This entry gives the gross world product (GWP) or aggregate value of all final goods and services produced worldwide in a given year.

Geographic coordinates This entry includes rounded latitude and longitude figures for the purpose of finding the approximate geographic center of an entity and is based on the Gazetteer of Conventional Names, Third Edition, August 1988, US Board on Geographic Names and on other sources.

Geographic names This information is presented in **Appendix F: Cross-Reference List of Geographic Names**. It includes a listing of various alternate names, former names, local names, and regional names referenced to one or more related Factbook entries. Spellings are normally, but not always, those approved by the US Board on Geographic Names (BGN). Alternate names and additional information are included in parentheses.

Geography This category includes the entries dealing with the natural environment and the effects of human activity.

Geography—note This entry includes miscellaneous geographic information of significance not included elsewhere.

Gini index See entry for **Distribution of family income—Gini index**

Government This category includes the entries dealing with the system for the adoption and administration of public policy.

Government—note This entry includes miscellaneous government information of significance not included elsewhere.

Government type This entry gives the basic form of government. Definitions of the major governmental terms are as follows. (Note that for some countries more than one definition applies.):

Absolute monarchy—a form of government where the monarch rules unhindered, i.e., without any laws, constitution, or legally organized opposition.

Anarchy—a condition of lawlessness or political disorder brought about by the absence of governmental authority.

Authoritarian—a form of government in which state authority is imposed onto many aspects of citizens' lives.

Commonwealth—a nation, state, or other political entity founded on law and united by a compact of the people for the common good.

Communist—a system of government in which the state plans and controls the economy and a single—often authoritarian—party holds power; state controls are imposed with the elimination of private ownership of property or capital while claiming to make progress toward a higher social order in which all goods are equally shared by the people (i.e., a classless society).

Confederacy (Confederation)—a union by compact or treaty between states, provinces, or territories, that creates a central government with limited powers; the constituent entities retain supreme authority over all matters except those delegated to the central government.

Constitutional—a government by or operating under an authoritative document (constitution) that sets forth the system of fundamental laws and principles that determines the nature, functions, and limits of that government.

Constitutional democracy—a form of government in which the sovereign power of the people is spelled out in a governing constitution.

Constitutional monarchy—a system of government in which a monarch is guided by a constitution whereby his/her rights, duties, and responsibilities are spelled out in written law or by custom.

Democracy—a form of government in which the supreme power is retained by the people, but which is usually exercised indirectly through a system of representation and delegated authority periodically renewed.

Democratic republic—a state in which the supreme power rests in the body of citizens entitled to vote for officers and representatives responsible to them.

Dictatorship—a form of government in which a ruler or small clique wield absolute power (not restricted by a constitution or laws).

Ecclesiastical—a government administered by a church.

Emirate—similar to a monarchy or sultanate, but a government in which the supreme power is in the hands of an emir (the ruler of a Muslim state); the emir may be an absolute overlord or a sovereign with constitutionally limited authority.

Federal (Federation)—a form of government in which sovereign power is formally divided—usually by means of a constitution—between a central authority and a number of constituent regions (states, colonies, or provinces) so that each region retains some management of its internal affairs; differs from a confederacy in that the central government exerts influence directly upon both individuals as well as upon the regional units.

Federal republic—a state in which the powers of the central government are restricted and in which the component parts (states, colonies, or provinces) retain a degree of self-government; ultimate sovereign power rests with the voters who chose their governmental representatives.

Islamic republic—a particular form of government adopted by some Muslim states; although such a state is, in theory, a theocracy, it remains a republic, but its laws are required to be compatible with the laws of Islam.

Maoism—the theory and practice of Marxism-Leninism developed in China by Mao Zedong (Mao Tse-tung), which states that a continuous revolution is necessary if the leaders of a communist state are to keep in touch with the people.

Marxism—the political, economic, and social principles espoused by 19th century economist Karl Marx; he viewed the struggle of workers as a progression of historical forces that would proceed from a class struggle of the proletariat (workers) exploited by capitalists (business owners), to a socialist “dictatorship of the proletariat,” to, finally, a classless society—Communism.

Marxism-Leninism—an expanded form of communism developed by Lenin from doctrines of Karl Marx; Lenin saw imperialism as the final stage of capitalism and shifted the focus of workers’ struggle from developed to underdeveloped countries.

Monarchy—a government in which the supreme power is lodged in the hands of a monarch who reigns over a state or territory, usually for life and by hereditary right; the monarch may be either a sole absolute ruler or a sovereign—such as a king, queen, or prince—with constitutionally limited authority.

Oligarchy—a government in which control is exercised by a small group of individuals whose authority generally is based on wealth or power.

Parliamentary democracy—a political system in which the legislature (parliament) selects the government—a prime minister, premier, or chancellor along with the cabinet ministers—according to party strength as expressed in elections; by this system, the government acquires a dual responsibility: to the people as well as to the parliament.

Parliamentary government (Cabinet-Parliamentary government)—a government in which members of an executive branch (the cabinet and its leader—a prime minister, premier, or chancellor) are nominated to their positions by a legislature or parliament, and are directly responsible to it; this type of government can be dissolved at will by the parliament (legislature) by means of a no confidence vote or the leader of the cabinet may dissolve the parliament if it can no longer function.

Parliamentary monarchy—a state headed by a monarch who is not actively involved in policy formation or implementation (i.e., the exercise of sovereign powers by a monarch in a ceremonial capacity); true governmental leadership is carried out by a cabinet and its head—a prime minister, premier, or chancellor—who are drawn from a legislature (parliament).

Presidential—a system of government where the executive branch exists separately from a legislature (to which it is generally not accountable).

Republic—a representative democracy in which the people’s elected deputies (representatives), not the people themselves, vote on legislation.

Socialism—a government in which the means of planning, producing, and distributing goods is controlled by a central government that theoretically seeks a more just and equitable distribution of property and labor; in actuality, most socialist governments have ended up being no more than dictatorships over workers by a ruling elite.

Sultanate—similar to a monarchy, but a government in which the supreme power is in the hands of a sultan (the head of a Muslim state); the sultan may be an absolute ruler or a sovereign with constitutionally limited authority.

Theocracy—a form of government in which a Deity is recognized as the supreme civil ruler, but the Deity’s laws are interpreted by ecclesiastical authorities (bishops, mullahs, etc.); a government subject to religious authority.

Totalitarian—a government that seeks to subordinate the individual to the state by controlling not only all political and economic matters, but also the attitudes, values, and beliefs of its population.

Greenwich Mean Time (GMT) The mean solar time at the Greenwich Meridian, Greenwich, England, with the hours and days, since 1925, reckoned from midnight. GMT is now a historical term having been replaced by UTC on 1 January 1972. See Coordinated Universal Time.

Gross domestic product see **GDP**

Gross national product see **GNP**

Gross world product see **GWP**

HIV/AIDS—adult prevalence rate This entry gives an estimate of the percentage of adults (aged 15–49) living with HIV/AIDS. The adult prevalence rate is calculated by dividing the estimated number of adults living with HIV/AIDS at yearend by the total adult population at yearend.

HIV/AIDS—deaths This entry gives an estimate of the number of adults and children who died of AIDS during a given calendar year.

HIV/AIDS—people living with HIV/AIDS This entry gives an estimate of all people (adults and children) alive at yearend with HIV infection, whether or not they have developed symptoms of AIDS.

Heliports This entry gives the total number of heliports with hard-surface runways, helipads, or landing areas that support routine sustained helicopter operations exclusively and have support facilities including one or more of the following facilities: lighting, fuel, passenger handling, or maintenance. It includes former airports used exclusively for helicopter operations but excludes heliports limited to day operations and natural clearings that could support helicopter landings and takeoffs.

Household income or consumption by percentage share Data on household income or consumption come from household surveys, the results adjusted for household size. Nations use different standards and procedures in collecting and adjusting the data. Surveys based on income will normally show a more unequal distribution than surveys based on consumption. The quality of surveys is improving with time, yet caution is still necessary in making inter-country comparisons.

Hydrographic data codes see **Data codes**

Illicit drugs This entry gives information on the five categories of illicit drugs—narcotics, stimulants, depressants (sedatives), hallucinogens, and cannabis. These categories include many drugs legally produced and prescribed by doctors as well as those illegally produced and sold outside of medical channels.

Cannabis (*Cannabis sativa*) is the common hemp plant, which provides hallucinogens with some sedative properties, and includes marijuana (pot, Acapulco gold, grass, reefer), tetrahydrocannabinol (THC, Marinol), hashish (hash), and hashish oil (hash oil).

Coca (mostly *Erythroxylum coca*) is a bush with leaves that contain the stimulant used to make cocaine. Coca is not to be confused with cocoa, which comes from cacao seeds and is used in making chocolate, cocoa, and cocoa butter.

Cocaine is a stimulant derived from the leaves of the coca bush.

Depressants (*sedatives*) are drugs that reduce tension and anxiety and include chloral hydrate, barbiturates (Amytal, Nembutal, Seconal, phenobarbital), benzodiazepines (Librium, Valium), methaqualone (Quaalude), glutethimide (Doriden), and others (Equanil, Placidyl, Valmid).

Drugs are any chemical substances that effect a physical, mental, emotional, or behavioral change in an individual.

Drug abuse is the use of any licit or illicit chemical substance that results in physical, mental, emotional, or behavioral impairment in an individual.

Hallucinogens are drugs that affect sensation, thinking, self-awareness, and emotion. Hallucinogens include LSD (acid, microdot), mescaline and peyote (mexc, buttons, cactus), amphetamine variants (PMA, STP, DOB), phencyclidine (PCP, angel dust, hog), phencyclidine analogues (PCE, PCPy, TCP), and others (psilocybin, psilocyn).

Hashish is the resinous exudate of the cannabis or hemp plant (*Cannabis sativa*).

Heroin is a semisynthetic derivative of morphine.

Mandrax is a trade name for methaqualone, a pharmaceutical depressant.

Marijuana is the dried leaf of the cannabis or hemp plant (*Cannabis sativa*).

Methaqualone is a pharmaceutical depressant, referred to as mandrax in Southwest Asia and Africa.

Narcotics are drugs that relieve pain, often induce sleep, and refer to opium, opium derivatives, and synthetic substitutes. Natural narcotics include opium (paregoric, parepectolin), morphine (MS-Contin, Roxanol), codeine (Tylenol with codeine, Empirin with codeine, Robitussin AC), and thebaine. Semisynthetic narcotics include heroin (horse, smack), and hydromorphone (Dilaudid). Synthetic narcotics include meperidine or Pethidine (Demerol, Mepergan), methadone (Dolophine, Methadose), and others (Darvon, Lomotil).

Opium is the brown, gummy exudate of the incised, unripe seedpod of the opium poppy.

Opium poppy (*Papaver somniferum*) is the source for the natural and semisynthetic narcotics.

Poppy straw is the entire cut and dried opium poppy-plant material, other than the seeds. Opium is extracted from poppy straw in commercial operations that produce the drug for medical use.

Qat (*kat*, *khat*) is a stimulant from the buds or leaves of *Catha edulis* that is chewed or drunk as tea.

Quaaludes is the North American slang term for methaqualone, a pharmaceutical depressant.

Stimulants are drugs that relieve mild depression, increase energy and activity, and include cocaine (coke, snow, crack), amphetamines (Desoxyn, Dexedrine), ephedrine, ecstasy (clarity, essence, doctor, Adam), phenmetrazine (Preludin), methylphenidate (Ritalin), and others (Cylert, Sanorex, Tenuate).

Imports This entry provides the total US dollar amount of merchandise imports on a c.i.f. (cost, insurance, and freight) or f.o.b. (free on board) basis. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Imports—commodities This entry provides a rank ordering of imported products starting with the most important; it sometimes includes the percent of total dollar value.

Imports—partners This entry provides a rank ordering of trading partners starting with the most important; it sometimes includes the percent of total dollar value.

Independence For most countries, this entry gives the date that sovereignty was achieved and from which nation, empire, or trusteeship. For the other countries, the date given may not represent “independence” in the strict sense, but rather some significant nationhood event such as the traditional founding date or the date of unification, federation, confederation, establishment, fundamental change in the form of government, or state succession. Dependent areas include the notation “none” followed by the nature of their dependency status. Also see the **Terminology** note.

Industrial production growth rate This entry gives the annual percentage increase in industrial production (includes manufacturing, mining, and construction).

Industries This entry provides a rank ordering of industries starting with the largest by value of annual output.

Infant mortality rate This entry gives the number of deaths of infants under one year old in a given year per 1,000 live births in the same year; included is the total death rate, and deaths by sex, *male* and *female*. This rate is often used as an indicator of the level of health in a country.

Inflation rate (consumer prices) This entry furnishes the annual percent change in consumer prices compared with the previous year’s consumer prices.

International disputes see **Disputes—international**

International organization participation This entry lists in alphabetical order by abbreviation those international organizations in which the subject country is a member or participates in some other way.

International organizations This information is presented in **Appendix B: International Organizations and Groups** which includes the name, abbreviation, date established, aim, and members by category.

Internet country code This entry includes the two-letter codes maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

Internet hosts This entry lists the number of Internet hosts available within a country. An Internet host is a computer connected directly to the Internet; normally an Internet Service Provider’s (ISP) computer is a host. Internet users may use either a hard-wired terminal, at an institution with a mainframe computer connected directly to the Internet, or may connect remotely by

way of a modem via telephone line, cable, or satellite to the Internet Service Provider’s host computer. The number of hosts is one indicator of the extent of Internet connectivity.

Internet users This entry gives the number of users within a country that access the Internet. Statistics vary from country to country and may include users who access the Internet at least several times a week to those who access it only once within a period of several months.

Introduction This category includes one entry, **Background**.

Investment (gross fixed) This entry records total business spending on fixed assets, such as factories, machinery, equipment, dwellings, and inventories of raw materials, which provide the basis for future production. It is measured gross of the depreciation of the assets, i.e., it includes investment that merely replaces worn-out or scrapped capital.

Irrigated land This entry gives the number of square kilometers of land area that is artificially supplied with water.

Judicial branch This entry contains the name(s) of the highest court(s) and a brief description of the selection process for members.

Labor force This entry contains the total labor force figure.

Labor force—by occupation This entry lists the percentage distribution of the labor force by occupation. The distribution will total less than 100 percent if the data are incomplete.

Land boundaries This entry contains the *total* length of all land boundaries and the individual lengths for each of the contiguous *border countries*. When available, official lengths published by national statistical agencies are used. Because surveying methods may differ, country border lengths reported by contiguous countries may differ.

Land use This entry contains the percentage shares of total land area for three different types of land use: *arable land*—land cultivated for crops like wheat, maize, and rice that are replanted after each harvest; *permanent crops*—land cultivated for crops like citrus, coffee, and rubber that are not replanted after each harvest; includes land under flowering shrubs, fruit trees, nut trees, and vines, but excludes land under trees grown for wood or timber; *other*—any land not arable or under permanent crops; includes permanent meadows and pastures, forests and woodlands, built-on areas, roads, barren land, etc.

Languages This entry provides a rank ordering of languages starting with the largest and sometimes includes the percent of total population speaking that language.

Legal system This entry contains a brief description of the legal system’s historical roots, role in government, and acceptance of International Court of Justice (ICJ) jurisdiction.

Legislative branch This entry contains information on the structure (unicameral, bicameral, tricameral),

formal name, number of seats, and term of office. *Elections* includes the nature of election process or accession to power, date of the last election, and date of the next election. *Election results* includes the percent of vote and/or number of seats held by each party in the last election.

Life expectancy at birth This entry contains the average number of years to be lived by a group of people born in the same year, if mortality at each age remains constant in the future. The entry includes *total population* as well as the *male* and *female* components. Life expectancy at birth is also a measure of overall quality of life in a country and summarizes the mortality at all ages. It can also be thought of as indicating the potential return on investment in human capital and is necessary for the calculation of various actuarial measures.

Literacy This entry includes a *definition* of literacy and Census Bureau percentages for the *total population*, *males*, and *females*. There are no universal definitions and standards of literacy. Unless otherwise specified, all rates are based on the most common definition—the ability to read and write at a specified age. Detailing the standards that individual countries use to assess the ability to read and write is beyond the scope of the *Factbook*. Information on literacy, while not a perfect measure of educational results, is probably the most easily available and valid for international comparisons. Low levels of literacy, and education in general, can impede the economic development of a country in the current rapidly changing, technology-driven world.

Location This entry identifies the country's regional location, neighboring countries, and adjacent bodies of water.

Major infectious diseases This entry lists major infectious diseases likely to be encountered in countries where the risk of such diseases is assessed to be very high as compared to the United States. These infectious diseases represent risks to US government personnel traveling to the specified country for a period of less than three years. The **degree of risk** is assessed by considering the foreign nature of these infectious diseases, their severity, and the probability of being affected by the diseases present. The diseases listed do not necessarily represent the total disease burden experienced by the local population. The risk to an individual traveler varies considerably by the specific location, visit duration, type of activities, type of accommodations, time of year, and other factors. Consultation with a travel medicine physician is needed to evaluate individual risk and recommend appropriate preventive measures such as vaccines. Diseases are organized into the following six exposure categories shown in italics and listed in typical descending order of risk. Note: The sequence of exposure categories listed in individual country entries may vary according to local conditions.

food or waterborne diseases acquired through eating or drinking on the local economy:

Hepatitis A—viral disease that interferes with the functioning of the liver; spread through consumption of food or water contaminated with fecal matter, principally in areas of poor sanitation; victims exhibit fever, jaundice, and diarrhea; 15% of victims will experience prolonged symptoms over 6–9 months; vaccine available.

Hepatitis E—water-borne viral disease that interferes with the functioning of the liver; most commonly spread through fecal contamination of drinking water; victims exhibit jaundice, fatigue, abdominal pain, and dark colored urine.

Typhoid fever—bacterial disease spread through contact with food or water contaminated by fecal matter or sewage; victims exhibit sustained high fevers; left untreated, mortality rates can reach 20%.

vectorborne diseases acquired through the bite of an infected arthropod:

Malaria—caused by single-cell parasitic protozoa *Plasmodium*; transmitted to humans via the bite of the female *Anopheles* mosquito; parasites multiply in the liver attacking red blood cells resulting in cycles of fever, chills, and sweats accompanied by anemia; death due to damage to vital organs and interruption of blood supply to the brain; endemic in 100, mostly tropical, countries with 90% of cases and the majority of 1.5–2.5 million estimated annual deaths occurring in sub-Saharan Africa.

Dengue fever—mosquito-borne (*Aedes aegypti*) viral disease associated with urban environments; manifests as sudden onset of fever and severe headache; occasionally produces shock and hemorrhage leading to death in 5% of cases.

Yellow fever—mosquito-borne viral disease; severity ranges from influenza-like symptoms to severe hepatitis and hemorrhagic fever; occurs only in tropical South America and sub-Saharan Africa, where most cases are reported; fatality rate is less than 20%.

Japanese Encephalitis—mosquito-borne (*Culex tritaeniorhynchus*) viral disease associated with rural areas in Asia; acute encephalitis can progress to paralysis, coma, and death; fatality rates 30%.

African Trypanosomiasis—caused by the parasitic protozoa *Trypanosoma*; transmitted to humans via the bite of bloodsucking Tsetse flies; infection leads to malaise and irregular fevers and, in advanced cases when the parasites invade the central nervous system, coma and death; endemic in 36 countries of sub-Saharan Africa; cattle and wild animals act as reservoir hosts for the parasites.

Cutaneous Leishmaniasis—caused by the parasitic protozoa *leishmania*; transmitted to humans via the bite of sandflies; results in skin lesions that may become chronic; endemic in 88 countries; 90% of cases occur in Iran, Afghanistan, Syria, Saudi Arabia, Brazil, and Peru; wild and domesticated animals as well as humans can act as reservoirs of infection.

Plague—bacterial disease transmitted by fleas normally associated with rats; person-to-person airborne

transmission also possible; recent plague epidemics occurred in areas of Asia, Africa, and South America associated with rural areas or small towns and villages; manifests as fever, headache, and painfully swollen lymph nodes; disease progresses rapidly and without antibiotic treatment leads to pneumonic form with a death rate in excess of 50%.

Crimean-Congo hemorrhagic fever—tick-borne viral disease; infection may also result from exposure to infected animal blood or tissue; geographic distribution includes Africa, Asia, the Middle East, and Eastern Europe; sudden onset of fever, headache, and muscle aches followed by hemorrhaging in the bowels, urine, nose, and gums; mortality rate is approximately 30%.

Rift Valley fever—viral disease affecting domesticated animals and humans; transmission is by mosquito and other biting insects; infection may also occur through handling of infected meat or contact with blood; geographic distribution includes eastern and southern Africa where cattle and sheep are raised; symptoms are generally mild with fever and some liver abnormalities, but the disease may progress to hemorrhagic fever, encephalitis, or ocular disease; fatality rates are low at about 1% of cases.

Chikungunya—mosquito-borne (*Aedes aegypti*) viral disease associated with urban environments, similar to Dengue Fever; characterized by sudden onset of fever, rash, and severe joint pain usually lasting 3–7 days, some cases result in persistent arthritis.

water contact diseases acquired through swimming or wading in freshwater lakes, streams, and rivers:

Leptospirosis—bacterial disease that affects animals and humans; infection occurs through contact with water, food, or soil contaminated by animal urine; symptoms include high fever, severe headache, vomiting, jaundice, and diarrhea; untreated, the disease can result in kidney damage, liver failure, meningitis, or respiratory distress; fatality rates are low but left untreated recovery can take months.

Schistosomiasis—caused by parasitic trematode flatworm *Schistosoma*; fresh water snails act as intermediate host and release larval form of parasite that penetrates the skin of people exposed to contaminated water; worms mature and reproduce in the blood vessels, liver, kidneys, and intestines releasing eggs, which become trapped in tissues triggering an immune response; may manifest as either urinary or intestinal disease resulting in decreased work or learning capacity; mortality, while generally low, may occur in advanced cases usually due to bladder cancer; endemic in 74 developing countries with 80% of infected people living in sub-Saharan Africa; humans act as the reservoir for this parasite.

aerosolized dust or soil contact disease acquired through inhalation of aerosols contaminated with rodent urine:

Lassa fever—viral disease carried by rats of the genus *Mastomys*; endemic in portions of West Africa;

infection occurs through direct contact with or consumption of food contaminated by rodent urine or fecal matter containing virus particles; fatality rate can reach 50% in epidemic outbreaks.

respiratory disease acquired through close contact with an infectious person:

Meningococcal meningitis—bacterial disease causing an inflammation of the lining of the brain and spinal cord; one of the most important bacterial pathogens is *Neisseria meningitidis* because of its potential to cause epidemics; symptoms include stiff neck, high fever, headaches, and vomiting; bacteria are transmitted from person to person by respiratory droplets and facilitated by close and prolonged contact resulting from crowded living conditions, often with a seasonal distribution; death occurs in 5–15% of cases, typically within 24–48 hours of onset of symptoms; highest burden of meningococcal disease occurs in the hyperendemic region of sub-Saharan Africa known as the “Meningitis Belt” which stretches from Senegal east to Ethiopia.

animal contact disease acquired through direct contact with local animals:

Rabies—viral disease of mammals usually transmitted through the bite of an infected animal, most commonly dogs; virus affects the central nervous system causing brain alteration and death; symptoms initially are non-specific fever and headache progressing to neurological symptoms; death occurs within days of the onset of symptoms.

Manpower available for military service This entry gives the number of males and females falling in the military age range for the country and assumes that every individual is fit to serve.

Manpower fit for military service This entry gives the number of males and females falling in the military age range for the country and who are not otherwise disqualified for health reasons; accounts for the health situation in the country and provides a more realistic estimate of the actual number fit to serve.

Manpower reaching military service age annually This entry gives the number of draft-age males and females entering the military manpower pool in any given year and is a measure of the availability of draft-age young adults.

Map references This entry includes the name of the Factbook reference map on which a country may be found. The entry on **Geographic coordinates** may be helpful in finding some smaller countries.

Maritime claims This entry includes the following claims, the definitions of which are excerpted from the United Nations Convention on the Law of the Sea (UNCLOS), which alone contains the full and definitive descriptions:

territorial sea—the sovereignty of a coastal state extends beyond its land territory and internal waters to an adjacent belt of sea, described as the territorial sea in the UNCLOS (Part II); this sovereignty extends to the air space over the territorial sea as well

as its underlying seabed and subsoil; every state has the right to establish the breadth of its territorial sea up to a limit not exceeding 12 nautical miles; the normal baseline for measuring the breadth of the territorial sea is the mean low-water line along the coast as marked on large-scale charts officially recognized by the coastal state; the UNCLOS describes specific rules for archipelagic states.

contiguous zone—according to the UNCLOS (Article 33), this is a zone contiguous to a coastal state's territorial sea, over which it may exercise the control necessary to: prevent infringement of its customs, fiscal, immigration, or sanitary laws and regulations within its territory or territorial sea; punish infringement of the above laws and regulations committed within its territory or territorial sea; the contiguous zone may not extend beyond 24 nautical miles from the baselines from which the breadth of the territorial sea is measured (e.g. the US has claimed a 12-nautical mile contiguous zone in addition to its 12-nautical mile territorial sea).

exclusive economic zone (EEZ)—the UNCLOS (Part V) defines the EEZ as a zone beyond and adjacent to the territorial sea in which a coastal state has: sovereign rights for the purpose of exploring and exploiting, conserving and managing the natural resources, whether living or non-living, of the waters superjacent to the seabed and of the seabed and its subsoil, and with regard to other activities for the economic exploitation and exploration of the zone, such as the production of energy from the water, currents, and winds; jurisdiction with regard to the establishment and use of artificial islands, installations, and structures; marine scientific research; the protection and preservation of the marine environment; the outer limit of the exclusive economic zone shall not exceed 200 nautical miles from the baselines from which the breadth of the territorial sea is measured.

continental shelf—the UNCLOS (Article 76) defines the continental shelf of a coastal state as comprising the seabed and subsoil of the submarine areas that extend beyond its territorial sea throughout the natural prolongation of its land territory to the outer edge of the continental margin, or to a distance of 200 nautical miles from the baselines from which the breadth of the territorial sea is measured where the outer edge of the continental margin does not extend up to that distance; the continental margin comprises the submerged prolongation of the landmass of the coastal state, and consists of the seabed and subsoil of the shelf, the slope and the rise; wherever the continental margin extends beyond 200 nautical miles from the baseline, coastal states may extend their claim to a distance not to exceed 350 nautical miles from the baseline or 100 nautical miles from the 2500 meter isobath; it does not include the deep ocean floor with its oceanic ridges or the subsoil thereof.

exclusive fishing zone—while this term is not used in the UNCLOS, some states (e.g., the United Kingdom) have chosen not to claim an EEZ, but rather to claim jurisdiction over the living resources off their coast; in such cases, the term exclusive fishing zone is often used; the breadth of this zone is normally the same as the EEZ or 200 nautical miles.

Median age This entry is the age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older. It is a single index that summarizes the age distribution of a population. Currently, the median age ranges from a low of about 15 in Uganda and Gaza Strip to 40 or more in several European countries and Japan. See the entry for "Age structure" for the importance of a young versus an older age structure and, by implication, a low versus a higher median age.

Merchant marine Merchant marine may be defined as all ships engaged in the carriage of goods; or all commercial vessels (as opposed to all nonmilitary ships), which excludes tugs, fishing vessels, offshore oil rigs, etc. This entry contains information in four fields—*total*, *ships by type*, *foreign-owned*, and *registered in other countries*.

Total includes the number of ships (1,000 GRT or over), total DWT for those ships, and total GRT for those ships. DWT or dead weight tonnage is the total weight of cargo, plus bunkers, stores, etc., that a ship can carry when immersed to the appropriate load line. GRT or gross register tonnage is a figure obtained by measuring the entire sheltered volume of a ship available for cargo and passengers and converting it to tons on the basis of 100 cubic feet per ton; there is no stable relationship between GRT and DWT.

Ships by type includes a listing of barge carriers, bulk cargo ships, cargo ships, chemical tankers, combination bulk carriers, combination ore/oil carriers, container ships, liquefied gas tankers, livestock carriers, multifunctional large-load carriers, petroleum tankers, passenger ships, passenger/cargo ships, railcar carriers, refrigerated cargo ships, roll-on/roll-off cargo ships, short-sea passenger ships, specialized tankers, and vehicle carriers.

Foreign-owned are ships that fly the flag of one country but belong to owners in another.

Registered in other countries are ships that belong to owners in one country but fly the flag of another.

Military This category includes the entries dealing with a country's military structure, manpower, and expenditures.

Military—note This entry includes miscellaneous military information of significance not included elsewhere.

Military branches This entry lists the service branches subordinate to defense ministries or the equivalent (typically ground, naval, air, and marine forces).

Military expenditures—percent of GDP This entry gives spending on defense programs for the most recent year available as a percent of gross domestic product

(GDP); the GDP is calculated on an exchange rate basis, i.e., not in terms of purchasing power parity (PPP).

Military service age and obligation This entry gives the required ages for voluntary or conscript military service and the length of service obligation.

Money figures All money figures are expressed in contemporaneous US dollars unless otherwise indicated.

National holiday This entry gives the primary national day of celebration—usually independence day.

Nationality This entry provides the identifying terms for citizens—*noun* and *adjective*.

Natural gas—consumption This entry is the total natural gas consumed in cubic meters (cu m). The discrepancy between the amount of natural gas produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes and other complicating factors.

Natural gas—exports This entry is the total natural gas exported in cubic meters (cu m).

Natural gas—imports This entry is the total natural gas imported in cubic meters (cu m).

Natural gas—production This entry is the total natural gas produced in cubic meters (cu m). The discrepancy between the amount of natural gas produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes and other complicating factors.

Natural gas—proved reserves This entry is the stock of proved reserves of natural gas in cubic meters (cu m). Proved reserves are those quantities of natural gas, which, by analysis of geological and engineering data, can be estimated with a high degree of confidence to be commercially recoverable from a given date forward, from known reservoirs and under current economic conditions.

Natural hazards This entry lists potential natural disasters.

Natural resources This entry lists a country's mineral, petroleum, hydropower, and other resources of commercial importance.

Net migration rate This entry includes the figure for the difference between the number of persons entering and leaving a country during the year per 1,000 persons (based on midyear population). An excess of persons entering the country is referred to as net immigration (e.g., 3.56 migrants/1,000 population); an excess of persons leaving the country as net emigration (e.g., -9.26 migrants/1,000 population). The net migration rate indicates the contribution of migration to the overall level of population change. High levels of migration can cause problems such as increasing unemployment and potential ethnic strife (if people are coming in) or a reduction in the labor force, perhaps in certain key sectors (if people are leaving).

Oil—consumption This entry is the total oil consumed in barrels per day (bbl/day). The discrepancy between the amount of oil produced and/or imported and the amount consumed and/or exported is due to the omis-

sion of stock changes, refinery gains, and other complicating factors.

Oil—exports This entry is the total oil exported in barrels per day (bbl/day), including both crude oil and oil products.

Oil—imports This entry is the total oil imported in barrels per day (bbl/day), including both crude oil and oil products.

Oil—production This entry is the total oil produced in barrels per day (bbl/day). The discrepancy between the amount of oil produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes, refinery gains, and other complicating factors.

Oil—proved reserves This entry is the stock of proved reserves of crude oil in barrels (bbl). Proved reserves are those quantities of petroleum which, by analysis of geological and engineering data, can be estimated with a high degree of confidence to be commercially recoverable from a given date forward, from known reservoirs and under current economic conditions.

People This category includes the entries dealing with the characteristics of the people and their society.

People—note This entry includes miscellaneous demographic information of significance not included elsewhere.

Personal Names—Capitalization The *Factbook* capitalizes the surname or family name of individuals for the convenience of our users who are faced with a world of different cultures and naming conventions. The need for capitalization, bold type, underlining, italics, or some other indicator of the individual's surname is apparent in the following examples: MAO Zedong, Fidel CASTRO Ruz, George W. BUSH, and TUNKU SALAHUDDIN Abdul Aziz Shah ibni Al-Marhum Sultan Hisammuddin Alam Shah. By knowing the surname, a short form without all capital letters can be used with confidence as in President Castro, Chairman Mao, President Bush, or Sultan Tunku Salahuddin. The same system of capitalization is extended to the names of leaders with surnames that are not commonly used such as Queen ELIZABETH II. For Vietnamese names, the given name is capitalized because officials are referred to by their given name rather than by their surname. For example, the president of Vietnam is Tran Duc LUONG. His surname is Tran, but he is referred to by his given name—President LUONG.

Personal Names—Spelling The romanization of personal names in the *Factbook* normally follows the same transliteration system used by the US Board on Geographic Names for spelling place names. At times, however, a foreign leader expressly indicates a preference for, or the media or official documents regularly use, a romanized spelling that differs from the transliteration derived from the US Government standard. In such cases, the *Factbook* uses the alternative spelling.

Personal Names—Titles The *Factbook* capitalizes any valid title (or short form of it) immediately preceding a person's name. A title standing alone is not capitalized.

Examples: President PUTIN and President BUSH are chiefs of state. In Russia, the president is chief of state and the premier is the head of the government, while in the US, the president is both chief of state and head of government.

Petroleum See entries under Oil.

Petroleum products See entries under Oil.

Pipelines This entry gives the lengths and types of pipelines for transporting products like natural gas, crude oil, or petroleum products.

Political parties and leaders This entry includes a listing of significant political organizations and their leaders.

Political pressure groups and leaders This entry includes a listing of political, social, labor, or religious organizations with leaders involved in politics, but not standing for legislative election.

Population This entry gives an estimate from the US Bureau of the Census based on statistics from population censuses, vital statistics registration systems, or sample surveys pertaining to the recent past and on assumptions about future trends. The total population presents one overall measure of the potential impact of the country on the world and within its region. Note: Starting with the 1993 *Factbook*, demographic estimates for some countries (mostly African) have explicitly taken into account the effects of the growing impact of the HIV/AIDS epidemic. These countries are currently: The Bahamas, Benin, Botswana, Brazil, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Central African Republic, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Ethiopia, Gabon, Ghana, Guyana, Haiti, Honduras, Kenya, Lesotho, Malawi, Mozambique, Namibia, Nigeria, Rwanda, South Africa, Swaziland, Tanzania, Thailand, Togo, Uganda, Zambia, and Zimbabwe.

Population below poverty line National estimates of the percentage of the population falling below the poverty line are based on surveys of sub-groups, with the results weighted by the number of people in each group. Definitions of poverty vary considerably among nations. For example, rich nations generally employ more generous standards of poverty than poor nations.

Population growth rate The average annual percent change in the population, resulting from a surplus (or deficit) of births over deaths and the balance of migrants entering and leaving a country. The rate may be positive or negative. The growth rate is a factor in determining how great a burden would be imposed on a country by the changing needs of its people for infrastructure (e.g., schools, hospitals, housing, roads), resources (e.g., food, water, electricity), and jobs. Rapid population growth can be seen as threatening by neighboring countries.

Ports and terminals This entry lists major ports and terminals primarily on the basis of the amount of cargo tonnage shipped through the facilities on an annual basis. In some instances, the number of containers handled or ship visits were also considered.

Public debt This entry records the cumulative total of all government borrowings less repayments that are denominated in a country's home currency. Public debt should not be confused with external debt, which reflects the foreign currency liabilities of both the private and public sector and must be financed out of foreign exchange earnings.

Radio broadcast stations This entry includes the total number of AM, FM, and shortwave broadcast stations.

Railways This entry states the total route length of the railway network and of its component parts by gauge: *broad*, *standard*, *narrow*, and *dual*. Other gauges are listed under *note*.

Reference maps This section includes world and regional maps.

Refugees and internally displaced persons This entry includes those persons residing in a country as *refugees* or internally displaced persons (*IDPs*). The definition of a refugee according to a United Nations Convention is "a person who is outside his/her country of nationality or habitual residence; has a well-founded fear of persecution because of his/her race, religion, nationality, membership in a particular social group or political opinion; and is unable or unwilling to avail himself/herself of the protection of that country, or to return there, for fear of persecution." The UN established the Office of the UN High Commissioner for Refugees (UNHCR) in 1950 to handle refugee matters worldwide. The UN Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) has a different operational definition for a Palestinian refugee: "a person whose normal place of residence was Palestine during the period 1 June 1946 to 15 May 1948 and who lost both home and means of livelihood as a result of the 1948 conflict." However, UNHCR also assists some 400,000 Palestinian refugees not covered under the UNRWA definition. The term "internally displaced person" is not specifically covered in the UN Convention; it is used to describe people who have fled their homes for reasons similar to refugees, but who remain within their own national territory and are subject to the laws of that state.

Religions This entry is an ordered listing of religions by adherents starting with the largest group and sometimes includes the percent of total population.

Reserves of foreign exchange and gold This entry gives the dollar value for the stock of all financial assets that are available to the central monetary authority for use in meeting a country's balance of payments needs as of the end-date of the period specified. This category includes not only foreign currency and gold, but also a country's holdings of Special Drawing Rights in the International Monetary Fund, and its reserve position in the Fund.

Roadways This entry gives the total length of the road network and includes the length of the *paved* and *unpaved* portions.

Sex ratio This entry includes the number of males for each female in five age groups—at birth, under 15 years, 15–64 years, 65 years and over, and for the total population.

Sex ratio at birth has recently emerged as an indicator of certain kinds of sex discrimination in some countries. For instance, high sex ratios at birth in some Asian countries are now attributed to sex-selective abortion and infanticide due to a strong preference for sons. This will affect future marriage patterns and fertility patterns. Eventually, it could cause unrest among young adult males who are unable to find partners.

Suffrage This entry gives the age at enfranchisement and whether the right to vote is universal or restricted.

Telephone numbers All telephone numbers in *The World Factbook* consist of the country code in brackets, the city or area code (where required) in parentheses, and the local number. The one component that is not presented is the international access code, which varies from country to country. For example, an international direct dial telephone call placed from the US to Madrid, Spain, would be as follows: 011 [34] (1) 577-xxxx, where 011 is the international access code for station-to-station calls; 01 is for calls other than station-to-station calls, [34] is the country code for Spain, (1) is the city code for Madrid, 577 is the local exchange, and xxxx is the local telephone number. An international direct dial telephone call placed from another country to the US would be as follows: international access code + [1] (202) 939-xxxx, where [1] is the country code for the US, (202) is the area code for Washington, DC, 939 is the local exchange, and xxxx is the local telephone number.

Telephone system This entry includes a brief general assessment of the system with details on the domestic and international components. The following terms and abbreviations are used throughout the entry:

Arabsat—Arab Satellite Communications Organization (Riyadh, Saudi Arabia).

Autodin—Automatic Digital Network (US Department of Defense).

CB—citizen's band mobile radio communications.

Cellular telephone system—the telephones in this system are radio transceivers, with each instrument having its own private radio frequency and sufficient radiated power to reach the booster station in its area (cell), from which the telephone signal is fed to a telephone exchange.

Central American Microwave System—a trunk microwave radio relay system that links the countries of Central America and Mexico with each other.

Coaxial cable—a multichannel communication cable consisting of a central conducting wire, surrounded by and insulated from a cylindrical conducting shell; a large number of telephone channels can be made available within the insulated space by the use of a large number of carrier frequencies.

Comsat—Communications Satellite Corporation (US).

DSN—Defense Switched Network (formerly Automatic Voice Network or Autovon); basic general-purpose, switched voice network of the Defense Communications System (US Department of Defense).

Eutelsat—European Telecommunications Satellite Organization (Paris).

Fiber-optic cable—a multichannel communications cable using a thread of optical glass fibers as a transmission medium in which the signal (voice, video, etc.) is in the form of a coded pulse of light.

GSM—a global system for mobile (cellular) communications devised by the Groupe Special Mobile of the pan-European standardization organization, Conference Europeenne des Posts et Telecommunications (CEPT) in 1982.

HF—high frequency; any radio frequency in the 3,000- to 30,000-kHz range.

Inmarsat—International Maritime Satellite Organization (London); provider of global mobile satellite communications for commercial, distress, and safety applications at sea, in the air, and on land.

Intelsat—International Telecommunications Satellite Organization (Washington, DC).

Intersputnik—International Organization of Space Communications (Moscow); first established in the former Soviet Union and the East European countries, it is now marketing its services worldwide with earth stations in North America, Africa, and East Asia.

Landline—communication wire or cable of any sort that is installed on poles or buried in the ground.

Marecs—Maritime European Communications Satellite used in the Inmarsat system on lease from the European Space Agency.

Marisat—satellites of the Comsat Corporation that participate in the Inmarsat system.

Medarabtel—the Middle East Telecommunications Project of the International Telecommunications Union (ITU) providing a modern telecommunications network, primarily by microwave radio relay, linking Algeria, Djibouti, Egypt, Jordan, Libya, Morocco, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, and Yemen; it was initially started in Morocco in 1970 by the Arab Telecommunications Union (ATU) and was known at that time as the Middle East Mediterranean Telecommunications Network.

Microwave radio relay—transmission of long distance telephone calls and television programs by highly directional radio microwaves that are received and sent on from one booster station to another on an optical path.

NMT—Nordic Mobile Telephone; an analog cellular telephone system that was developed jointly by the national telecommunications authorities of the Nordic countries (Denmark, Finland, Iceland, Norway, and Sweden).

Orbita—a Russian television service; also the trade name of a packet-switched digital telephone network.

Radiotelephone communications—the two-way transmission and reception of sounds by broadcast radio on authorized frequencies using telephone handsets.

PanAmSat—PanAmSat Corporation (Greenwich, CT).

SAFE—South African Far East Cable

Satellite communication system—a communication system consisting of two or more earth stations and at least one satellite that provide long distance transmission of voice, data, and television; the system usually serves as a trunk connection between telephone exchanges; if the earth stations are in the same country, it is a domestic system.

Satellite earth station—a communications facility with a microwave radio transmitting and receiving antenna and required receiving and transmitting equipment for communicating with satellites.

Satellite link—a radio connection between a satellite and an earth station permitting communication between them, either one-way (down link from satellite to earth station—television receive-only transmission) or two-way (telephone channels).

SHF—super high frequency; any radio frequency in the 3,000- to 30,000-MHz range.

Shortwave—radio frequencies (from 1.605 to 30 MHz) that fall above the commercial broadcast band and are used for communication over long distances.

Solidaridad—geosynchronous satellites in Mexico's system of international telecommunications in the Western Hemisphere.

Stasionar—Russia's geostationary system for satellite telecommunications.

Submarine cable—a cable designed for service under water.

TAT—Trans-Atlantic Telephone; any of a number of high-capacity submarine coaxial telephone cables linking Europe with North America.

Telefax—facsimile service between subscriber stations via the public switched telephone network or the international Datel network.

Telegraph—a telecommunications system designed for unmodulated electric impulse transmission.

Telex—a communication service involving teletype-writers connected by wire through automatic exchanges.

Tropospheric scatter—a form of microwave radio transmission in which the troposphere is used to scatter and reflect a fraction of the incident radio waves back to earth; powerful, highly directional antennas are used to transmit and receive the microwave signals; reliable over-the-horizon communications are realized for distances up to 600 miles in a single hop; additional hops can extend the range of this system for very long distances.

Trunk network—a network of switching centers, connected by multichannel trunk lines.

UHF—ultra high frequency; any radio frequency in the 300- to 3,000-MHz range.

VHF—very high frequency; any radio frequency in the 30- to 300-MHz range.

Telephones—main lines in use This entry gives the total number of main telephone lines in use.

Telephones—mobile cellular This entry gives the total number of mobile cellular telephone subscribers.

Television broadcast stations This entry gives the total number of separate broadcast stations plus any repeater stations.

Terminology Due to the highly structured nature of the *Factbook* database, some collective generic terms have to be used. For example, the word **Country** in the **Country name** entry refers to a wide variety of dependencies, areas of special sovereignty, uninhabited islands, and other entities in addition to the traditional countries or independent states. **Military** is also used as an umbrella term for various civil defense, security, and defense activities in many entries. The **Independence** entry includes the usual colonial independence dates and former ruling states as well as other significant nationhood dates such as the traditional founding date or the date of unification, federation, confederation, establishment, or state succession that are not strictly independence dates. Dependent areas have the nature of their dependency status noted in this same entry.

Terrain This entry contains a brief description of the topography.

Time Difference This entry is expressed in The World Factbook in two ways. First, it is stated as the difference in hours between the capital of an entity and Coordinated Universal Time (UTC) during Standard Time. Additionally, the difference in time between the capital of an entity and that observed in Washington, D.C. is also provided. Note that the time difference assumes both locations are simultaneously observing Standard Time or Daylight Saving Time.

Time zones Ten countries (Australia, Brazil, Canada, Indonesia, Kazakhstan, Mexico, New Zealand, Russia, Spain, and the United States) and the island of Greenland observe more than one official time depending on the number of designated time zones within their boundaries. An illustration of time zones throughout the world and within countries can be seen in the Standard Time Zones of the World map included in the Reference Maps section of The World Factbook.

Total fertility rate This entry gives a figure for the average number of children that would be born per woman if all women lived to the end of their child-bearing years and bore children according to a given fertility rate at each age. The total fertility rate (TFR) is a more direct measure of the level of fertility than the crude birth rate, since it refers to births per woman. This indicator shows the potential for population change in the country. A rate of two children per woman is considered the replacement rate for a population, resulting in relative stability in terms of total numbers. Rates above two children indicate populations growing in size and whose median age is declining. Higher rates may also indicate difficulties for families, in some situations, to feed and educate their children and for women to enter the labor force. Rates below two children indicate populations decreasing in size and growing older. Global fertility rates are in general decline and this trend is most pronounced in industrialized countries, especially Western

Europe, where populations are projected to decline dramatically over the next 50 years.

Trafficking in persons Trafficking in persons is modern-day slavery, involving victims who are forced, defrauded, or coerced into labor or sexual exploitation. The International Labor Organization (ILO), the UN agency charged with addressing labor standards, employment, and social protection issues, estimates that 12.3 million people worldwide are enslaved in forced labor, bonded labor, forced child labor, sexual servitude, and involuntary servitude at any given time. Human trafficking is a multi-dimensional threat, depriving people of their human rights and freedoms, risking global health, promoting social breakdown, inhibiting development by depriving countries of their human capital, and helping fuel the growth of organized crime. In 2000, the US Congress passed the Trafficking Victims Protection Act (TVPA), reauthorized in 2003 and 2005, which provides tools for the US to combat trafficking in persons, both domestically and abroad. One of the law's key components is the creation of the US Department of State's annual Trafficking in Persons Report, which assesses the government response (i.e., the current situation) in some 150 countries with a significant number of victims trafficked across their borders who are recruited, harbored, transported, provided, or obtained for forced labor or sexual exploitation. Countries in the annual report are rated in three tiers, based on government efforts to combat trafficking. The countries identified in this entry are those listed in the 2006 Trafficking in Persons Report as Tier 2 Watch List or Tier 3 based on the following tier rating definitions:

Tier 2 Watch List countries do not fully comply with the minimum standards for the elimination of trafficking but are making significant efforts to do so, and meet one of the following criteria:

1. they display a high or significantly increasing number of victims,
2. they have failed to provide evidence of increasing efforts to combat trafficking in persons, or,

3. they have committed to take action over the next year.

Tier 3 countries neither satisfy the minimum standards for the elimination of trafficking nor demonstrate a significant effort to do so. Countries in this tier are subject to potential non-humanitarian and non-trade sanctions.

Transnational issues This category includes four entries—**Disputes—international**, **Refugees and internally displaced persons**, **Trafficking in persons**, and **Illicit drugs**—that deal with current issues going beyond national boundaries.

Transportation This category includes the entries dealing with the means for movement of people and goods.

Transportation—note This entry includes miscellaneous transportation information of significance not included elsewhere.

UTC (Coordinated Universal Time) See entry for Coordinated Universal Time.

Unemployment rate This entry contains the percent of the labor force that is without jobs. Substantial underemployment might be noted.

Waterways This entry gives the total length of navigable rivers, canals, and other inland bodies of water.

Weights and Measures This information is presented in Appendix G: Weights and Measures and includes mathematical notations (mathematical powers and names), metric interrelationships (prefix; symbol; length, weight, or capacity; area; volume), and standard conversion factors.

Years All year references are for the calendar year (CY) unless indicated as fiscal year (FY). The calendar year is an accounting period of 12 months from 1 January to 31 December. The fiscal year is an accounting period of 12 months other than 1 January to 31 December.

Note: Information for the US and US dependencies was compiled from material in the public domain and does not represent Intelligence Community estimates.

AFGHANISTAN

INTRODUCTION

Background: Ahmad Shah DURRANI unified the Pashtun tribes and founded Afghanistan in 1747. The country served as a buffer between the British and Russian empires until it won independence from notional British control in 1919. A brief experiment in democracy ended in a 1973 coup and a 1978 Communist counter-coup. The Soviet Union invaded in 1979 to support the tottering Afghan Communist regime, touching off a long and destructive war. The USSR withdrew in 1989 under relentless pressure by internationally supported anti-Communist mujahedin rebels. Subsequently, a series of civil wars saw Kabul finally fall in 1996 to the Taliban, a hardline Pakistani-sponsored movement that emerged in 1994 to end the country's civil war and anarchy. Following the 11 September 2001 terrorist attacks in New York City, a US, Allied, and anti-Taliban Northern Alliance military action toppled the Taliban for sheltering Osama BIN LADIN. The UN-sponsored Bonn Conference in 2001 established a process for political reconstruction that included the adoption of a new constitution and a presidential election in 2004, and National Assembly elections in 2005. On 7 December 2004, Hamid KARZAI became the first democratically elected president of Afghanistan. The National Assembly was inaugurated on 19 December 2005.

Suffrage: 18 years of age; universal

Executive branch:

chief of state: President of the Islamic Republic of Afghanistan Hamid KARZAI (since 7 December 2004); Vice Presidents Ahmad Zia MASOOD and Abdul Karim KHALILI (since 7 December 2004); note—the president is both the chief of state and head of government; former King ZAHIR Shah holds the honorific, “Father of the Country,” and presides symbolically over certain occasions but

lacks any governing authority; the honorific is not hereditary

head of government: President of the Islamic Republic of Afghanistan Hamid KARZAI (since 7 December 2004); Vice Presidents Ahmad Zia MASOOD and Abdul Karim KHALILI (since 7 December 2004)

cabinet: 25 ministers; note—under the new constitution, ministers are appointed by the president and approved by the National Assembly

elections: the president and two vice presidents are elected by direct vote for a five-year term (eligible for a second term); if no candidate receives 50% or more of the vote in the first round of voting, the two candidates with the most votes will participate in a second round; a president can only be elected for two terms; election last held 9 October 2004 (next to be held in 2009)

election results: Hamid KARZAI elected president; percent of vote—Hamid KARZAI 55.4%, Yunus QANUNI 16.3%, Ustad Mohammad MOHAQQEQ 11.6%, Abdul Rashid DOSTAM 10.0%, Abdul Latif PEDRAM 1.4%, Masooda JALAL 1.2%

Legislative branch: the bicameral National Assembly consists of the Wolesi Jirga or House of People (no more than 249 seats), directly elected for five-year terms, and the Meshrano Jirga or House of Elders (102 seats, one-third elected from provincial councils for four-year terms, one-third elected from local district councils for three-year terms, and one-third nominated by the president for five-year terms)

note: on rare occasions the government may convene a Loya Jirga (Grand Council) on issues of independence, national sovereignty, and territorial integrity; it can amend the provisions of the constitution and prosecute the president; it is made up of members of the National Assembly and chairpersons of the provincial and district councils

elections: last held 18 September 2005 (next to be held for the Wolesi Jirga by September 2009; next to be held for the provincial councils to the Meshrano Jirga by September 2008)

election results: the single non-transferable vote (SNTV) system used in the election did not make use of political party slates; most candidates ran as independents

Judicial branch: the constitution establishes a nine-member Stera Mahkama or Supreme Court (its nine justices are appointed for 10-year terms by the president with approval of the Wolesi Jirga) and subordinate High Courts and

Appeals Courts; there is also a minister of justice; a separate Afghan Independent Human Rights Commission established by the Bonn Agreement is charged with investigating human rights abuses and war crimes

ECONOMY

Economy—overview: Afghanistan's economy is recovering from decades of conflict. The economy has improved significantly since the fall of the Taliban regime in 2001 largely because of the infusion of international assistance, the recovery of the agricultural sector, and service sector growth. Real GDP growth exceeded 8% in 2006. Despite the progress of the past few years, Afghanistan is extremely poor, landlocked, and highly dependent on foreign aid, agriculture, and trade with neighboring countries. Much of the population continues to suffer from shortages of housing, clean water, electricity, medical care, and jobs. Criminality, insecurity, and the Afghan Government's inability to extend rule of law to all parts of the country pose challenges to future economic growth. It will probably take the remainder of the decade and continuing donor aid and attention to significantly raise Afghanistan's living standards from its current level, among the lowest in the world. While the international community remains committed to Afghanistan's development, pledging over \$24 billion at three donors' conferences since 2002, Kabul will need to overcome a number of challenges. Expanding poppy cultivation and a growing opium trade generate roughly \$3 billion in illicit economic activity and looms as one of Kabul's most serious policy concerns. Other long-term challenges include: budget sustainability, job creation, corruption, government capacity, and rebuilding war torn infrastructure.

TRANSNATIONAL ISSUES

Disputes—international: Pakistan, with UN and other international assistance,

repatriated 2.3 million Afghan refugees with less than a million still remaining, many at their own choosing; Pakistan has proposed and Afghanistan protests construction of a fence and laying of mines along portions of their border; Coalition and Pakistani forces continue to monitor remote tribal areas to control the border with Afghanistan and stem terrorist and other illegal activities

Refugees and internally displaced persons: *IDPs:* 136,565 (mostly Pashtuns and Kuchis displaced in south and west due to drought and instability) (2006)

Illicit drugs: world's largest producer of opium; cultivation dropped 48% to 107,400 hectares in 2005; better weather and lack of widespread disease returned opium yields to normal levels, meaning potential opium production declined by only 10% to 4,475 metric tons; if the entire poppy crop were processed, it is estimated that 526 metric tons of heroin could be processed; many narcotics-processing labs throughout the country; drug trade is a source of instability and some antigovernment groups profit from the trade; significant domestic use of opiates; 80–90% of the heroin consumed in Europe comes from Afghan opium; vulnerable to narcotics money laundering through informal financial networks; source of hashish

AKROTIRI

INTRODUCTION

Background: By terms of the 1960 Treaty of Establishment that created the independent Republic of Cyprus, the UK retained full sovereignty and jurisdiction over two areas of almost 254 square kilometers—Akrotiri and Dhekelia. The southernmost and smallest of these is the Akrotiri Sovereign Base Area, which is

also referred to as the Western Sovereign Base Area.

GEOGRAPHY

Location: peninsula on the southwest coast of Cyprus

ALBANIA

INTRODUCTION

Background: Between 1990 and 1992 Albania ended 46 years of xenophobic Communist rule and established a multi-party democracy. The transition has proven challenging as successive governments have tried to deal with high unemployment, widespread corruption, a dilapidated physical infrastructure, powerful organized crime networks, and combative political opponents. Albania has made progress in its democratic development since first holding multiparty elections in 1991, but deficiencies remain. International observers judged elections to be largely free and fair since the restoration of political stability following the collapse of pyramid schemes in 1997. In the 2005 general elections, the Democratic Party and its allies won a decisive victory on pledges of reducing crime and corruption, promoting economic growth, and decreasing the size of government. The election, and particularly the orderly transition of power, was considered an important step forward.

Although Albania's economy continues to grow, the country is still one of the poorest in Europe, hampered by a large informal economy and an inadequate energy and transportation infrastructure. Albania has played a largely helpful role in managing inter-ethnic tensions in southeastern Europe, and is continuing to work toward joining NATO and the EU. Albania, with troops in Iraq and Afghanistan, has been a strong supporter of the global war on terrorism.

ECONOMY

Economy—overview: Lagging behind its Balkan neighbors, Albania is making the

difficult transition to a more modern open-market economy. The government has taken measures to curb violent crime and reduce the large gray economy. The economy is bolstered by annual remittances from abroad of \$600–\$800 million, mostly from Albanians residing in Greece and Italy; this helps offset the towering trade deficit. Agriculture, which accounts for about one-quarter of GDP, is held back because of lack of modern equipment, unclear property rights, and the prevalence of small, inefficient plots of land. Energy shortages and antiquated and inadequate infrastructure contribute to Albania's poor business environment, which make it difficult to attract and sustain foreign investment. The planned construction of a new thermal power plant near Vlore and improved transmission and distribution facilities eventually will help relieve the energy shortages. Also, the government is moving slowly to improve the poor national road and rail network, a long-standing barrier to sustained economic growth. On the positive side, growth was strong in 2003–06 and inflation is low and stable.

GDP (purchasing power parity): \$20.46 billion

TRANSNATIONAL ISSUES

Disputes—international: the Albanian Government calls for the protection of the rights of ethnic Albanians in neighboring countries, and the peaceful resolution of interethnic disputes; some

ethnic Albanian groups in neighboring countries advocate for a “greater Albania,” but the idea has little appeal among Albanian nationals; the mass emigration of unemployed Albanians remains a problem for developed countries, chiefly Greece and Italy

Illicit drugs: increasingly active transshipment point for Southwest Asian opiates, hashish, and cannabis transiting the Balkan route and—to a lesser extent—cocaine from South America destined for Western Europe; limited opium and growing cannabis production; ethnic Albanian narcotrafficking organizations active and expanding in Europe; vulnerable to money laundering associated with regional trafficking in narcotics, arms, contraband, and illegal aliens

ALGERIA

INTRODUCTION

Background: After more than a century of rule by France, Algerians fought through much of the 1950s to achieve independence in 1962. Algeria's primary political party, the National Liberation Front (FLN), has dominated politics ever since. Many Algerians in the subsequent generation were not satisfied, however, and moved to counter the FLN's centrality in Algerian politics. The surprising first round success of the Islamic Salvation Front (FIS) in the December 1991 balloting spurred the Algerian army to intervene and postpone the second round of elections to prevent what the secular elite feared would be an extremist-led government from assuming power. The army began a crackdown on the FIS that spurred FIS supporters to begin attacking government targets. The government later allowed elections featuring pro-government and moderate religious-based parties, but did not appease the activists who progressively

widened their attacks. The fighting escalated into an insurgency, which saw intense fighting between 1992–98 and which resulted in over 100,000 deaths—many attributed to indiscriminate massacres of villagers by extremists. The government gained the upper hand by the late-1990s and FIS's armed wing, the Islamic Salvation Army, disbanded in January 2000. However, small numbers of armed militants persist in confronting government forces and conducting ambushes and occasional attacks on villages. The army placed Abdelaziz BOUTEFLIKA in the presidency in 1999 in a fraudulent election but claimed neutrality in his 2004 landslide reelection victory. Longstanding problems continue to face BOUTEFLIKA in his second term, including the ethnic minority Berbers' ongoing autonomy campaign, large-scale unemployment, a shortage of housing, unreliable electrical and water supplies, government inefficiencies and corruption, and the continuing—although significantly degraded—activities of extremist militants. Algeria must also diversify its petroleum-based economy, which has yielded a large cash reserve but which has not been used to redress Algeria's many social and infrastructure problems.

ECONOMY

Economy—overview: The hydrocarbons sector is the backbone of the economy, accounting for roughly 60% of budget revenues, 30% of GDP, and over 95% of export earnings. Algeria has the eighth-largest reserves of natural gas in the world and is the fourth-largest gas exporter; it ranks 18th in oil reserves. Sustained high oil prices in recent years, along with macroeconomic policy reforms supported by the IMF, have helped improve Algeria's financial and macroeconomic indicators. Algeria is running substantial trade surpluses and building up record foreign exchange reserves. Algeria has decreased its external debt to less than 10% of GDP after repaying its Paris Club and London Club debt in 2006. Real GDP has risen due to higher oil output and increased government spending. The government's continued efforts to diversify the economy by attracting foreign and domestic investment outside the energy sector, however, has had little success in reducing high unemployment and improving living standards. Structural reform within the economy, such as development of the banking sector and the construction of infrastructure, moves ahead slowly hampered by corruption and bureaucratic resistance.

TRANSNATIONAL ISSUES

Disputes—international: Algeria supports the Polisario Front exiled in Algeria and who represent the Sahrawi Arab Democratic Republic; Algeria rejects Moroccan administration of Western Sahara; most of the approximately 90,000 Western Saharan Sahrawi refugees are sheltered in camps in Tindouf, Algeria; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; Algeria remains concerned about armed bandits operating throughout the Sahel who sometimes destabilize southern Algerian towns; dormant disputes include Libyan claims of about 32,000 sq km still reflected on its maps of southeastern Algeria and the FLN's assertions of a claim to Chirac Pastures in southeastern Morocco

Refugees and internally displaced persons: *refugees (country of origin):* 90,000 (Western Saharan Sahrawi, mostly living in Algerian-sponsored camps in the southwestern Algerian town of Tindouf) *IDPs:* 400,000–600,000 (conflict between government forces, Islamic insurgents) (2006)

Trafficking in persons: *current situation:* Algeria is a transit and destination country for men, women, and children from sub-Saharan Africa and Asia trafficked for forced labor and sexual exploitation; many victims willingly migrate to Algeria en route to European countries with the help of smugglers, where they are often forced into prostitution, labor, and begging to pay off their smuggling debt; armed militants reportedly traffic women for sexual exploitation and involuntary servitude, and children may be trafficked for forced labor as domestic servants or street vendors.

tier rating: Tier 2 Watch List—Algeria took no steps to assess the scope of trafficking in the country and reported no investigations or prosecutions for trafficking offenses in 2005

AMERICAN SAMOA

INTRODUCTION

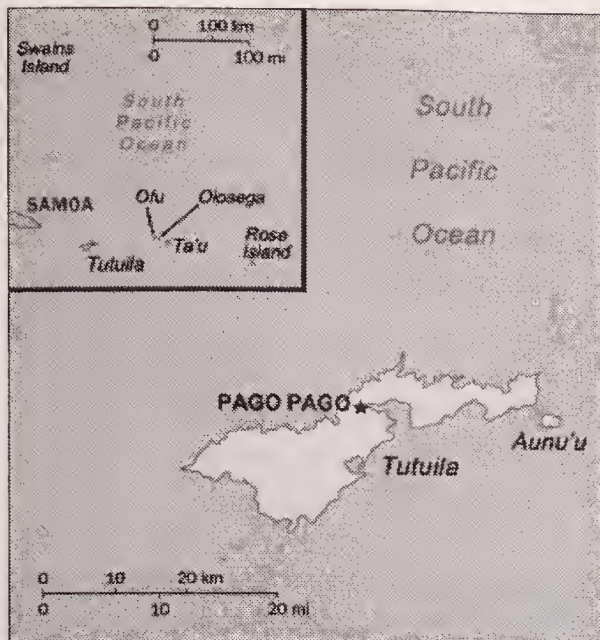

Background: Settled as early as 1000 B.C., Samoa was “discovered” by European explorers in the 18th century. International rivalries in the latter half of the 19th century were settled by an

1899 treaty in which Germany and the US divided the Samoan archipelago. The US formally occupied its portion—a smaller group of eastern islands with the excellent harbor of Pago Pago—the following year.

ECONOMY

Economy—overview: American Samoa has a traditional Polynesian economy in which more than 90% of the land is communally owned. Economic activity is strongly linked to the US with which American Samoa conducts most of its commerce. Tuna fishing and tuna processing plants are the backbone of the private sector, with canned tuna the primary export. Transfers from the US Government add substantially to American Samoa's economic well being. Attempts by the government to develop a larger and broader economy are restrained by Samoa's remote location, its limited transportation, and its devastating hurricanes. Tourism is a promising developing sector.

ANDORRA

INTRODUCTION

Background: For 715 years, from 1278 to 1993, Andorrans lived under a unique

co-principality, ruled by French and Spanish leaders (from 1607 onward, the French chief of state and the Spanish bishop of Urgel). In 1993, this feudal

system was modified with the titular heads of state retained, but the government transformed into a parliamentary democracy. Long isolated and impover-

ished, mountainous Andorra achieved considerable prosperity since World War II through its tourist industry. Many immigrants (legal and illegal) are attracted to the thriving economy with its lack of income taxes.

ECONOMY

Economy—overview: Tourism, the mainstay of Andorra's tiny, well-to-do

economy, accounts for more than 80% of GDP. An estimated 11.6 million tourists visit annually, attracted by Andorra's duty-free status and by its summer and winter resorts. Andorra's comparative advantage has recently eroded as the economies of neighboring France and Spain have been opened up, providing broader availability of goods and lower tariffs. The banking sector, with its partial "tax haven" status, also contributes substantially to the economy. Agricultural production is limited—only 2% of the land is arable—and most food has to be imported. The principal livestock activity is sheep raising. Manufacturing output consists mainly of cigarettes, cigars, and furniture. Andorra is a member of the EU Customs Union and is treated as an EU member for trade in manufactured goods (no tariffs) and as a non-EU member for agricultural products.

ANGOLA

INTRODUCTION

Background: Angola is rebuilding its country after the end of a 27-year civil war in 2002. Fighting between the Popular Movement for the Liberation of Angola (MPLA), led by Jose Eduardo DOS SANTOS, and the National Union for the Total Independence of Angola (UNITA), led by Jonas SAVIMBI, followed independence from Portugal in 1975. Peace seemed imminent in 1992 when Angola held national elections, but UNITA renewed fighting after being beaten by the MPLA at the polls. Up to 1.5 million lives may have been lost—and 4 million people displaced—in the quarter century of fighting. SAVIMBI's death in 2002 ended UNITA's insurgency and strengthened the MPLA's hold on power. While President DOS SANTOS had pledged to hold legislative elections in 2007, he has since announced that legislative elections will be held in 2008, with Presidential elections planned for 2009. A specific election timetable has yet to be established.

Administrative divisions: 18 provinces (provincias, singular—provincia); Bengo, Benguela, Bie, Cabinda, Cuando Cubango, Cuanza Norte, Cuanza Sul, Cunene, Huambo, Huila, Luanda, Lunda Norte, Lunda Sul, Malanje, Moxico, Namibe, Uige, Zaire

Independence: 11 November 1975 (from Portugal)

National holiday: Independence Day, 11 November (1975)

Constitution: adopted by People's Assembly 25 August 1992

Legal system: based on Portuguese civil law system and customary law; recently modified to accommodate political pluralism and increased use of free markets

Suffrage: 18 years of age; universal

Executive branch:

chief of state: President Jose Eduardo DOS SANTOS (since 21 September 1979); note—the president is both chief of state and head of government

head of government: President Jose Eduardo DOS SANTOS (since 21 September 1979); Fernando de Piedade Dias DOS SANTOS was appointed prime minister on 6 December 2002

cabinet: Council of Ministers appointed by the president

elections: president elected by universal ballot for a five-year term (eligible for a second consecutive or discontinuous term) under the 1992 constitution; President DOS SANTOS originally elected (in 1979) without opposition under a one-party system and stood for reelection in Angola's first multiparty elections 29–30 September 1992 (next to be held in 2009)

election results: Jose Eduardo DOS SANTOS 49.6%, Jonas SAVIMBI 40.1%, making a run-off election necessary; the run-off was not held and SAVIMBI's National Union for the Total Independence of Angola (UNITA) repudiated the results of the first election; the civil war resumed leaving DOS SANTOS in his current position as the president

Legislative branch: unicameral National Assembly or Assembleia Nacional (220 seats; members elected by proportional vote to serve four-year terms)

elections: last held 29–30 September 1992 (next to be held in September 2008)

election results: percent of vote by party—MPLA 54%, UNITA 34%, other 12%; seats by party—MPLA 129, UNITA 70, PRS 6, FNLA 5, PLD 3, other 7

Judicial branch: Supreme Court and separate provincial courts (judges are appointed by the president)

Political parties and leaders: Liberal Democratic Party or PLD [Analia de Victoria PEREIRA]; National Front for the Liberation of Angola or FNLA [Holden ROBERTO]; National Union for the Total Independence of Angola or UNITA (largest opposition party) [Isaias SAMAKUVA]; Popular Movement for the Liberation of Angola or MPLA (ruling party in power since 1975) [Jose Eduardo DOS SANTOS]; Social Renewal Party or PRS [Antonio MUACHICUNGO]

note: about a dozen minor parties participated in the 1992 elections but only won a few seats; they and the other 115 smaller parties have little influence in the National Assembly

Political pressure groups and leaders: Front for the Liberation of the Enclave of Cabinda or FLEC [N'zita Henriques TIAGO, Antonio Bento BEMBE]

note: FLEC's small-scale, highly factionalized armed struggle for the independence of Cabinda Province ended after BEMBE's faction signed a peace accord in August 2006; other factions have since demobilized under provisions of the accord, although the two main faction leaders have not acceded to the accord

ECONOMY

Economy—overview: Angola's high growth rate is driven by its oil sector, with record oil prices and rising petroleum production. Oil production and its supporting activities contribute about half of GDP and 90% of exports. Increased oil production supported 12% growth in 2004, 19% growth in 2005, and nearly 14% growth in 2006. A postwar reconstruction boom and resettlement of displaced persons has led to high rates of growth in construction and agriculture as well. Much of the country's infrastructure is still damaged or undeveloped from the 27-year-long civil war. Remnants of the conflict such as widespread land mines still mar the countryside even though an apparently durable peace was established after the death of rebel leader Jonas SAVIMBI in February 2002. Subsistence agriculture provides the main livelihood for most of the people, but half of the country's food must still be imported. In 2005, the government started using a \$2 billion line of credit from China to rebuild Angola's public infrastructure, and several large-scale projects were completed in 2006. The central bank in 2003 implemented an exchange rate stabilization program using foreign exchange reserves to buy kwanzas out of circulation. This policy became more sustainable in 2005 because of strong oil export earnings; it has significantly reduced inflation. Although consumer inflation declined from 325% in 2000 to about 13% in 2006, the stabilization policy has put pressure on international net liquidity. To fully take advantage of its rich national resources—gold, diamonds, extensive forests, Atlantic fisheries, and large oil deposits—Angola will need to implement government reforms and to reduce corruption. The government has made little progress on reforms recommended by the IMF, such as promoting

greater transparency in government spending, and continues to be without a formal monitoring agreement with the institution. Corruption, especially in the extractive sectors, is a major challenge facing Angola.

ANGUILLA

INTRODUCTION

Background: Colonized by English settlers from Saint Kitts in 1650, Anguilla was administered by Great Britain until the early 19th century, when the island—against the wishes of the inhabitants—was incorporated into a single British dependency, along with Saint Kitts and Nevis. Several attempts at separation failed. In 1971, two years after a revolt, Anguilla was finally allowed to secede; this arrangement was formally recognized in 1980, with Anguilla becoming a separate British dependency.

ECONOMY

Economy—overview: Anguilla has few natural resources, and the economy depends heavily on luxury tourism, offshore banking, lobster fishing, and remittances from emigrants. Increased activity in the tourism industry, which has spurred the growth of the construction sector, has contributed to economic growth. Anguillan officials have put substantial effort into developing the offshore financial sector, which is small, but growing. In the medium term, prospects for the economy will depend largely on the tourism sector and, therefore, on revived income growth in the industrialized nations as well as on favorable weather conditions.

ANTARCTICA

INTRODUCTION

Background: Speculation over the existence of a “southern land” was not confirmed until the early 1820s when British and American commercial operators and British and Russian national expeditions began exploring the Antarctic Peninsula region and other areas south of the Antarctic Circle. Not until 1840 was it established that Antarctica was indeed a continent and not just a group of islands. Several exploration “firsts” were achieved in the early 20th century. Following World War II, there was an upsurge in scientific research on the continent. A number of countries have set up year-round research stations on Antarctica. Seven have made territorial claims, but not all countries recognize these claims. In order to form a legal framework for the activities of nations on the continent, an Antarctic Treaty was negotiated that neither denies nor gives recognition to existing territorial claims; signed in 1959, it entered into force in 1961.

GEOGRAPHY

Location: continent mostly south of the Antarctic Circle

Geographic coordinates: 90 00 S, 0 00 E

Map references: Antarctic Region

Area:

total: 14 million sq km

land: 14 million sq km (280,000 sq km ice-free, 13.72 million sq km ice-covered) (est.)

note: fifth-largest continent, following Asia, Africa, North America, and South

America, but larger than Australia and the subcontinent of Europe

Area—comparative: slightly less than 1.5 times the size of the US

Land boundaries: 0 km

note: see entry on Disputes—international

Coastline: 17,968 km

Maritime claims: Australia, Chile, and Argentina claim Exclusive Economic Zone (EEZ) rights or similar over 200 nm extensions seaward from their continental claims, but like the claims themselves, these zones are not accepted by other countries; 21 of 28 Antarctic consultative nations have made no claims to Antarctic territory (although Russia and the US have reserved the right to do so) and do not recognize the claims of the other nations; also see the Disputes—international entry

Climate: severe low temperatures vary with latitude, elevation, and distance from the ocean; East Antarctica is colder than West Antarctica because of its higher elevation; Antarctic Peninsula has the most moderate climate; higher temperatures occur in January along the coast and average slightly below freezing

Terrain: about 98% thick continental ice sheet and 2% barren rock, with average elevations between 2,000 and 4,000 meters; mountain ranges up to nearly 5,000 meters; ice-free coastal areas include parts of southern Victoria Land, Wilkes Land, the Antarctic Peninsula area, and parts of Ross Island on McMurdo Sound; glaciers form ice shelves along about half of the coastline, and floating ice shelves constitute 11% of the area of the continent

Elevation extremes:

lowest point: Bentley Subglacial Trench - 2,555 m

highest point: Vinson Massif 4,897 m

note: the lowest known land point in Antarctica is hidden in the Bentley Subglacial Trench; at its surface is the deepest ice yet discovered and the world’s lowest elevation not under seawater

Natural resources: iron ore, chromium, copper, gold, nickel, platinum and other minerals, and coal and hydrocarbons have been found in small uncommercial quantities; none presently exploited;

krill, finfish, and crab have been taken by commercial fisheries

Land use:

arable land: 0%

permanent crops: 0%

other: 100% (ice 98%, barren rock 2%) (2005)

Natural hazards: katabatic (gravity-driven) winds blow coastward from the high interior; frequent blizzards form near the foot of the plateau; cyclonic storms form over the ocean and move clockwise along the coast; volcanism on Deception Island and isolated areas of West Antarctica; other seismic activity rare and weak; large icebergs may calve from ice shelf

Environment—current issues: in 1998, NASA satellite data showed that the Antarctic ozone hole was the largest on record, covering 27 million square kilometers; researchers in 1997 found that increased ultraviolet light passing through the hole damages the DNA of icefish, an Antarctic fish lacking hemoglobin; ozone depletion earlier was shown to harm one-celled Antarctic marine plants; in 2002, significant areas of ice shelves disintegrated in response to regional warming

Geography—note: the coldest, windiest, highest (on average), and driest continent; during summer, more solar radiation reaches the surface at the South Pole than is received at the Equator in an equivalent period; mostly uninhabitable

PEOPLE

Population: no indigenous inhabitants, but there are both permanent and summer-only staffed research stations

note: 28 nations, all signatory to the Antarctic Treaty, operate through their National Antarctic Program a number of seasonal-only (summer) and year-round research stations on the continent and its nearby islands south of 60 degrees south latitude (the region covered by the Antarctic Treaty); these stations’ population of persons doing and supporting science or engaged in the management and protection of the Antarctic region varies from approximately 4,000 in summer to 1,000 in winter; in addition, approximately 1,000 personnel, including ship’s crew and scientists doing onboard

research, are present in the waters of the treaty region; peak summer (December–February) population—3,944 total; Argentina 417, Australia 200, Brazil 40, Bulgaria 15, Chile 224, China 70, Czech Republic 20, Ecuador 26, Finland 20, France 122, Germany 78, India 65, Italy 113, Japan 125, South Korea 60, NZ 85, Norway 44, Peru 28, Poland 40, Romania 13, Russia 429, South Africa 80, Spain 28, Sweden 20, Ukraine 24, UK 205, US 1,293, Uruguay 60 (2006–2007); winter (June–August) station population—1,077 total; Argentina 176, Australia 62, Brazil 12, Chile 88, China 29, France 37, Germany 9, India 25, Italy 2, Japan 40, South Korea 15, NZ 10, Norway 7, Poland 12, Russia 148, South Africa 10, Ukraine 12, UK 37, US 337, Uruguay 9 (2006); research stations operated within the Antarctic Treaty area (south of 60 degrees south latitude) by National Antarctic Programs: year-round stations—37 total; Argentina 6, Australia 3, Brazil 1, Chile 3, China 2, France 1, Germany 1, India 1, Japan 1, South Korea 1, NZ 1, Norway 1, Poland 1, Russia 5, South Africa 1, Ukraine 1, UK 2, US 3, Uruguay 1, Italy and France jointly 1 (2005); seasonal-only (summer) stations—16 total; Bulgaria 1, Chile 1, Czech Republic 1, Ecuador 1, Finland 1, Germany 1, Italy 1, Japan 1, Norway 1, Peru 1, Romania 1, Russia 1, Spain 2, Sweden 1, UK 1 (2006–2007); in addition, during the austral summer some nations have numerous occupied locations such as tent camps, summer-long temporary facilities, and mobile traverses in support of research (July 2007 est.)

Government type: Antarctic Treaty Summary—the Antarctic Treaty, signed on 1 December 1959 and entered into force on 23 June 1961, establishes the legal framework for the management of Antarctica; the 29th Antarctic Treaty Consultative Meeting was held in Edinburgh, UK in June 2006; at these periodic meetings, decisions are made by consensus (not by vote) of all consultative member nations; at the end of 2006, there were 46 treaty member nations: 28 consultative and 18 non-consultative; consultative (decision-making) members include the seven nations that claim portions of Antarctica as national territory (some claims overlap) and 21 non-claimant nations; the US and Russia have reserved the right to make claims; the US does not recognize the claims of

others; Antarctica is administered through meetings of the consultative member nations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; the years in parentheses indicate when a consultative member-nation acceded to the Treaty and when it was accepted as a consultative member, while no date indicates the country was an original 1959 treaty signatory; claimant nations are—Argentina, Australia, Chile, France, NZ, Norway, and the UK. Nonclaimant consultative nations are—Belgium, Brazil (1975/1983), Bulgaria (1978/1998) China (1983/1985), Ecuador (1987/1990), Finland (1984/1989), Germany (1979/1981), India (1983/1983), Italy (1981/1987), Japan, South Korea (1986/1989), Netherlands (1967/1990), Peru (1981/1989), Poland (1961/1977), Russia, South Africa, Spain (1982/1988), Sweden (1984/1988), Ukraine (1992/2004), Uruguay (1980/1985), and the US; non-consultative members, with year of accession in parentheses, are—Austria (1987), Belarus (2006), Canada (1988), Colombia (1989), Cuba (1984), Czech Republic (1962/1993), Denmark (1965), Estonia (2001), Greece (1987), Guatemala (1991), Hungary (1984), North Korea (1987), Papua New Guinea (1981), Romania (1971), Slovakia (1962/1993), Switzerland (1990), Turkey (1996), and Venezuela (1999); note—Czechoslovakia acceded to the Treaty in 1962 and separated into the Czech Republic and Slovakia in 1993; Article 1—area to be used for peaceful purposes only; military activity, such as weapons testing, is prohibited, but military personnel and equipment may be used for scientific research or any other peaceful purpose; Article 2—freedom of scientific investigation and cooperation shall continue; Article 3—free exchange of information and personnel, cooperation with the UN and other international agencies; Article 4—does not recognize, dispute, or establish territorial claims and no new claims shall be asserted while the treaty is in force; Article 5—prohibits nuclear explosions or disposal of radioactive wastes; Article 6—includes under the treaty all land and ice shelves south of 60 degrees 00 minutes south and reserves high seas rights; Article 7—treaty-state observers have free access, including aerial observation, to any area and may inspect all stations, installations, and equipment; advance notice of all expeditions and of the introduction of military personnel must be given; Article

8—allows for jurisdiction over observers and scientists by their own states; Article 9—frequent consultative meetings take place among member nations; Article 10—treaty states will discourage activities by any country in Antarctica that are contrary to the treaty; Article 11—disputes to be settled peacefully by the parties concerned or, ultimately, by the ICJ; Articles 12, 13, 14—deal with upholding, interpreting, and amending the treaty among involved nations; other agreements—some 200 recommendations adopted at treaty consultative meetings and ratified by governments include—Agreed Measures for Fauna and Flora (1964) which were later incorporated into the Environmental Protocol; Convention for the Conservation of Antarctic Seals (1972); Convention on the Conservation of Antarctic Marine Living Resources (1980); a mineral resources agreement was signed in 1988 but remains unratified; the Protocol on Environmental Protection to the Antarctic Treaty was signed 4 October 1991 and entered into force 14 January 1998; this agreement provides for the protection of the Antarctic environment through six specific annexes: 1) environmental impact assessment, 2) conservation of Antarctic fauna and flora, 3) waste disposal and waste management, 4) prevention of marine pollution, 5) area protection and management and 6) liability arising from environmental emergencies; it prohibits all activities relating to mineral resources except scientific research; a permanent Antarctic Treaty Secretariat was established in 2004 in Buenos Aires, Argentina

Legal system: Antarctica is administered through meetings of the consultative member nations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; US law, including certain criminal offenses by or against US nationals, such as murder, may apply extraterritorially; some US laws directly apply to Antarctica; for example, the Antarctic Conservation Act, 16 U.S.C. section 2401 et seq., provides civil and criminal penalties for the following activities, unless authorized by regulation of statute: the taking of native mammals or birds; the introduction of nonindigenous plants and animals; entry into specially protected areas; the discharge or disposal of pollutants; and the importation into the US of certain items from Antarctica; violation of the Antarctic Conservation

Act carries penalties of up to \$10,000 in fines and one year in prison; the National Science Foundation and Department of Justice share enforcement responsibilities; Public Law 95-541, the US Antarctic Conservation Act of 1978, as amended in 1996, requires expeditions from the US to Antarctica to notify, in advance, the Office of Oceans, Room 5805, Department of State, Washington, DC 20520, which reports such plans to other nations as required by the Antarctic Treaty; for more information, contact Permit Office, Office of Polar Programs, National Science Foundation, Arlington, Virginia 22230; telephone: (703) 292-8030, or visit their website at www.nsf.gov; more generally, access to the Antarctic Treaty area, that is to all areas between 60 and 90 degrees south latitude, is subject to a number of relevant legal instruments and authorization procedures adopted by the states party to the Antarctic Treaty

ECONOMY

Economy—overview: Fishing off the coast and tourism, both based abroad, account for Antarctica's limited economic activity. Antarctic fisheries in 2004–05 (1 July–30 June) reported landing 147,000 metric tons (estimated fishing from the area covered by the Convention on the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Antarctic Treaty area). Unregulated fishing, particularly of Patagonian toothfish, is a serious problem. The CCAMLR determines the recommended catch limits for marine species. A total of 26,245 tourists visited in the 2005–06 Antarctic summer, up from the 22,712 visitors the previous year. Nearly all of them were passengers on commercial (nongovernmental) ships and several yachts that make trips during the summer. Most tourist trips last approximately two weeks.

TRANSPORTATION

Airports: 32

note: there are no developed public access airports or landing facilities; 22 stations and 10 remote field locations, operated by 12 National Antarctic Programs from nations party to the Antarctic Treaty, have restricted aircraft landing facilities comprising a total of 12 runways and 25 skiways for fixed-wing aircraft; some stations have both runways and skiways; commercial enterprises operate two aircraft landing facilities at one station; helicopter pads are available at all 37 year-round and 16 seasonal stations operated by National Antarctic Programs; the 12 runways are suitable for wheeled, fixed-wing aircraft: three are gravel, five blue-ice, two sea-ice and two compacted snow; of these, five are 3 km in length, two are between 2 km and 3 km in length, three are between 1 km and 2 km in length, one is less than 1 km in length, and one has length that varies with conditions; the 25 snow surface skiways are limited to use by ski-equipped, fixed-wing aircraft; of these, three are equal to or greater than 3 km in length, one is between 2 km and 3 km in length, 11 are between 1 km and 2 km in length, four are less than 1 km in length, and six are of unknown or variable length; snow surface skiways are generally prepared and maintained during specific periods only and during summer; all aircraft landing facilities subject to severe restrictions and limitations resulting from extreme seasonal and geographic conditions; aircraft landing facilities do not meet ICAO standards; advance approval from the respective governmental or nongovernmental operating organization required for using their facilities; landed aircraft are subject to inspection in accordance with Article 7, Antarctic Treaty; guidelines for the operation of aircraft near concentrations of birds in Antarctica were adopted in 2004; relevant legal instruments and authorization

procedures adopted by states party to the Antarctic Treaty regulating access to the Antarctic Treaty area, that is to all areas between 60 and 90 degrees of latitude South, have to be complied with (see information under "Legal System"); an Antarctic Flight Information Manual (AFIM) providing up-to-date details of Antarctic air facilities and procedures is maintained and published by the Council of Managers of National Antarctic Programs (2007)

Airports—with unpaved runways:

total: 32

over 3,047 m: 1

2,438 to 3,047 m: 8

1,524 to 2,437 m: 1

914 to 1,523 m: 12

length unknown or variable: 7 (2007)

Heliports: 53

note: all 37 year-round and 16 seasonal stations operated by National Antarctic Programs stations have restricted helicopter landing facilities (helipads) (2007)

Ports and terminals: there are no developed ports and harbors in Antarctica; most coastal stations have offshore anchorages, and supplies are transferred from ship to shore by small boats, barges, and helicopters; a few stations have a basic wharf facility; US coastal stations include McMurdo (77 51 S, 166 40 E), and Palmer (64 43 S, 64 03 W); government use only except by permit (see Permit Office under "Legal System"); all ships at port are subject to inspection in accordance with Article 7, Antarctic Treaty; offshore anchorage is sparse and intermittent; relevant legal instruments and authorization procedures adopted by the states parties to the Antarctic Treaty regulating access to the Antarctic Treaty area, to all areas between 60 and 90 degrees of latitude south, have to be complied with (see "Legal System"); The Hydrographic Committee on Antarctica (HCA), a special hydrographic commission of International Hydrographic Organization (IHO), is responsible for hydrographic surveying and nautical charting matters in Antarctic Treaty area; it coordinates and facilitates provision of accurate and appropriate charts and other aids to navigation in support of safety of navigation in region; membership of HCA is open to any IHO Member State whose government has acceded to the Antarctic Treaty and which contributes resources and/or data to IHO Chart coverage of the area; members of HCA are Argentina, Australia, Brazil, Chile, China, Ecuador, France, Germany, Greece, India, Italy,

NZ, Norway, Russia, South Africa, Spain, and the UK (2006)

MILITARY

Military—note: the Antarctic Treaty prohibits any measures of a military nature, such as the establishment of military bases and fortifications, the carrying out of military maneuvers, or the testing of any type of weapon; it permits the use

of military personnel or equipment for scientific research or for any other peaceful purposes

TRANSNATIONAL ISSUES

Disputes—international: Antarctic Treaty freezes claims (see Antarctic Treaty Summary in Government type entry); Argentina, Australia, Chile, France, NZ, Norway, and UK claim land

and maritime sectors (some overlapping) for a large portion of the continent; the US and many other states do not recognize these territorial claims and have made no claims themselves (the US and Russia reserve the right to do so); no claims have been made in the sector between 90 degrees west and 150 degrees west

ANTIGUA AND BARBUDA

INTRODUCTION

Background: The Siboney were the first to inhabit the islands of Antigua and Barbuda in 2400 B.C., but Arawak Indians populated the islands when COLUMBUS landed on his second voyage in 1493. Early settlements by the Spanish and French were succeeded by the English who formed a colony in 1667. Slavery, established to run the sugar plantations on Antigua, was abolished in 1834. The islands became an independent state within the British Commonwealth of Nations in 1981.

GEOGRAPHY

ECONOMY

Economy—overview: Tourism continues to dominate the economy, accounting for more than half of GDP. Weak tourist arrival numbers since early 2000 have slowed the economy and pressed the government into a tight fiscal corner. The dual-island nation's agricultural production is focused on the domestic market and constrained by a limited water supply and a labor shortage stemming from the lure of higher wages in tourism and construction. Manufacturing comprises enclave-type assembly for export with major products

being bedding, handicrafts, and electronic components. Prospects for economic growth in the medium term will continue to depend on income growth in the industrialized world, especially in the US, which accounts for slightly more than one-third of tourist arrivals.

ARCTIC OCEAN

INTRODUCTION

Background: The Arctic Ocean is the smallest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, Indian Ocean, and the recently delin-

ited Southern Ocean). The Northwest Passage (US and Canada) and Northern Sea Route (Norway and Russia) are two important seasonal waterways. A sparse network of air, ocean, river, and land routes circumscribes the Arctic Ocean.

GEOGRAPHY

Location: body of water between Europe, Asia, and North America, mostly north of the Arctic Circle

Geographic coordinates: 90 00 N, 0 00 E

Map references: Arctic Region

Area:

total: 14.056 million sq km

note: includes Baffin Bay, Barents Sea, Beaufort Sea, Chukchi Sea, East Siberian Sea, Greenland Sea, Hudson Bay, Hudson Strait, Kara Sea, Laptev Sea, Northwest Passage, and other tributary water bodies

Area—comparative: slightly less than 1.5 times the size of the US

Coastline: 45,389 km

Climate: polar climate characterized by persistent cold and relatively narrow annual temperature ranges; winters characterized by continuous darkness, cold and stable weather conditions, and clear skies; summers characterized by continuous daylight, damp and foggy weather, and weak cyclones with rain or snow

Terrain: central surface covered by a perennial drifting polar icepack that, on average, is about 3 meters thick, although pressure ridges may be three times that thickness; clockwise drift pattern in the Beaufort Gyral Stream, but nearly straight-line movement from the New Siberian Islands (Russia) to Denmark Strait (between Greenland and Iceland); the icepack is surrounded by open seas during the summer, but

more than doubles in size during the winter and extends to the encircling landmasses; the ocean floor is about 50% continental shelf (highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonosov Ridge)

Elevation extremes:

lowest point: Fram Basin -4,665 m

highest point: sea level 0 m

Natural resources: sand and gravel aggregates, placer deposits, polymetallic nodules, oil and gas fields, fish, marine mammals (seals and whales)

Natural hazards: ice islands occasionally break away from northern Ellesmere Island; icebergs calved from glaciers in western Greenland and extreme north-eastern Canada; permafrost in islands;

virtually ice locked from October to June; ships subject to superstructure icing from October to May

Environment—current issues: endangered marine species include walruses and whales; fragile ecosystem slow to change and slow to recover from disruptions or damage; thinning polar icepack

Geography—note: major chokepoint is the southern Chukchi Sea (northern access to the Pacific Ocean via the Bering Strait); strategic location between North America and Russia; shortest marine link between the extremes of eastern and western Russia; floating research stations operated by the US and Russia; maximum snow cover in March or April about 20 to 50 centimeters over the frozen ocean; snow cover lasts about 10 months

ECONOMY

Economy—overview: Economic activity is limited to the exploitation of natural resources, including petroleum, natural gas, fish, and seals.

TRANSPORTATION

Ports and terminals: Churchill (Canada), Murmansk (Russia), Prudhoe Bay (US)

Transportation—note: sparse network of air, ocean, river, and land routes; the Northwest Passage (North America) and Northern Sea Route (Eurasia) are important seasonal waterways

TRANSNATIONAL ISSUES

Disputes—international: some maritime disputes (see littoral states)

ARGENTINA

INTRODUCTION

Background: In 1816, the United Provinces of the Rio Plata declared their independence from Spain. Eventually, Bolivia, Paraguay, and Uruguay went their own way, but the area that remained became Argentina. The country's population and culture were subsequently heavily shaped by immi-

grants from throughout Europe, but most particularly Italy and Spain, which provided the largest percentage of newcomers from 1860 to 1930. Up until about the mid-20th century, much of Argentina's history was dominated by periods of internal political conflict between Federalists and Unitarians and between civilian and military factions. After World War II, an era of Peronist authoritarian rule and interference in subsequent governments was followed by a military junta that took power in 1976. Democracy returned in 1983, and has persisted despite numerous challenges, the most formidable of which was a severe economic crisis in 2001–02 that led to violent public protests and the resignation of several interim presidents. The economy has recovered strongly since bottoming out in 2002. The government renegotiated its public debt in 2005 and paid off its remaining obligations to the IMF in early 2006.

GEOGRAPHY

Location: Southern South America, bordering the South Atlantic Ocean, between Chile and Uruguay

Geographic coordinates: 34 00 S, 64 00 W

Maritime claims:

territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200 nm or to the edge of the continental margin

Climate: mostly temperate; arid in southeast; subantarctic in southwest

Terrain: rich plains of the Pampas in northern half, flat to rolling plateau of Patagonia in south, rugged Andes along western border

Elevation extremes:

lowest point: Laguna del Carbon -105 m (located between Puerto San Julian and Comandante Luis Piedra Buena in the province of Santa Cruz)

highest point: Cerro Aconcagua 6,960 m (located in the northwestern corner of the province of Mendoza)

Natural resources: fertile plains of the pampas, lead, zinc, tin, copper, iron ore, manganese, petroleum, uranium

Land use:

arable land: 10.03%

permanent crops: 0.36%

other: 89.61% (2005)

Irrigated land: 15,500 sq km (2003)

Natural hazards: San Miguel de Tucuman and Mendoza areas in the Andes subject to earthquakes; pamperos are violent windstorms that can strike the pampas and northeast; heavy flooding

Environment—current issues: environmental problems (urban and rural) typical of an industrializing economy such as deforestation, soil degradation, desertification, air pollution, and water pollution

note: Argentina is a world leader in setting voluntary greenhouse gas targets

Environment—international agreements:

party to: Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands, Whaling
signed, but not ratified: Marine Life Conservation

Geography—note: second-largest country in South America (after Brazil); strategic location relative to sea lanes between the South Atlantic and the South Pacific Oceans (Strait of Magellan, Beagle Channel, Drake Passage); diverse geographical landscapes range from tropical climates in the north to tundra in the far south; Cerro Aconcagua is the Western Hemisphere's tallest mountain, while Laguna del Carbon is the lowest point in the Western Hemisphere

ECONOMY

Economy—overview: Argentina benefits from rich natural resources, a highly literate population, an export-oriented agricultural sector, and a diversified industrial base. Although one of the world's wealthiest countries 100 years ago, Argentina suffered during most of the 20th century from recurring economic crises, persistent fiscal and current account deficits, high inflation, mounting external debt, and capital flight. Beginning in 1998, with external debt equivalent to more than 400% of annual exports, the economy slowed and ultimately fell into a full-blown depression; investors' fears grew in the wake of Russia's debt default, Brazil's devaluation, and the political discord caused by then-President Carlos MENEM's unpopular efforts to run for a constitutionally prohibited third term. The government of Fernando DE LA RUA, elected President in late 1999, tried several measures to cut the fiscal deficit and instill confidence and received large IMF credit facilities, but nothing worked to revive the economy. Depositors began withdrawing money from the banks in late 2001, and the government responded with strict limits on withdrawals. When street protests turned deadly, DE LA RUA was forced to resign in December 2001. Interim President Adolfo Rodriguez SAA declared a default—the largest in history—on Argentina's foreign debt, but he stepped down only a few days later when he failed to garner political support from the country's governors. Eduardo DUHALDE became President in January 2002 and announced an end to the peso's decade-long 1-to-1 peg to the US dollar. When the peso depreciated and inflation rose, DUHALDE's government froze utility tariffs, curtailed creditors' rights, and imposed high taxes on exports. The economy rebounded strongly from the crisis, inflation started falling, and DUHALDE called for special elections. Nestor KIRCHNER was elected President, taking office in May 2003, and continued the restrictions imposed by DUHALDE. With the reemergence of double-digit inflation in 2005, the KIRCHNER administration pressured

businesses into a series of agreements to hold down prices. The government also restructured its debt in 2005 and paid off its IMF obligations in early 2006, reducing Argentina's external debt burden. Real GDP growth averaged 9% during the period 2003–06, bolstering government revenues and keeping the budget in surplus.

COMMUNICATIONS

Telephones—main lines in use: 8.8 million (2005)

Telephones—mobile cellular: 22.1 million (2005)

Telephone system: *general assessment:* by opening the telecommunications market to competition and foreign investment with the “Telecommunications Liberalization Plan of 1998,” Argentina encouraged the growth of modern telecommunications technology; fiber-optic cable trunk lines are being installed between all major cities; the major networks are entirely digital and the availability of telephone service is improving; however, telephone density is presently

minimal, and making telephone service universally available will take time

domestic: microwave radio relay, fiber-optic cable, and a domestic satellite system with 40 earth stations serve the trunk network; more than 110,000 pay telephones are installed and mobile telephone use is rapidly expanding

international: country code—54; satellite earth stations—112; Atlantis II and Unisur submarine cables; 2 international gateways near Buenos Aires (2005)

Radio broadcast stations: AM 260 (includes 10 inactive stations), FM (probably more than 1,000, mostly unlicensed), shortwave 6 (1998)

Manpower available for military service: *males age 18–49:* 8,981,886

females age 18–49: 8,883,756 (2005 est.)

Manpower fit for military service:

males age 18–49: 7,316,038

females age 18–49: 7,442,589 (2005 est.)

Manpower reaching military service age annually:

males age 18–49: 344,575

females age 18–49: 334,649 (2005 est.)

Military expenditures—percent of GDP: 1.3% (2005 est.)

Military—note: the Argentine military is a well-organized force constrained by the country's prolonged economic hardship; the country has recently experienced a strong recovery, and the military is now implementing “Plan 2000,” aimed at making the ground forces lighter and more responsive (2005)

TRANSNATIONAL ISSUES

Disputes—international: Argentina continues to assert its claims to the UK-administered Falkland Islands (Islas Malvinas) and South Georgia and the South Sandwich Islands in its constitution, forcibly occupying the Falklands in 1982, but in 1995 agreed no longer to seek settlement by force; territorial claim in Antarctica partially overlaps UK and Chilean claims (see Antarctic disputes); unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics trafficking, and fundraising for extremist organizations; uncontested dispute between Brazil and Uruguay over Braziliera/Brasiliera Island in the Quarai/Cuareim River leaves the tripoint with Argentina in question; in January 2007, ICJ provisionally ruled Uruguay may begin construction of two

paper mills on the Uruguay River, which forms the border with Argentina, while the court examines further whether Argentina has the legal right to stop such construction with potential environmental implications to both countries; the joint boundary commission, established by Chile and Argentina in 2001 has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur)

Trafficking in persons: *current situation:* Argentina is primarily a destination

country for women and children trafficked for sexual and labor exploitation with most victims trafficked internally, from rural to urban areas, for exploitation in prostitution; foreign women and children trafficked for commercial sexual exploitation come primarily from Paraguay, but also from Bolivia, Brazil, the Dominican Republic, Colombia, and Chile; Bolivians are trafficked for forced labor; Argentine women and girls are also trafficked to neighboring countries for sexual exploitation

tier rating: Tier 2 Watch List—Argentina failed to show evidence of increasing efforts to combat trafficking particularly in the key area of prosecutions

Illicit drugs: used as a transshipment country for cocaine headed for Europe; some money-laundering activity, especially in the Tri-Border Area; domestic consumption of drugs in urban centers is increasing

ARMENIA

INTRODUCTION

Background: Armenia prides itself on being the first nation to formally adopt Christianity (early 4th century). Despite periods of autonomy, over the centuries Armenia came under the sway of various empires including the Roman, Byzantine, Arab, Persian, and Ottoman. During World War I in the western portion of Armenia, Ottoman Turkey instituted a policy of forced resettlement coupled with other harsh practices that resulted in an estimated 1 million Armenian deaths. The eastern area of Armenia was ceded by the Ottomans to Russia in 1828; this portion declared its independence in 1918, but was conquered by the Soviet Red Army in 1920. Armenian leaders remain preoccupied by the long conflict with Muslim Azerbaijan over Nagorno-Karabakh, a primarily Armenian-populated region, assigned to Soviet Azerbaijan in the 1920s by Moscow. Armenia and Azerbaijan began fighting over the area in 1988; the struggle escalated after both countries attained independence from the Soviet Union in 1991. By May 1994, when a cease-fire took hold, Armenian forces held not only Nagorno-Karabakh but also a significant portion of

Azerbaijan proper. The economies of both sides have been hurt by their inability to make substantial progress toward a peaceful resolution. Turkey imposed an economic blockade on Armenia and closed the common border because of the Armenian occupation of Nagorno-Karabakh and surrounding areas.

ECONOMY

Economy—overview: Under the old
Soviet central planning system, Armenia
had developed a modern industrial
sector, supplying machine tools, textiles,
and other manufactured goods to sister
republics in exchange for raw materials
and energy. Since the implosion of the
USSR in December 1991, Armenia has
switched to small-scale agriculture away
from the large agroindustrial complexes

of the Soviet era. The agricultural sector has long-term needs for more investment and updated technology. The privatization of industry has been at a slower pace, but has been given renewed emphasis by the current administration. Armenia is a food importer, and its mineral deposits (copper, gold, bauxite) are small. The ongoing conflict with Azerbaijan over the ethnic Armenian-dominated region of Nagorno-Karabakh and the breakup of the centrally directed economic system of the former Soviet Union contributed to a severe economic decline in the early 1990s. By 1994, however, the Armenian Government had launched an ambitious IMF-sponsored economic liberalization program that resulted in positive growth rates in 1995–2006. Armenia has managed to slash inflation, stabilize its currency, and privatize most small- and medium-sized enterprises. Despite strong economic growth, Armenia's unemployment rate remains high. Nuclear power plants built at Metsamor eliminated the chronic energy shortages Armenia suffered in the early and mid-1990s, but those plants are under international pressure to close. Armenia is now a net energy exporter, although it does not have sufficient generating capacity to replace Metsamor. Construction of a natural gas pipeline between Iran and Armenia has been completed and it is scheduled to be commissioned by April 2007. Economic ties with Russia remain close, especially in the energy sector. The electricity distribution system was privatized in 2002 and bought by Russia's RAO-UES in 2005. Armenia's severe trade imbalance has been offset somewhat by international aid, remittances from Armenians working abroad, and foreign direct investment. Armenia joined the WTO in January 2003. The government made some improvements in tax and customs administration in 2005, but anti-corruption measures will be more difficult to implement. Investment in the construction and industrial sectors is expected to continue in 2007 and will help to ensure annual average real GDP growth of more than 10%.

TRANSNATIONAL ISSUES

Disputes—international: Armenia supports ethnic Armenian secessionists in Nagorno-Karabakh and since the early 1990s, has militarily occupied 16% of Azerbaijan—Organization for Security and Cooperation in Europe (OSCE) continues to mediate dispute; over 800,000 mostly ethnic Azerbaijanis were driven from the occupied lands and Armenia; about 230,000 ethnic Armenians were driven from their homes in Azerbaijan into Armenia; Azerbaijan seeks transit route through Armenia to connect to Naxcivan exclave; border with Turkey remains closed

over Nagorno-Karabakh dispute; ethnic Armenian groups in Javakheti region of Georgia seek greater autonomy; Armenians continue to emigrate, primarily to Russia, seeking employment

Refugees and internally displaced persons:

refugees (country of origin): 219,324 (Azerbaijan)

IDPs: 8,400 (conflict with Azerbaijan over Nagorno-Karabakh, majority have returned home since 1994 ceasefire) (2006)

Trafficking in persons: *current situation:* Armenia is a major source and, to a lesser extent, a transit and destination country for women and girls trafficked for sexual exploitation largely to the UAE and Turkey; traffickers, many of them women, route victims directly into Dubai or through Moscow; profits derived from the trafficking of Armenian victims reportedly have increased

tier rating: Tier 2 Watch List—Armenia has failed to show evidence of increasing efforts, particularly in the areas of enforcement, trafficking-related corruption, and victim protection

Illicit drugs: illicit cultivation of small amount of cannabis for domestic consumption; minor transit point for illicit drugs—mostly opium and hashish—moving from Southwest Asia to Russia and to a lesser extent the rest of Europe

ARUBA

INTRODUCTION

Background: Discovered and claimed for Spain in 1499, Aruba was acquired by the Dutch in 1636. The island's economy has been dominated by three main industries. A 19th century gold rush was followed by prosperity brought on by the opening in 1924 of an oil refinery. The last decades of the 20th century saw a boom in the tourism industry. Aruba

seceded from the Netherlands Antilles in 1986 and became a separate, autonomous member of the Kingdom of the Netherlands. Movement toward full independence was halted at Aruba's request in 1990.

ECONOMY

Economy—overview: Tourism is the mainstay of the small, open Aruban economy, with offshore banking and oil refining and storage also important. The rapid growth of the tourism sector over the last decade has resulted in a substantial expansion of other activities. Over 1.5 million tourists per year visit Aruba, with 75% of those from the US. Construction continues to boom, with hotel capacity five times the 1985 level. In addition, the country's oil refinery reopened in 1993, providing a major source of employment, foreign exchange earnings, and growth. Tourist arrivals have rebounded strongly following a dip after the 11 September 2001 attacks. The island experiences only a brief low season, and hotel occupancy in 2004 averaged 80%, compared to 68% throughout the rest of the Caribbean. The government has made cutting the budget and trade deficits a high priority.

Background: These uninhabited islands came under Australian authority in 1931; formal administration began two years later. Ashmore Reef supports a rich and diverse avian and marine habitat; in 1983, it became a National Nature Reserve. Cartier Island, a former bombing range, is now a marine reserve.

ATLANTIC OCEAN

INTRODUCTION

Background: The Atlantic Ocean is the second largest of the world's five oceans (after the Pacific Ocean, but larger than the Indian Ocean, Southern Ocean, and Arctic Ocean). The Kiel Canal (Germany), Oresund (Denmark-Sweden), Bosphorus (Turkey), Strait of Gibraltar (Morocco-Spain), and the Saint Lawrence Seaway (Canada-US) are important strategic access waterways. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth world ocean, the Southern Ocean, removed the portion of the Atlantic Ocean south of 60 degrees south latitude.

GEOGRAPHY

Location: body of water between Africa, Europe, the Southern Ocean, and the Western Hemisphere

Geographic coordinates: 0 00 N, 25 00 W

Map references: Political Map of the World

Area:

total: 76.762 million sq km

note: includes Baltic Sea, Black Sea, Caribbean Sea, Davis Strait, Denmark Strait, part of the Drake Passage, Gulf of Mexico, Labrador Sea, Mediterranean Sea, North Sea, Norwegian Sea, almost all of the Scotia Sea, and other tributary water bodies

Area—comparative: slightly less than 6.5 times the size of the US

Coastline: 111,866 km

Climate: tropical cyclones (hurricanes) develop off the coast of Africa near Cape Verde and move westward into the Caribbean Sea; hurricanes can occur from May to December, but are most frequent from August to November

Terrain: surface usually covered with sea ice in Labrador Sea, Denmark Strait, and coastal portions of the Baltic Sea from October to June; clockwise warm-water gyre (broad, circular system of currents) in the northern Atlantic, counterclockwise warm-water gyre in the southern Atlantic; the ocean floor is dominated by the Mid-Atlantic Ridge, a rugged north-south centerline for the entire Atlantic basin

Elevation extremes:

lowest point: Milwaukee Deep in the Puerto Rico Trench -8,605 m

highest point: sea level 0 m

Natural resources: oil and gas fields, fish, marine mammals (seals and whales), sand and gravel aggregates, placer deposits, polymetallic nodules, precious stones

Natural hazards: icebergs common in Davis Strait, Denmark Strait, and the northwestern Atlantic Ocean from February to August and have been spotted as far south as Bermuda and the Madeira Islands; ships subject to superstructure icing in extreme northern Atlantic from October to May; persistent fog can be a maritime hazard from May to September; hurricanes (May to December)

Environment—current issues: endangered marine species include the manatee, seals, sea lions, turtles, and whales; drift net fishing is hastening the decline of fish stocks and contributing to international disputes; municipal sludge pollution off eastern US, southern Brazil, and eastern Argentina; oil pollution in Caribbean Sea, Gulf of Mexico, Lake Maracaibo, Mediterranean Sea, and North Sea; industrial waste and municipal sewage pollution in Baltic Sea, North Sea, and Mediterranean Sea

Geography—note: major chokepoints include the Dardanelles, Strait of Gibraltar, access to the Panama and Suez Canals; strategic straits include the Strait of Dover, Straits of Florida, Mona Passage, The Sound (Oresund), and Windward Passage; the Equator divides

the Atlantic Ocean into the North Atlantic Ocean and South Atlantic Ocean

ECONOMY

Economy—overview: The Atlantic Ocean provides some of the world's most heavily trafficked sea routes, between and within the Eastern and Western Hemispheres. Other economic activity includes the exploitation of natural resources, e.g., fishing, dredging of aragonite sands (The Bahamas), and production of crude oil and natural gas (Caribbean Sea, Gulf of Mexico, and North Sea).

TRANSPORTATION

Ports and terminals: Alexandria (Egypt), Algiers (Algeria), Antwerp (Belgium), Barcelona (Spain), Buenos Aires (Argentina), Casablanca (Morocco), Colon (Panama), Copenhagen (Denmark), Dakar (Senegal), Gdansk (Poland), Hamburg (Germany), Helsinki (Finland), Las Palmas (Canary Islands, Spain), Le Havre (France), Lisbon (Portugal), London (UK), Marseille (France), Montevideo (Uruguay), Montreal (Canada), Naples (Italy), New Orleans (US), New York (US), Oran (Algeria), Oslo (Norway),

Peiraiefs or Piraeus (Greece), Rio de Janeiro (Brazil), Rotterdam (Netherlands), Saint Petersburg (Russia), Stockholm (Sweden)

Transportation—note: Kiel Canal and Saint Lawrence Seaway are two important waterways; significant domestic commercial and recreational use of Intracoastal Waterway on central and south Atlantic seaboard and Gulf of Mexico coast of US

TRANSNATIONAL ISSUES

Disputes—international: some maritime disputes (see littoral states)

permanent crops: 0.04%

other: 93.81% (2005)

Irrigated land: 25,450 sq km (2003)

Natural hazards: cyclones along the coast; severe droughts; forest fires

Environment—current issues: soil erosion from overgrazing, industrial devel-

opment, urbanization, and poor farming practices; soil salinity rising due to the use of poor quality water; desertification; clearing for agricultural purposes threatens the natural habitat of many unique animal and plant species; the Great Barrier Reef off the northeast coast, the largest coral reef in the world, is threatened by increased shipping and its popularity as a tourist site; limited natural fresh water resources

INTRODUCTION

Background: Aboriginal settlers arrived on the continent from Southeast Asia about 40,000 years before the first Europeans began exploration in the 17th century. No formal territorial claims were made until 1770, when Capt. James COOK took possession in the name of Great Britain. Six colonies were created in the late 18th and 19th centuries; they federated and became the Commonwealth of Australia in 1901. The new country took advantage of its natural resources to rapidly develop agricultural and manufacturing industries and to make a major contribution to the British effort in World Wars I and II. In recent decades, Australia has transformed itself into an internationally competitive, advanced market economy. It boasted one of the OECD's fastest growing economies during the 1990s, a performance due in large part to economic reforms adopted in the 1980s. Long-term concerns include pollution, particularly depletion of the ozone layer, and management and conservation of coastal areas, especially the Great Barrier Reef.

ECONOMY

Economy—overview: Australia has an enviable Western-style capitalist economy with a per capita GDP on par with the four dominant West European economies. Robust business and consumer confidence and high export prices for raw materials and agricultural products are fueling the economy. Australia's emphasis on reforms, low inflation, and growing ties with China are other key factors behind the economy's strength. Drought and strong import demand pushed the trade deficit up in recent years, although the trade balance improved in 2006. Housing prices probably peaked in 2005, diminishing the prospect that interest rates would be raised to prevent a speculative bubble. Conservative fiscal policies have kept Australia's budget in surplus since 2002.

AUSTRIA**INTRODUCTION**

Background: Once the center of power for the large Austro-Hungarian Empire, Austria was reduced to a small republic after its defeat in World War I. Following annexation by Nazi Germany in 1938 and subsequent occupation by the victorious Allies in 1945, Austria's status remained unclear for a decade. A State Treaty signed in 1955 ended the occupation, recognized Austria's independence, and forbade unification with Germany. A constitutional law that same year

declared the country's "perpetual neutrality" as a condition for Soviet military withdrawal. The Soviet Union's collapse in 1991 and Austria's entry into the European Union in 1995 have altered the meaning of this neutrality. A prosperous, democratic country, Austria entered the EU Economic Monetary Union in 1999.

ECONOMY

Economy—overview: Austria, with its well-developed market economy and high standard of living, is closely tied to other EU economies, especially Germany's. The Austrian economy also benefits greatly from strong commercial relations, especially in the banking and insurance sectors, with central, eastern, and southeastern Europe. The economy features a large service sector, a sound industrial sector, and a small, but highly developed agricultural sector. Membership in the EU has drawn an influx of foreign investors attracted by Austria's access to the single European market and proximity to the new EU economies. The outgoing government has success-

fully pursued a comprehensive economic reform program, aimed at streamlining government and creating a more competitive business environment, further strengthening Austria's attractiveness as an investment location. It has implemented effective pension reforms; however, lower taxes in 2005–06 led to a small budget deficit in 2006. Weak domestic consumption and slow growth in Europe held the economy to growth rates below 3% in 2002–05. Due to higher growth across Europe, Austria grew 3.3 percent in 2006. To meet increased competition—especially from new EU members and Central European countries—Austria will need to continue restructuring, emphasizing knowledge-based sectors of the economy, and encouraging greater labor flexibility and greater labor participation by its aging population.

AZERBAIJAN

INTRODUCTION

Background: Azerbaijan—a nation with a Turkic and majority-Muslim population—was briefly independent from 1918 to 1920; it regained its independence after the collapse of the Soviet Union in 1991. Despite a 1994 cease-

fire, Azerbaijan has yet to resolve its conflict with Armenia over the Azerbaijani Nagorno-Karabakh enclave (largely Armenian populated). Azerbaijan has lost 16% of its territory and must support some 600,000 internally displaced persons as a result of the conflict. Corruption is ubiquitous, and the promise of widespread wealth from Azerbaijan's undeveloped petroleum resources remains largely unfulfilled.

Climate: dry, semiarid steppe

Terrain: large, flat Kur-Araz Ovalıgı (Kura-Araks Lowland) (much of it below sea level) with Great Caucasus Mountains

to the north, Qarabag Yaylasi (Karabakh Upland) in west; Baku lies on Abseron Yasaqligi (Apsheon Peninsula) that juts into Caspian Sea

Elevation extremes:

lowest point: Caspian Sea -28 m

highest point: Bazarduzu Dagi 4,485 m

Natural resources: petroleum, natural gas, iron ore, nonferrous metals, bauxite

permanent crops: 2.61%

other: 76.77% (2005)

Irrigated land: 14,550 sq km (2003)

Natural hazards: droughts

Environment—current issues: local scientists consider the Abseron Yasaqligi (Apsheon Peninsula) (including Baku and Sumqayit) and the Caspian Sea to be the ecologically most devastated area in the world because of severe air, soil, and water pollution; soil pollution results from oil spills, from the use of DDT pesticide, and from toxic defoliants used in the production of cotton

Environment—international agreements:

party to: Air Pollution, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Hazardous Wastes, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands

signed, but not ratified: none of the selected agreements

Geography—note: both the main area of the country and the Naxcivan exclave are landlocked

ECONOMY

Economy—overview: Azerbaijan’s number one export is oil. Azerbaijan’s oil production declined through 1997, but has registered an increase every year since. Negotiation of production-sharing arrangements (PSAs) with foreign firms, which have committed \$60 billion to long-term oilfield development, should generate the funds needed to spur future industrial development. Oil production under the first of these PSAs, with the Azerbaijan International Operating Company, began in November 1997. A consortium of Western oil companies began pumping 1 million barrels a day from a large offshore field in early 2006, through a \$4 billion pipeline it built from Baku to Turkey’s Mediterranean port of Ceyhan. By 2010 revenues from this project will double the country’s current GDP. Azerbaijan shares all the formidable problems of the former Soviet republics in making the transition from a command to a market economy, but its considerable energy resources brighten its long-term prospects. Baku has only recently begun making progress on economic reform, and old economic ties and structures are slowly being replaced. Several other obstacles impede Azerbaijan’s economic progress: the need for stepped up foreign investment in the non-energy sector, the continuing conflict with Armenia over the Nagorno-Karabakh region, and the pervasive corruption. Trade with Russia and the other former Soviet republics is declining in importance, while trade is building with Turkey and the nations of Europe. Long-term prospects will depend on world oil prices, the location of new pipelines in the region, and Azerbaijan’s ability to manage its oil wealth.

BAHAMAS, THE

INTRODUCTION

Background: Lucayan Indians inhabited the islands when Christopher Columbus first set foot in the New World on San Salvador in 1492. British settlement of the islands began in 1647; the islands became a colony in 1783. Since attaining independence from the UK in 1973, The Bahamas have prospered through tourism and international banking and investment management. Because of its geography, the country is a major transshipment point for illegal drugs, particularly shipments to the US and Europe, and its territory is used for smuggling illegal migrants into the US.

ECONOMY

Economy—overview: The Bahamas is a stable, developing nation with an economy heavily dependent on tourism and offshore banking. Tourism together with tourism-driven construction and manufacturing accounts for approximately 60% of GDP and directly or indirectly employs half of the archipelago's labor force. Steady growth in tourism receipts and a boom in construction of new hotels, resorts, and residences had led to solid GDP growth in recent years, but the slowdown in the US economy and the attacks of 11 September 2001 held back growth in these sectors in 2001–03. The current government has presided over a period of economic recovery and an upturn in large-scale private sector investments in tourism. Financial services constitute the second-most important sector of the Bahamian economy, accounting for about 15% of GDP. However, since December 2000, when the government enacted new regulations on the financial sector, many international businesses have left The Bahamas. Manufacturing and agriculture together contribute approximately a tenth of GDP and show little growth, despite government incentives aimed at those sectors. Overall growth prospects in the short run rest heavily on the fortunes of the tourism sector, which depends on growth in the US, the source of more than 80% of the visitors.

BAHRAIN

INTRODUCTION

Background: In 1782, the Al Khalifa family captured Bahrain from the Persians. In order to secure these holdings, it entered into a series of treaties with the UK during the 19th century that made Bahrain a British protectorate. The archipelago attained its independence in 1971. Bahrain's small size and central location among Persian Gulf countries require it to

play a delicate balancing act in foreign affairs among its larger neighbors. Facing declining oil reserves, Bahrain has turned to petroleum processing and refining and has transformed itself into an international banking center. King HAMAD bin Isa Al Khalifa, after coming to power in 1999, pushed economic and political reforms to improve relations with the Shi'a community and Shi'a political societies participated in 2006 parliamentary and municipal elections. Al Wifaq, the largest Shi'a political society, won the largest number of seats in the elected chamber of the legislature. However, Shi'a discontent has resurfaced in recent years with street demonstrations and occasional low-level violence.

ECONOMY

Economy—overview: With its highly developed communication and transport facilities, Bahrain is home to numerous multinational firms with business in the Gulf. Petroleum production and refining account for over 60% of Bahrain's export receipts, over 70% of government revenues, and 11% of GDP (exclusive of allied industries), underpinning Bahrain's strong economic growth in recent years. Other major segments of Bahrain's economy are the financial and construction sectors. Bahrain is actively pursuing the diversification and privatization of its economy to reduce the country's dependence on oil. As part of this effort, in August 2006 Bahrain and the US implemented a Free Trade Agreement (FTA), the first FTA between the US and a Gulf state. Unemployment, especially among the young, and the depletion of oil and underground water resources are major long-term economic problems.

Bahrain is a destination country for men and women from South and Southeast Asia who migrate willingly to work as laborers or domestic servants, but may be subjected to conditions of involuntary servitude when faced with exorbitant recruitment and transportation fees, withholding of their passports, restric-

tions on their movement, non-payment of wages, and physical or sexual abuse; Eastern European women are also believed to be trafficked to Bahrain for the purpose of commercial sexual exploitation or forced labor
tier rating: Tier 2 Watch List—Bahrain's efforts to address trafficking in persons are based largely on pledges of future efforts; the government did not enact a comprehensive anti-trafficking law extending labor protection to domestic workers

BANGLADESH**INTRODUCTION**

Background: Europeans began to set up trading posts in the area of Bangladesh in the 16th century; eventually the British came to dominate the region and it became part of British India. In 1947, West Pakistan and East Bengal (both primarily Muslim) separated from India (largely Hindu) and jointly became the new country of Pakistan. East Bengal became East Pakistan in 1955, but the awkward arrangement of a two-part country with its territorial units separated by 1,600 km left the Bengalis marginalized and dissatisfied. East Pakistan seceded from its union with West Pakistan in 1971 and was renamed Bangladesh. About a third of this extremely poor country floods annually during the monsoon rainy season, hampering economic development.

GEOGRAPHY

ECONOMY

Economy—overview: Despite sustained domestic and international efforts to improve economic and demographic prospects, Bangladesh remains a poor, overpopulated, and inefficiently-governed nation. Although more than half of GDP is generated through the service sector, nearly two-thirds of Bangladeshis are employed in the agriculture sector, with rice as the single-most-important product. Major impediments to growth include frequent cyclones and floods, inefficient state-owned enterprises, inadequate port facilities, a rapidly growing labor force that cannot be absorbed by agriculture, delays in exploiting energy

resources (natural gas), insufficient power supplies, and slow implementation of economic reforms. Reform is stalled in many instances by political infighting and corruption at all levels of government. Opposition from the bureaucracy, public sector unions, and other vested interest groups also have blocked progress. The BNP government, led by Prime Minister Khaleda ZIA, has the parliamentary strength to push through needed reforms, but the party's political will to do so has been lacking in key areas. On an encouraging note, growth has been a steady 5–6% for the past several years.

BARBADOS

INTRODUCTION

Background: The island was uninhabited when first settled by the British in 1627. Slaves worked the sugar plantations established on the island until 1834 when slavery was abolished. The economy remained heavily dependent on sugar, rum, and molasses production through most of the 20th century. The gradual introduction of social and political reforms in the 1940s and 1950s led to complete independence from the UK in 1966. In the 1990s, tourism and manufacturing surpassed the sugar industry in economic importance.

ECONOMY

Economy—overview: Historically, the Barbadian economy had been dependent on sugarcane cultivation and related activities, but production in recent years has diversified into light industry and tourism. Offshore finance and information services are important foreign exchange earners. The government con-

tinues its efforts to reduce unemployment, to encourage direct foreign investment, and to privatize remaining state-owned enterprises. The economy contracted in 2002–03 mainly due to a decline in tourism. Growth was positive in 2005–06, as economic conditions in the US and Europe moderately improved.

MILITARY

Military branches: Royal Barbados Defense Force: Troops Command, Barbados Coast Guard (2007)
Military service age and obligation: 18 years of age for voluntary military service; volunteers at earlier age with parental consent; no conscription (2001)
Manpower available for military service:
males age 18–49: 71,524
females age 18–49: 72,302 (2005 est.)
Manpower fit for military service:
males age 18–49: 54,510

females age 18–49: 54,889 (2005 est.)
Military expenditures—percent of GDP: 0.5% (2006 est.)
Military—note: the Royal Barbados Defense Force includes a land-based Troop Command and a small Coast Guard; the primary role of the land element is to defend the island against external aggression; the Command consists of a single, part-time battalion with a small regular cadre that is deployed throughout the island; it increasingly supports the police in patrolling the coastline to prevent smuggling and other illicit activities (2005)

TRANSNATIONAL ISSUES

Disputes—international: in April 2006, the Permanent Court of Arbitration issued a decision that delimited a maritime boundary with Trinidad and Tobago and compelled Barbados to enter a fishing agreement limiting Barbadian fishermen's catches of flying fish in Trinidad and Tobago's exclusive economic zone; in 2005, Barbados and Trinidad and Tobago agreed to compulsory international arbitration under UNCLOS challenging whether the northern limit of Trinidad and Tobago's and Venezuela's maritime boundary extends into Barbadian waters; joins other Caribbean states to counter Venezuela's claim that Aves Island sustains human habitation, a criterion under the UN Convention on the Law of the Sea (UNCLOS), which permits Venezuela to extend its EEZ/continental shelf over a large portion of the eastern Caribbean Sea
Illicit drugs: one of many Caribbean transshipment points for narcotics bound for Europe and the US; offshore financial center

BELARUS

INTRODUCTION

Background: After seven decades as a constituent republic of the USSR, Belarus attained its independence in 1991. It has retained closer political and economic ties to Russia than any of the other former Soviet republics. Belarus and Russia signed a treaty on a two-state union on 8 December 1999 envisioning greater political and economic integration. Although Belarus agreed to a framework to carry out the accord, serious implementation has yet to take place. Since his election in July 1994 as

the country's first president, Alexandr LUKASHENKO has steadily consolidated his power through authoritarian means. Government restrictions on freedom of speech and the press, peaceful assembly, and religion continue.

ECONOMY

Economy—overview: Belarus's economy in 2006 posted more than 8% growth. Trade with Russia—by far its largest single trade partner—decreased in 2006, largely as a result of a change in the way the Value Added Tax (VAT) on trade was collected. Trade with European countries increased. Belarus has seen little structural reform since 1995, when President LUKASHENKO launched the country on the path of "market socialism." In keeping with this policy, LUKASHENKO reimposed administrative controls over prices and currency exchange rates and expanded the state's right to intervene in the management of private enterprises. Since 2005, the government has re-nationalized a number of private companies. In addition, businesses have been subject to pressure by central and local governments, e.g., arbi-

trary changes in regulations, numerous rigorous inspections, retroactive application of new business regulations, and arrests of "disruptive" businessmen and factory owners. A wide range of redistributive policies has helped those at the bottom of the ladder; the Gini coefficient is among the lowest in the world. Because of these restrictive economic policies, Belarus has had trouble attracting foreign investment, which remains low. Growth has been strong in recent years, despite the roadblocks in a tough, centrally directed economy with a high, but decreasing, rate of inflation. Belarus receives heavily discounted oil and natural gas from Russia and much of Belarus' growth can be attributed to the re-export of Russian oil at market prices. This growth will be threatened in 2007, however, when Russia raises energy prices closer to world market prices for Belarus. Russia is planning to increase Belarusian gas prices from \$47 per thousand cubic meters (tcm) to \$100 per tcm for 2007, gradually increasing to world prices by 2011. Russia has also introduced an export duty on oil shipped to Belarus, which will increase gradually through 2009, and a requirement that Belarusian duties on re-exported Russian oil be shared with Russia—70% will go to Russia in 2007, 80% in 2008, and 85% in 2009.

TRANSNATIONAL ISSUES

Disputes—international: as of January 2007, ground demarcations of the boundaries with Latvia and Lithuania were complete and mapped with final ratification documentation in preparation; 1997 boundary delimitation treaty with Ukraine remains unratified over unresolved financial claims, preventing demarcation and diminishing border security

Illicit drugs: limited cultivation of opium poppy and cannabis, mostly for the domestic market; transshipment point for illicit drugs to and via Russia, and to the Baltics and Western Europe; a small and lightly regulated financial center; new anti-money-laundering legislation does not meet international standards; few investigations or prosecutions of money-laundering activities

BELGIUM

INTRODUCTION

Background: Belgium became independent from the Netherlands in 1830; it was occupied by Germany during World Wars I and II. The country prospered in the past half century as a modern, technologically advanced European state and member of NATO and the EU. Tensions between the Dutch-speaking Flemings of the north and the French-speaking Walloons of the south have led in recent years to constitutional amendments granting these regions formal recognition and autonomy.

ECONOMY

Economy—overview: This modern, private-enterprise economy has capitalized on its central geographic location, highly developed transport network, and diversified industrial and commercial base. Industry is concentrated mainly in the populous Flemish area in the north.

With few natural resources, Belgium must import substantial quantities of raw materials and export a large volume of manufactures, making its economy unusually dependent on the state of world markets. Roughly three-quarters of its trade is with other EU countries. Public debt is more than 90% of GDP. On the positive side, the government has succeeded in balancing its budget, and income distribution is relatively equal. Belgium began circulating the euro currency in January 2002. Economic growth in 2001–03 dropped sharply because of the global economic slowdown, with moderate recovery in 2004–06.

Illicit drugs: growing producer of synthetic drugs and cannabis; transit point for US-bound ecstasy; source of precursor chemicals for South American cocaine processors; transshipment point for cocaine, heroin, hashish, and marijuana entering Western Europe; despite a strengthening of legislation, the country remains vulnerable to money laundering related to narcotics, automobiles, alcohol, and tobacco; significant domestic consumption of ecstasy

BELIZE

INTRODUCTION

Background: Belize was the site of several Mayan city states until their decline at the end of the first millennium A.D. The British and Spanish disputed the region in the 17th and 18th centuries; it formally became the colony of British Honduras in 1854. Territorial disputes between the UK and Guatemala delayed the independence of Belize until 1981. Guatemala refused to recognize the new nation until 1992. Tourism has become the mainstay of the economy. Current concerns include an unsustainable foreign debt, high unemployment, growing involvement in the South American drug trade, growing urban crime, and increasing incidences of HIV/AIDS.

ECONOMY

Economy—overview: In this small, essentially private-enterprise economy tourism is the number one foreign exchange earner followed by exports of marine products, citrus, cane sugar, bananas, and garments. The government's expansionary monetary and fiscal policies, initiated in September 1998, led to sturdy GDP growth averaging nearly 4% in 1999–2006. Major concerns continue to be the sizable trade deficit and unsustainable foreign debt. The government in 2006 announced it would seek a restructuring of its sovereign debt and has been negotiating with international creditors to find an acceptable formula for doing so. A key short-term objective remains the reduction of poverty with the help of international donors.

TRANSNATIONAL ISSUES

Disputes—international: annual ministerial meetings under the OAS-initiated Agreement on the Framework for Negotiations and Confidence Building Measures continue to address Guatemalan land and maritime claims in Belize and Caribbean Sea; the Line of Adjacency created under the 2002 Differendum serves in lieu of the contiguous international boundary to control squatting in the sparsely inhabited rain forests of Belize's border region; Honduras claims Belizean-administered Sapodilla Cays in its constitution but agreed to a joint ecological park under the Differendum

Trafficking in persons: *current situation:* Belize is a source, transit, and destination country for men, women, and children trafficked for the purposes of labor and sexual exploitation; women and girls are trafficked mainly from Central America, and exploited in prostitution; children are trafficked to Belize for labor exploitation; Belize's largely unmonitored borders with Guatemala, Honduras, and Mexico facilitate the movement of illegal migrants who are vulnerable to traffickers; girls are trafficked within the country for sexual exploitation, sometimes with the consent and complicity of their close relatives; there are unconfirmed reports that Indian and Chinese migrants are trafficked for involuntary servitude in homes and shops

tier rating: Tier 3—Belize has failed to show evidence of significant law enforcement or victim protection efforts

Illicit drugs: transshipment point for cocaine; small-scale illicit producer of cannabis, primarily for local consumption; money-laundering activity related to narcotics trafficking and offshore sector

BENIN

INTRODUCTION

Background: Present day Benin was the site of Dahomey, a prominent West African kingdom that rose in the 15th century. The territory became a French Colony in 1872 and achieved independence on 1 August 1960, as the Republic of Benin. A succession of military governments ended in 1972 with the rise to power of Mathieu KEREKOU and the establishment of a government based on Marxist-Leninist principles. A move to representative government began in 1989. Two years later, free elections ushered in former Prime Minister Nicephore SOGLO as president, marking the first successful transfer of power in Africa from a dictatorship to a democracy. KEREKOU was returned to power by elections held in 1996 and 2001, though some irregularities were alleged. KEREKOU stepped down at the end of his second term in 2006 and was succeeded by Thomas YAYI Boni, a political outsider and independent.

ECONOMY

Economy—overview: The economy of Benin remains underdeveloped and dependent on subsistence agriculture, cotton production, and regional trade. Growth in real output has averaged around 5% in the past six years, but rapid population growth has offset much of this increase. Inflation has subsided over the past several years. In order to raise growth still further, Benin plans to attract more foreign investment, place more emphasis on tourism, facilitate the development of new food processing systems and agricultural products, and encourage new information and communication technology. Specific projects to improve the business climate by reforms to the land tenure system, the commercial justice system, and the financial sector were included in Benin's \$307 million Millennium Challenge Account grant signed in February 2006. The 2001 privatization policy continues in telecommunications, water, electricity, and agriculture in spite of government reluctance. The Paris Club and bilateral creditors have eased the external debt situation, with Benin benefiting from a G8 debt reduction announced in July 2005, while pressing for more rapid structural reforms. Benin continues to be hurt by Nigerian trade protection that bans imports of a growing list of products from Benin and elsewhere, which has resulted in increased smuggling and criminality in the border region.

BERMUDA

INTRODUCTION

Background: Bermuda was first settled in 1609 by shipwrecked English colonists headed for Virginia. Tourism to the island to escape North American winters first developed in Victorian times. Tourism continues to be important to the island's economy, although international business has overtaken it in recent years. Bermuda has developed into a highly

successful offshore financial center. Although a referendum on independence from the UK was soundly defeated in 1995, the present government has reopened debate on the issue.

ECONOMY

Economy—overview: Bermuda enjoys the highest per capita income in the world, more than 50% higher than that of the US. Its economy is primarily based on providing financial services for international business and luxury facilities for tourists. A number of reinsurance companies relocated to the island following the 11 September 2001 attacks and again after Hurricane Katrina in August 2005, contributing to the expansion of an already robust international business sector. Bermuda's tourism industry—which derives over 80% of its visitors from the US—continues to struggle but remains the island's number two industry. Most capital equipment and food must be imported. Bermuda's industrial sector is small, although construction continues to be important; the average cost of a house in June 2003 had risen to \$976,000. Agriculture is limited with only 20% of the land being arable.

BHUTAN

INTRODUCTION

Background: In 1865, Britain and Bhutan signed the Treaty of Sinchulu, under which Bhutan would receive an annual subsidy in exchange for ceding some border land to British India. Under British influence, a monarchy was set up in 1907; three years later, a treaty was signed whereby the British agreed not to interfere in Bhutanese internal affairs and Bhutan allowed Britain to direct its foreign affairs. This role was assumed by independent India after 1947. Two years later, a formal Indo-Bhutanese accord returned the areas of Bhutan annexed by the British, formalized the annual subsidies the country received, and defined India's responsibilities in defense and foreign relations. A refugee issue of some 100,000 Bhutanese in Nepal remains unresolved; 90% of the refugees are housed in seven United Nations Office of the High Commissioner for Refugees (UNHCR) camps. In March 2005, King Jigme Singye WANGCHUCK unveiled the government's draft constitution—which would introduce major democratic reforms—and pledged to hold a national referendum for its approval. A referendum date has yet to be named, but should occur in 2008. In December 2006, the King abdicated the throne to his son, Jigme Khesar Namgyel WANGCHUCK, in order to give him experience as head of state before the democratic transition.

ECONOMY

Economy—overview: The economy, one of the world's smallest and least developed, is based on agriculture and forestry, which provide the main livelihood for more than 60% of the population. Agriculture consists largely of subsistence farming and animal husbandry. Rugged mountains dominate the terrain and make the building of roads and other infrastructure difficult and expensive. The economy is closely aligned with India's through strong trade and monetary links and dependence on India's financial assistance. The industrial sector is technologically backward, with most production of the cottage industry type. Most development projects, such as road construction, rely on Indian migrant labor. Bhutan's hydropower potential and its attraction for tourists are key resources. Model education, social, and environment programs are underway with support from multilateral development organizations. Each economic program takes into account the government's desire to protect the country's environment and cultural traditions. For example, the government, in its cautious expansion of the tourist sector, encourages visits by upscale, environmentally conscientious tourists. Detailed controls and uncertain policies in areas such as industrial licensing, trade, labor, and finance continue to hamper foreign investment.

BOLIVIA

INTRODUCTION

Background: Bolivia, named after independence fighter Simon BOLIVAR, broke away from Spanish rule in 1825; much of its subsequent history has consisted of a series of nearly 200 coups and counter coups. Democratic civilian rule was established in 1982, but leaders have faced difficult problems of deep-seated poverty, social unrest, and illegal drug

production. In December 2005, Bolivians elected Movement Toward Socialism leader Evo MORALES president—by the widest margin of any leader since the restoration of civilian rule in 1982—after he ran on a promise to change the country's traditional political class and empower the nation's poor majority. However, since taking office, his controversial strategies have exacerbated racial and economic tensions between the Amerindian populations of the Andean west and the non-indigenous communities of the eastern lowlands.

ECONOMY

Economy—overview: Bolivia, long one of the poorest and least developed Latin American countries, reformed its economy after suffering a disastrous economic crisis in the early 1980s. The reforms spurred real GDP growth, which averaged 4% in the 1990s, and poverty rates fell. Economic growth, however, lagged again beginning in 1999 because of a global slowdown and homegrown factors such as political turmoil, civil unrest, and soaring fiscal deficits, all of which hurt investor confidence. In 2003, violent protests against the pro-foreign investment economic policies of ex-President SANCHEZ DE LOZADA led to his resignation and the cancellation of plans to export Bolivia's newly discovered natural gas reserves to large northern hemisphere markets. In 2005, the government passed a controversial natural gas law that imposed significantly higher taxes on the oil and gas firms and required production firms to sign new operating contracts, which were completed in October 2006. Bolivian officials are in the process of revamping the defunct state-owned oil company and acquiring majority ownership of five gas production, transportation, refining, and storage companies. The MORALES administration plans to increase state control over other sectors as well, including mining, electricity, telecommunications, transportation, and forestry.

Real GDP growth in 2003–06—helped by increased demand for natural gas in neighboring Brazil—was positive, but still below the levels seen during the 1990s. Bolivia's fiscal position has improved in recent years, and the country had a record 6% fiscal surplus for 2006. In 2005, the G8 announced a \$2 billion debt-forgiveness plan over the next few decades. The International Monetary Fund and the World Bank forgave a total of approximately \$1.8 billion of Bolivian debt in 2006 that has helped reduce fiscal pressures on the government.

TRANSNATIONAL ISSUES

Disputes—international: Chile rebuffs Bolivia's reactivated claim to restore the Atacama corridor, ceded to Chile in 1884, offering instead unrestricted but not sovereign maritime access through Chile for Bolivian natural gas and other commodities

Trafficking in persons: *current situation:* Bolivia is a source and transit country for men, women, and children trafficked for the purposes of labor and sexual exploitation to Argentina, Brazil, and Chile, as well as to Spain; children are trafficked internally for sexual exploitation, forced mining, and agricultural labor; illegal migrants from Asia transiting Bolivia are vulnerable as trafficking victims

tier rating: Tier 2 Watch List—Bolivia has failed to show evidence of increasing efforts to combat trafficking in the areas of prosecutions and victim protection

Illicit drugs: world's third-largest cultivator of coca (after Colombia and Peru) with an estimated 26,500 hectares under cultivation in August 2005, an 8% increase from 2004; transit country for Peruvian and Colombian cocaine destined for Brazil, Argentina, Chile, Paraguay, and Europe; cultivation steadily increasing despite eradication and alternative crop programs; money-laundering activity related to narcotics trade, especially along the borders with Brazil and Paraguay; major cocaine consumption

BOSNIA AND HERZEGOVINA

INTRODUCTION

Background: Bosnia and Herzegovina's declaration of sovereignty in October

1991 was followed by a declaration of independence from the former Yugoslavia on 3 March 1992 after a referendum boycotted by ethnic Serbs. The Bosnian Serbs—supported by neighboring Serbia and Montenegro—responded with armed resistance aimed at partitioning the republic along ethnic lines and joining Serb-held areas to form a "Greater Serbia." In March 1994, Bosniaks and Croats reduced the number of warring factions from three to two by signing an agreement creating a joint Bosniak/Croat Federation of Bosnia and Herzegovina. On 21 November 1995, in Dayton, Ohio, the warring parties initialed a peace agreement that brought to a halt three years of interethnic civil strife (the final agreement was signed in Paris on 14 December 1995). The

Dayton Peace Accords retained Bosnia and Herzegovina's international boundaries and created a joint multi-ethnic and democratic government charged with conducting foreign, diplomatic, and fiscal policy. Also recognized was a second tier of government comprised of two entities roughly equal in size: the Bosniak/Croat Federation of Bosnia and Herzegovina and the Bosnian Serb-led Republika Srpska (RS). The Federation and RS governments were charged with overseeing most government functions. The Office of the High Representative (OHR) was established to oversee the implementation of the civilian aspects of the agreement. In 1995–96, a NATO-led international peacekeeping force (IFOR) of 60,000 troops served in Bosnia to implement and monitor the military

aspects of the agreement. IFOR was succeeded by a smaller, NATO-led Stabilization Force (SFOR) whose mission was to deter renewed hostilities. European Union peacekeeping troops (EUFOR) replaced SFOR in December 2004; their mission is to maintain peace and stability throughout the country. EUFOR plans to phase out its mission beginning in 2007.

ECONOMY

Economy—overview: Bosnia and Herzegovina ranked next to Macedonia as the poorest republic in the old Yugoslav federation. Although agriculture is almost all in private hands, farms are small and inefficient, and the republic traditionally is a net importer of

food. The private sector is growing and foreign investment is slowly increasing, but government spending, at nearly 40% of adjusted GDP, remains unreasonably high. The interethnic warfare in Bosnia caused production to plummet by 80% from 1992 to 1995 and unemployment to soar. With an uneasy peace in place, output recovered in 1996–99 at high percentage rates from a low base; but output growth slowed in 2000–02. Part of the lag in output was made up in 2003–06 when GDP growth exceeded 5% per year. National-level statistics are limited and do not capture the large share of black market activity. The konvertibilna marka (convertible mark or BAM)—the national currency introduced in 1998—is pegged to the euro, and confidence in the currency and the banking sector has increased. Implementing privatization, however, has been slow, particularly in the Federation, although it is increasing in the Republika Srpska. Banking reform accelerated in 2001 as all the Communist-era payments bureaus were shut down; foreign banks, primarily from Western Europe, now control most of the banking sector. A sizeable current account deficit and high unemployment rate remain the two most serious economic problems. On 1 January 2006 a new value-added tax (VAT) went into effect. The VAT has been successful in capturing much of the gray market economy and has developed into a significant and predictable source of revenues for all layers of government. The question of how to allocate revenue from VAT receipts is not completely resolved. Bosnia and Herzegovina became a member of the Central European Free Trade Agreement in December 2006. The country receives substantial reconstruction assistance and humanitarian aid from the international community but will have to prepare for an era of declining assistance.

Illicit drugs: increasingly a transit point for heroin being trafficked to Western Europe; minor transit point for marijuana; remains highly vulnerable to money-laundering activity given a primarily cash-based and unregulated economy, weak law enforcement, and instances of corruption

BOTSWANA

INTRODUCTION

Background: Formerly the British protectorate of Bechuanaland, Botswana adopted its new name upon independence in 1966. Four decades of uninterrupted civilian leadership, progressive social policies, and significant capital investment have created one of the most dynamic economies in Africa. Mineral extraction, principally diamond mining, dominates economic activity, though tourism is a growing sector due to the country's conservation practices and extensive nature preserves. Botswana has one of the world's highest known rates of HIV/AIDS infection, but also one of Africa's most progressive and comprehensive programs for dealing with the disease.

ECONOMY

Economy—overview: Botswana has
maintained one of the world's highest

economic growth rates since independence in 1966, though growth slowed to 4.7% in 2006. Through fiscal discipline and sound management, Botswana has transformed itself from one of the poorest countries in the world to a middle-income country with a per capita GDP of more than \$11,000 in 2006. Two major investment services rank Botswana as the best credit risk in Africa. Diamond mining has fueled much of the expansion and currently accounts for more than one-third of GDP and for 70–80% of export earnings. Tourism, financial services, subsistence farming, and cattle raising are other key sectors. On the downside, the government must deal with high rates of unemployment and poverty. Unemployment officially was 23.8% in 2004, but unofficial estimates place it closer to 40%. HIV/AIDS infection rates are the second highest in the world and threaten Botswana's impressive economic gains. An expected leveling off in diamond mining production overshadows long-term prospects.

TRANSNATIONAL ISSUES

Disputes—international: the alignment of the boundary with Namibia in the Kwando/Linyanti/Chobe River, including the Situngu marshlands, was resolved amicably in 2003; concerns from international experts and local populations

over the ecology of the Okavango Delta in Botswana and human displacement scuttled Namibian plans to construct a hydroelectric dam at Popavalle (Popa Falls) along the Angola-Namibia border; Botswana has built electric fences to stem the thousands of Zimbabweans who flee to find work and escape political per-

secution; Namibia has long supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing the short, but not clearly delimited, Botswana-Zambia boundary

BOUVET ISLAND

INTRODUCTION

Background: This uninhabited volcanic island is almost entirely covered by glaciers and is difficult to approach. It was discovered in 1739 by a French naval officer after whom the island was named. No claim was made until 1825, when the British flag was raised. In 1928, the UK waived its claim in favor of Norway, which had occupied the island the previous year. In 1971, Norway designated Bouvet Island and the adjacent territorial waters a nature reserve. Since 1977, it has run an automated meteorological station on the island.

BRAZIL

INTRODUCTION

Background: Following three centuries under the rule of Portugal, Brazil became an independent nation in 1822 and a republic in 1889. By far the largest and most populous country in South America, Brazil overcame more than half a century of military intervention in the governance of the country when in 1985 the military regime peacefully ceded power to civilian rulers. Brazil continues to pursue industrial and agricultural growth and development of its interior.

Exploiting vast natural resources and a large labor pool, it is today South America's leading economic power and a regional leader. Highly unequal income distribution remains a pressing problem.

GEOGRAPHY

Location: Eastern South America, bordering the Atlantic Ocean

Geographic coordinates: 10 00 S, 55 00 W

Map references: South America

Area:

total: 8,511,965 sq km

land: 8,456,510 sq km

water: 55,455 sq km

note: includes Arquipelago de Fernando de Noronha, Atol das Rocas, Ilha da Trindade, Ilhas Martin Vaz, and Penedos de Sao Pedro e Sao Paulo

Area—comparative: slightly smaller than the US

Land boundaries:

total: 16,885 km

border countries: Argentina 1,261 km, Bolivia 3,423 km, Colombia 1,644 km, French Guiana 730.4 km, Guyana 1,606 km, Paraguay 1,365 km, Peru 2,995 km,

Suriname 593 km, Uruguay 1,068 km, Venezuela 2,200 km

Coastline: 7,491 km

Maritime claims:

territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200 nm or to edge of the continental margin

Climate: mostly tropical, but temperate in south

Terrain: mostly flat to rolling lowlands in north; some plains, hills, mountains, and narrow coastal belt

Elevation extremes:

lowest point: Atlantic Ocean 0 m

highest point: Pico da Neblina 3,014 m

Natural resources: bauxite, gold, iron ore, manganese, nickel, phosphates, platinum, tin, uranium, petroleum, hydro-power, timber

ECONOMY

Economy—overview: Characterized by large and well-developed agricultural, mining, manufacturing, and service sectors, Brazil's economy outweighs that of all other South American countries and is expanding its presence in world markets. From 2001–03 real wages fell and Brazil's economy grew, on average only 2.2% per year, as the country absorbed a series of domestic and international economic shocks. That Brazil absorbed these shocks without financial collapse is a tribute to the resiliency of the Brazilian economy and the economic program put in place by former President CARDOSO and strengthened by President LULA DA SILVA. Since 2004, Brazil has enjoyed continued growth that yielded increases in employment and real wages. The three pillars of the economic program are a floating exchange rate, an inflation-targeting regime, and tight fiscal policy, initially reinforced by a series of IMF programs. The currency depreciated sharply in 2001 and 2002, which contributed to a dramatic current account adjustment; from 2003 to 2006, Brazil ran record trade surpluses and recorded its first current account surpluses since 1992. Productivity gains—particularly in agriculture—also contributed to the surge in exports. While economic management has been good, there remain important economic vulnerabilities. The most significant are debt-related: the government's largely domestic debt increased steadily from 1994 to 2003—straining government finances—before falling as a percentage of GDP beginning in 2003. Brazil improved its debt profile in 2006 by shifting its debt burden toward real denominated and domestically held instruments. LULA DA SILVA restated

his commitment to fiscal responsibility by maintaining the country's primary surplus during the 2006 election. Following his second inauguration, LULA DA SILVA announced a package of further economic reforms to reduce taxes and increase public investment. A major challenge will be to maintain sufficient growth to generate employment and reduce the government debt burden.

TRANSNATIONAL ISSUES

Disputes—international: unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics trafficking, and fundraising for extremist organizations; uncontested dispute with Uruguay over certain islands in the Quarai/Cuareim and Invernada boundary streams and the resulting tri-point with Argentina

Trafficking in persons: *current situation:* Brazil is a source and destination country for women and girls trafficked for sexual exploitation within Brazil and to destinations in South America, the Caribbean, Western Europe, Japan, the US, and the Middle East, and for men trafficked within the country for forced agricultural labor; child sex tourism is a problem within the country, particularly in the resort areas and coastal cities of Brazil’s northeast; foreign victims from

Bolivia, Peru, China, and Korea are trafficked to Brazil for labor exploitation in factories

tier rating: Tier 2 Watch List—Brazil has failed to show evidence of increasing efforts to fight trafficking, specifically for its failure to apply effective criminal penalties against traffickers who exploit forced labor

Illicit drugs: illicit producer of cannabis; trace amounts of coca cultivation in the Amazon region, used for domestic consumption; government has a large-scale eradication program to control cannabis; important transshipment country for Bolivian, Colombian, and Peruvian cocaine headed for Europe; also used by traffickers as a way station for narcotics air transshipments between Peru and Colombia; upsurge in drug-related violence and weapons smuggling; important market for Colombian, Bolivian, and Peruvian cocaine; illicit narcotics proceeds earned in Brazil are often laundered through the financial system; significant illicit financial activity in the Tri-Border Area

BRITISH INDIAN OCEAN TERRITORY**INTRODUCTION**

Background: Established as a territory of the UK in 1965, a number of the British Indian Ocean Territory (BIOT) islands were transferred to the Seychelles when it attained independence in 1976. Subsequently, BIOT has consisted only of the six main island groups comprising the Chagos Archipelago. The largest and most southerly of the islands, Diego Garcia, contains a joint UK-US naval support facility. All of the remaining islands are uninhabited. Former agricultural workers, earlier residents in the

islands, were relocated primarily to Mauritius but also to the Seychelles, between 1967 and 1973. In 2000, a British High Court ruling invalidated the local immigration order that had excluded them from the archipelago, but upheld the special military status of Diego Garcia.

GEOGRAPHY

Location: archipelago in the Indian Ocean, south of India, about one-half the way from Africa to Indonesia

Geography—note: archipelago of 55 islands; Diego Garcia, largest and southernmost island, occupies strategic location in central Indian Ocean; island is site of joint US-UK military facility

PEOPLE

Population: no indigenous inhabitants

note: approximately 1,200 former agricultural workers resident in the Chagos Archipelago, often referred to as Chagossians or Ilois, were relocated to Mauritius and the Seychelles in the 1960s and 1970s; in November 2000 they were granted the right of return by a British High Court ruling, though no

timetable has been set; in November 2004, there were approximately 4,000 UK and US military personnel and civilian contractors living on the island of Diego Garcia

ECONOMY

Economy—overview: All economic activity is concentrated on the largest island of Diego Garcia, where a joint UK-US military facility is located. Construction projects and various services needed to support the military installation are performed by military and contract employees from the UK, Mauritius, the Philippines, and the US. There are no industrial or agricultural activities on the islands. When the native Ilois return, they plan to reestablish sugarcane production and fishing. The territory makes money by selling fishing licenses and postage stamps.

TRANSNATIONAL ISSUES

Disputes—international: Mauritius and Seychelles claim the Chagos Archipelago including Diego Garcia; in 2001, the former inhabitants of the Chagos Archipelago, evicted in 1967 and 1973 and now residing chiefly in Mauritius, were granted UK citizenship and the right to repatriation; in May 2006, the High Court of London reversed U.K. Government's 2004 orders of council that banned habitation on the islands; a small group of Chagossians visited Diego Garcia in April 2006; repatriation is complicated by the exclusive US military lease of Diego Garcia that restricts access to the largest viable island in the chain

BRITISH VIRGIN ISLANDS

INTRODUCTION

Background: First inhabited by Arawak and later by Carib Indians, the Virgin Islands were settled by the Dutch in 1648

and then annexed by the English in 1672. The islands were part of the British colony of the Leeward Islands from 1872–1960; they were granted autonomy in 1967. The economy is closely tied to the larger and more populous US Virgin Islands to the west; the US dollar is the legal currency.

ECONOMY

Economy—overview: The economy, one of the most stable and prosperous in the Caribbean, is highly dependent on tourism, generating an estimated 45% of the national income. An estimated 820,000 tourists, mainly from the US, visited the islands in 2005. In the mid-1980s, the government began offering offshore registration to companies wishing to incorporate in the islands, and incorporation fees now generate substantial revenues. Roughly 400,000 companies were on the offshore registry by yearend 2000. The adoption of a comprehensive insurance law in late 1994, which provides a blanket of confidentiality with regulated statutory gateways for investigation of criminal offenses, made the British Virgin Islands even more attractive to international business. Livestock raising is the most important agricultural activity; poor soils limit the islands' ability to meet domestic food requirements. Because of traditionally close links with the US Virgin Islands, the British Virgin Islands has used the US dollar as its currency since 1959.

BRUNEI

INTRODUCTION

Background: The Sultanate of Brunei's influence peaked between the 15th and

17th centuries when its control extended over coastal areas of northwest Borneo and the southern Philippines. Brunei subsequently entered a period of decline brought on by internal strife over royal succession, colonial expansion of European powers, and piracy. In 1888, Brunei became a British protectorate; independence was achieved in 1984. The same family has ruled Brunei for over six centuries. Brunei benefits from extensive petroleum and natural gas fields, the source of one of the highest per capita GDPs in Asia.

ECONOMY

Economy—overview: Brunei has a small well-to-do economy that encompasses a mixture of foreign and domestic entrepreneurship, government regulation, welfare measures, and village tradition. Crude oil and natural gas production account for just over half of GDP and more than 90% of exports. Per capita GDP is among the highest in Asia, and substantial income from overseas investment supplements income from domestic production. The government provides for all medical services and free education through the university level and subsidizes rice and housing. Brunei's leaders are concerned that steadily increased integration in the world economy will undermine internal social cohesion. Plans for the future include upgrading the labor force, reducing unemployment, strengthening the banking and tourist sectors, and, in general, further widening the economic base beyond oil and gas.

TRANSNATIONAL ISSUES

Disputes—international: Brunei and Malaysia are still considering international adjudication over their disputed offshore and deepwater seabeds, where hydrocarbon exploration was terminated in 2003 international legal adjudication; Malaysia's land boundary with Brunei around Limbang is in dispute; Brunei established an exclusive economic fishing zone encompassing Louisa Reef

in the southern Spratly Islands in 1984, but makes no public territorial claim to the offshore reefs; the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions in the Spratly Islands but falls short of a legally binding "code of conduct" desired by several of the disputants

Illicit drugs: drug trafficking and illegally importing controlled substances are serious offenses in Brunei and carry a mandatory death penalty

BULGARIA

INTRODUCTION

Background: The Bulgars, a Central Asian Turkic tribe, merged with the local Slavic inhabitants in the late 7th century to form the first Bulgarian state. In succeeding centuries, Bulgaria struggled with the Byzantine Empire to assert its place in the Balkans, but by the end of the 14th century the country was overrun by the Ottoman Turks. Northern Bulgaria attained autonomy in 1878 and all of Bulgaria became independent from the Ottoman Empire in 1908. Having fought on the losing side in both World Wars, Bulgaria fell within the Soviet sphere of influence and became a People's Republic in 1946. Communist domination ended in 1990, when Bulgaria held its first multiparty election since World War II and began the contentious process of moving toward political democracy and a market economy while combating inflation, unemployment, corruption, and crime. The country joined NATO in 2004 and the EU in 2007.

ECONOMY

Economy—overview: Bulgaria, a former communist country that entered the EU

on 1 January 2007, has experienced macroeconomic stability and strong growth since a major economic downturn in 1996 led to the fall of the then socialist government. As a result, the government became committed to economic reform and responsible fiscal planning. Minerals, including coal, copper, and zinc, play an important role in industry. In 1997, macroeconomic stability was reinforced by the imposition of a fixed exchange rate of the lev against the German D-mark—the currency is now fixed against the euro—and the negotiation of an IMF standby agreement. Low inflation and steady progress on structural reforms improved the business environment; Bulgaria has averaged 5.1% growth since 2000 and has begun to attract significant amounts of foreign direct investment. Corruption in the public administration, a weak judiciary, and the presence of organized crime remain the largest challenges for Bulgaria.

BURKINA FASO

INTRODUCTION

Background: Burkina Faso (formerly Upper Volta) achieved independence from France in 1960. Repeated military coups during the 1970s and 1980s were followed by multiparty elections in the early 1990s. Current President Blaise COMPAORE came to power in a 1987 military coup and has won every election since then. Burkina Faso's high population density and limited natural resources result in poor economic prospects for the majority of its citizens. Recent unrest in Côte d'Ivoire and northern Ghana has hindered the ability of several hundred thousand seasonal Burkinabe farm workers to find employment in neighboring countries.

ECONOMY

Economy—overview: One of the poorest countries in the world, landlocked Burkina Faso has few natural resources and a weak industrial base. About 90% of the population is engaged in subsistence agriculture, which is vulnerable to periodic drought. Cotton is the main cash crop and the government has joined with three other cotton producing countries in the region—Mali, Niger, and Chad—to lobby for improved access to Western markets. GDP growth has largely been driven by increases in world cotton prices. Industry remains dominated by unprofitable government-controlled corporations. Following the CFA franc currency devaluation in January 1994, the government updated its development program in conjunction with international agencies; exports and economic growth have increased. The government devolved macroeconomic policy and inflation targeting to the West African regional central bank (BCEAO), but maintains control over fiscal and microeconomic policies, including implementing reforms to encourage private investment. The bitter internal crisis in neighboring Cote d'Ivoire continues to hurt trade and industrial prospects and deepens the need for international assistance. Burkina Faso is eligible for a Millennium Challenge Account grant, which would increase investment in the country's human capital.

TRANSNATIONAL ISSUES

Disputes—international: two villages remain in dispute along the border with Benin; Benin accuses Burkina Faso of

moving boundary pillars; in recent years citizens and rogue security forces rob and harass local populations on both sides of the poorly-defined Burkina Faso-Niger border; despite the presence of over 9,000

UN forces (UNOCI) in Cote d'Ivoire since 2004, ethnic conflict continues to spread into neighboring states who can no longer send their migrant workers to work in Ivorian cocoa plantations

BURMA

INTRODUCTION

Background: Britain conquered Burma over a period of 62 years (1824–1886) and incorporated it into its Indian Empire. Burma was administered as a province of India until 1937 when it became a separate, self-governing colony; independence from the Commonwealth was attained in 1948. Gen. NE WIN dominated the government from 1962 to 1988, first as military ruler, then as self-appointed president, and later as political kingpin. Despite multiparty legislative elections in 1990 that resulted in the main opposition party—the National League for Democracy (NLD)—winning a landslide victory, the ruling junta refused to hand over power. NLD leader and Nobel Peace Prize recipient AUNG SAN SUU KYI, who was under house arrest from 1989 to 1995 and 2000 to 2002, was imprisoned in May 2003 and subsequently transferred to house arrest,

where she remains virtually incommunicado. In February 2006, the junta extended her detention for another year. Her supporters, as well as all those who promote democracy and improved human rights, are routinely harassed or jailed.

ECONOMY

Economy—overview: Burma, a resource-rich country, suffers from pervasive government controls, inefficient economic policies, and rural poverty. The junta took steps in the early 1990s to liberalize the economy after decades of failure under the "Burmese Way to Socialism," but those efforts stalled, and

some of the liberalization measures were rescinded. Lacking monetary or fiscal stability, the economy suffers from serious macroeconomic imbalances—including rising inflation, fiscal deficits, multiple official exchange rates that overvalue the Burmese kyat, a distorted interest rate regime, unreliable statistics, and an inability to reconcile national accounts to determine a realistic GDP figure. Most overseas development assistance ceased after the junta began to suppress the democracy movement in 1988 and subsequently refused to honor the results of the 1990 legislative elections. In response to the government of Burma's attack in May 2003 on AUNG SAN SUU KYI and her convoy, the US imposed new economic sanctions in August 2003 against Burma—including a ban on imports of Burmese products and a ban on provision of financial services by US persons. Further, a poor investment climate hampers attracting outside investment slowing the inflow of foreign exchange. The most productive sectors will continue to be in extractive industries, especially oil and gas, mining, and timber with the latter especially causing environmental degradation. Other areas, such as manufacturing and services, are struggling with inadequate infrastructure, unpredictable import/export policies, deteriorating health and education systems, and endemic corruption. A major banking crisis in 2003 shuttered the country's 20 private banks and disrupted the economy. As of 2006, the largest private banks operate under tight restrictions limiting the private sector's access to formal credit. Official statistics are inaccurate. Published statistics on foreign trade are greatly understated because of the size of the black market and unofficial border trade—often estimated to be as large as the official economy. Though the Burmese government has good economic relations with its neighbors, better investment and business climates and an improved political situation are needed to promote serious foreign investment, exports, and tourism.

TRANSNATIONAL ISSUES

Disputes—international: over half of Burma's population consists of diverse ethnic groups who have substantial numbers of kin in neighboring countries; Thailand must deal with Karen and other ethnic rebels, illegal cross-border activities, Karen and other refugees, and asylum seekers from Burma; Thailand is studying the feasibility of jointly constructing the Hatgyi Dam on the Salween River near the border with Burma; in 2004, international environmentalist pressure prompted China to halt construction of 13 dams on the Salween River which flows through China, Burma, and Thailand; India seeks cooperation from Burma to keep Indian Nagaland separatists, such as the United Liberation Front of Assam, from hiding in remote Burmese Uplands; Burmese Rohingya Muslim refugees reside in two camps in Bangladesh

Refugees and internally displaced persons: IDPs: 540,000 (government offensives against ethnic insurgent groups near the eastern borders; most IDPs are ethnic Karen, Karenni, Shan, Tavoyan, and Mon) (2006)

Trafficking in persons: *current situation:* Burma is a source country for men, women, and children trafficked to East

and Southeast Asia for sexual exploitation, domestic service, and forced commercial labor; a significant number of victims are economic migrants who wind up in forced or bonded labor and forced prostitution; to a lesser extent, Burma is a country of transit and destination for women trafficked from China for sexual exploitation; internal trafficking of persons occurs primarily for labor in industrial zones and agricultural estates; internal trafficking of women and girls for sexual exploitation occurs from villages to urban centers and other areas; the military junta's economic mismanagement, human rights abuses, and policy of using forced labor are driving factors behind Burma's large trafficking problem

tier rating: Tier 3—Burma does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so

Illicit drugs: remains world's second largest producer of illicit opium with an estimated production in 2005 of 380 metric tons, up 13% from 2004 and cultivation in 2005 was 40,000 hectares, a 10% increase from 2004; the decline in opium production in the United Wa State Army's areas of greatest control was more than offset by increases in south and east Shan state; lack of government will to take on major narcotrafficking groups and lack of serious commitment against money laundering continues to hinder the overall antidrug effort; major source of methamphetamine and heroin for regional consumption; currently under Financial Action Task Force countermeasures due to continued failure to address its inadequate money-laundering controls (2005)

BURUNDI

INTRODUCTION

Background: Burundi's first democratically elected president was assassinated in October 1993 after only 100 days in office, triggering widespread ethnic violence between Hutu and Tutsi factions. More than 200,000 Burundians perished during the conflict that spanned almost a dozen years. Hundreds of thousands of Burundians were internally displaced or became refugees in neighboring countries. An internationally brokered power-sharing agreement between the Tutsi-dominated government and the

Hutu rebels in 2003 paved the way for a transition process that led to an integrated defense force, established a new constitution in 2005, and elected a majority Hutu government in 2005. The new government, led by President Pierre NKURUNZIZA, signed a South African brokered ceasefire with the country's last rebel group in September of 2006 but still faces many challenges.

ECONOMY

Economy—overview: Burundi is a landlocked, resource-poor country with an underdeveloped manufacturing sector. The economy is predominantly agricultural with more than 90% of the population dependent on subsistence agriculture. Economic growth depends on coffee and tea exports, which account for 90% of foreign exchange earnings. The ability to pay for imports, therefore, rests primarily on weather conditions and international coffee and tea prices. The Tutsi minority, 14% of the population, dominates the government and the coffee trade at the expense of the Hutu majority, 85% of the population. An ethnic-based war that lasted for over a decade resulted in more than 200,000 deaths, forced more than 48,000 refugees into Tanzania, and displaced 140,000 others internally. Only one in two children go to school, and approximately one in 15 adults has HIV/AIDS. Food, medicine, and electricity remain in short supply. Political stability and the end of the civil war have improved aid flows and economic activity has increased, but underlying weaknesses—a high poverty rate, poor education rates, a weak legal system, and low administrative capacity—risk undermining planned economic reforms. Burundi grew about 5 percent in 2006. Delayed disbursements of funds from the World Bank may add to budget pressures in 2007. Burundi will continue to remain heavily dependent

on aid from bilateral and multilateral donors.

CAMBODIA

INTRODUCTION

Background: Most Cambodians consider themselves to be Khmers, descendants of the Angkor Empire that extended over much of Southeast Asia and reached its zenith between the 10th and 13th centuries. Attacks by the Thai and Cham (from present-day Vietnam) weakened the empire ushering in a long period of decline. The king placed the country under French protection in 1863. Cambodia became part of French Indochina in 1887. Following Japanese occupation in World War II, Cambodia gained full independence from France in 1953. In April 1975, after a five-year struggle, Communist Khmer Rouge forces captured Phnom Penh and evacuated all cities and towns. At least 1.5 million Cambodians died from execution, forced hardships, or starvation during the Khmer Rouge regime under POL POT. A December 1978 Vietnamese invasion drove the Khmer Rouge into the countryside, began a 10-year Vietnamese occupation, and touched off almost 13 years of civil war. The 1991 Paris Peace Accords mandated democratic elections and a ceasefire, which was not fully respected by the Khmer Rouge. UN-sponsored elections in 1993 helped restore some semblance of normalcy under a coalition government. Factional fighting in 1997 ended the first coalition government, but a second round of national elections in 1998 led to the formation of another coalition government and renewed political stability. The remaining elements of the Khmer Rouge surrendered in early 1999. Some of the remaining Khmer Rouge leaders are awaiting trial by a UN-sponsored tribunal for crimes against humanity. Elections in July 2003 were relatively peaceful, but it took one year of negotiations between contending

political parties before a coalition government was formed.

ECONOMY

Economy—overview: In 1999, the first full year of peace in 30 years, the government made progress on economic reforms. The US and Cambodia signed a Bilateral Textile Agreement, which gave Cambodia a guaranteed quota of US textile imports and established a bonus for improving working conditions and enforcing Cambodian labor laws and international labor standards in the industry. From 2001 to 2004, the economy grew at an average rate of 6.4%, driven largely by an expansion in the garment sector and tourism. With the January 2005 expiration of a WTO Agreement on Textiles and Clothing, Cambodia-based textile producers were forced to compete directly with lower-priced producing countries such as China and India. Better-than-expected garment sector performance led to more than 13% growth in 2006. Faced with the possibility that its vibrant garment industry, with more than 200,000 jobs, could be in serious danger, the Cambodian government has committed itself to a policy of continued support for

high labor standards in an attempt to maintain favor with buyers. The tourism industry continues to grow rapidly, with foreign visitors surpassing 1 million per year beginning in 2005. In 2005, exploitable oil and natural gas deposits were found beneath Cambodia's territorial waters, representing a new revenue stream for the government once commercial extraction begins in the coming years. Mining also is attracting significant investor interest, particularly in the northeastern parts of the country. The long-term development of the economy remains a daunting challenge. The Cambodian government is working with bilateral and multilateral donors, including the World Bank and IMF, to address the country's many pressing needs. The major economic challenge for Cambodia over the next decade will be fashioning an economic environment in which the private sector can create enough jobs to handle Cambodia's demographic imbalance. More than 50% of the population is less than 21 years old. The population lacks education and productive skills, particularly in the poverty-ridden countryside, which suffers from an almost total lack of basic infrastructure.

TRANSNATIONAL ISSUES

Disputes—international: Southeast Asian states must maintain border surveillance to check the spread of avian flu; Cambodia and Thailand dispute sections of boundary with missing boundary markers and claims of Thai encroachments into Cambodian territory; maritime boundary with Vietnam is hampered by unresolved dispute over sovereignty of offshore islands; Cambodia accuses Thailand of obstructing access to Preah Vihear temple ruins awarded to Cambodia by ICJ decision in 1962

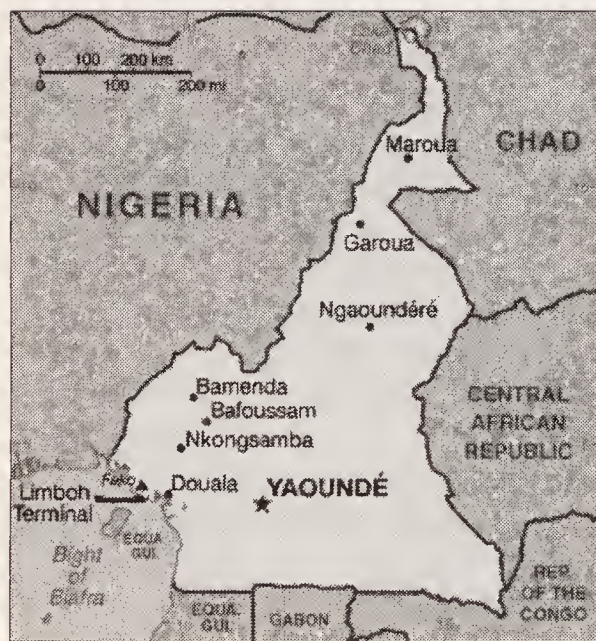

Trafficking in persons: *current situation:* Cambodia is a source, destination, and transit country for men, women, and children trafficked for the purposes of sexual exploitation and forced labor; a significant number of women and children are trafficked to Thailand and Malaysia for commercial sexual exploita-

tion and forced labor; men are trafficked primarily to Thailand for forced labor in the construction and agricultural sectors, particularly the fishing industry, while women and girls are trafficked for factory and domestic work; children are trafficked to Vietnam and Thailand for the purpose of forced begging; Cambodia is a transit and destination point for women from Vietnam trafficked for sexual exploitation; trafficking for sexual exploitation also occurs within Cambodia's borders, from rural areas to the cities

tier rating: Tier 2 Watch List—Cambodia does not fully comply with the minimum standards for the elimination of trafficking; however, it is committed to making significant efforts to sustain progress over the coming year

Illicit drugs: narcotics-related corruption reportedly involving some in the government, military, and police; limited methamphetamine production; vulnerable to money laundering due to its cash-based economy and porous borders

CAMEROON

INTRODUCTION

Background: The former French Cameroon and part of British Cameroon merged in 1961 to form the present country. Cameroon has generally enjoyed stability, which has permitted the development of agriculture, roads, and railways, as well as a petroleum industry. Despite a slow movement toward democratic reform, political power remains firmly in the hands of an ethnic oligarchy headed by President Paul BIYA.

ECONOMY

Economy—overview: Because of its
 modest oil resources and favorable agri-
 cultural conditions, Cameroon has one
 of the best-endowed primary commodity
 economies in sub-Saharan Africa. Still,
 it faces many of the serious problems
 facing other underdeveloped countries,
 such as a top-heavy civil service and a
 generally unfavorable climate for busi-
 ness enterprise. Since 1990, the govern-
 ment has embarked on various IMF and
 World Bank programs designed to spur
 business investment, increase efficiency
 in agriculture, improve trade, and recap-
 italize the nation's banks. In June 2000,
 the government completed an IMF-
 sponsored, three-year structural adjust-
 ment program; however, the IMF is
 pressing for more reforms, including
 increased budget transparency, privatiza-
 tion, and poverty reduction programs.
 International oil and cocoa prices have a
 significant impact on the economy.

TRANSNATIONAL ISSUES

Disputes—international: Joint Border Commission with Nigeria reviewed 2002 ICJ ruling on the entire boundary and bilaterally resolved differences, including June 2006 Greentree Agreement that immediately cedes sovereignty of the

Bakassi Peninsula to Cameroon with a phase-out of Nigerian control within two years while resolving patriation issues; implementation of the ICJ ruling on the Cameroon-Equatorial Guinea-Nigeria maritime boundary in the Gulf of Guinea is pending due to imprecisely defined coordinates and a sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty, which also includes the Chad-Niger and Niger-Nigeria boundaries

Refugees and internally displaced persons:

refugees (country of origin): 39,303 (Chad), 9,711 (Nigeria), 13,000 (Central African Republic); note—there are an additional 10,000 Central African refugees unregistered with UNHCR as of December 2006 (2006)

CANADA

INTRODUCTION

Background: A land of vast distances and rich natural resources, Canada became a self-governing dominion in 1867 while retaining ties to the British crown. Economically and technologically the nation has developed in parallel with the US, its neighbor to the south across an unfortified border. Canada faces the political challenges of meeting public demands for quality improvements in health care and education services, as well as responding to separatist concerns in predominantly francophone Quebec. Canada also aims to develop its diverse energy resources while maintaining its commitment to the environment.

GEOGRAPHY

Location: Northern North America, bordering the North Atlantic Ocean on the

east, North Pacific Ocean on the west, and the Arctic Ocean on the north, north of the conterminous US

Geographic coordinates: 60 00 N, 95 00 W

Map references: North America

Area:

total: 9,984,670 sq km

land: 9,093,507 sq km

water: 891,163 sq km

Area—comparative: somewhat larger than the US

Land boundaries:

Maritime claims:

territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200 nm or to the edge of the continental margin

Climate: varies from temperate in south to subarctic and arctic in north

Terrain: mostly plains with mountains in west and lowlands in southeast

Elevation extremes:

lowest point: Atlantic Ocean 0 m

highest point: Mount Logan 5,959 m

Natural resources: iron ore, nickel, zinc, copper, gold, lead, molybdenum, potash, diamonds, silver, fish, timber, wildlife, coal, petroleum, natural gas, hydropower

Land use:

arable land: 4.57%

permanent crops: 0.65%

other: 94.78% (2005)

Irrigated land: 7,850 sq km (2003)

Natural hazards: continuous permafrost in north is a serious obstacle to development; cyclonic storms form east of the Rocky Mountains, a result of the mixing of air masses from the Arctic, Pacific, and North American interior, and produce most of the country's rain and snow east of the mountains

Environment—current issues: air pollution and resulting acid rain severely affecting lakes and damaging forests; metal smelting, coal-burning utilities, and vehicle emissions impacting on agricultural and forest productivity; ocean waters becoming contaminated due to agricultural, industrial, mining, and forestry activities

Environment—international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-

ECONOMY

Economy—overview: As an affluent, high-tech industrial society in the trillion-dollar class, Canada resembles the US in its market-oriented economic system, pattern of production, and affluent living standards. Since World War II, the

impressive growth of the manufacturing, mining, and service sectors has transformed the nation from a largely rural economy into one primarily industrial and urban. The 1989 US-Canada Free Trade Agreement (FTA) and the 1994 North American Free Trade Agreement (NAFTA) (which includes Mexico) touched off a dramatic increase in trade and economic integration with the US. Given its great natural resources, skilled labor force, and modern capital plant, Canada enjoys solid economic prospects. Top-notch fiscal management has produced consecutive balanced budgets since 1997, although public debate continues over how to manage the rising cost of the publicly funded healthcare system. Exports account for roughly a third of GDP. Canada enjoys a substantial trade surplus with its principal trading partner, the US, which absorbs about 85% of Canadian exports. Canada is the US' largest foreign supplier of energy, including oil, gas, uranium, and electric power.

TRANSNATIONAL ISSUES

Disputes—international: managed maritime boundary disputes with the US at Dixon Entrance, Beaufort Sea, Strait of Juan de Fuca, and around the disputed Machias Seal Island and North Rock; US works closely with Canada to intensify security measures to monitor and control legal and illegal personnel, transport, and commodities across the international border; sovereignty dispute with Denmark over Hans Island in the Kennedy Channel between Ellesmere Island and Greenland

Illicit drugs: illicit producer of cannabis for the domestic drug market and export to US; use of hydroponics technology permits growers to plant large quantities of high-quality marijuana indoors; increasing ecstasy production, some of which is destined for the US; vulnerable to narcotics money laundering because of its mature financial services sector

CAPE VERDE

INTRODUCTION

Background: The uninhabited islands were discovered and colonized by the Portuguese in the 15th century; Cape Verde subsequently became a trading center for African slaves and later an important coaling and resupply stop for whaling and transatlantic shipping. Following independence in 1975, and a tentative interest in unification with Guinea-Bissau, a one-party system was established and maintained until multi-party elections were held in 1990. Cape Verde continues to exhibit one of

Africa's most stable democratic governments. Repeated droughts during the second half of the 20th century caused significant hardship and prompted heavy emigration. As a result, Cape Verde's expatriate population is greater than its domestic one. Most Cape Verdeans have both African and Portuguese antecedents.

Flag description: five unequal horizontal bands; the top-most band of blue—equal to one half the width of the flag—is followed by three bands of white, red, and white, each equal to 1/12 of the width, and a bottom stripe of blue equal to one quarter of the flag width; a circle of 10, yellow, five-pointed stars, each representing one of the islands, is centered on the red stripe and positioned 3/8 of the length of the flag from the hoist side

ECONOMY

Economy—overview: This island economy suffers from a poor natural resource base, including serious water shortages exacerbated by cycles of long-term drought. The economy is service-oriented, with commerce, transport, tourism, and public services accounting for 66% of GDP. Although nearly 70% of the population lives in rural areas, the share of food production in GDP in 2004 was only 12%, of which fishing accounted for 1.5%. About 82% of food must be imported. The fishing potential, mostly lobster and tuna, is not fully exploited. Cape Verde annually runs a high trade deficit, financed by foreign aid and remittances from emigrants; remittances supplement GDP by more than 20%. Economic reforms are aimed at developing the private sector and

attracting foreign investment to diversify the economy. Future prospects depend heavily on the maintenance of aid flows, the encouragement of tourism, remittances, and the momentum of the government's development program. Cape Verde has been exploring European Union membership in recent years.

CAYMAN ISLANDS**INTRODUCTION**

Background: The Cayman Islands were colonized from Jamaica by the British during the 18th and 19th centuries, and were administered by Jamaica after 1863. In 1959, the islands became a territory within the Federation of the West Indies, but when the Federation dissolved in 1962, the Cayman Islands chose to remain a British dependency.

ECONOMY

Economy—overview: With no direct taxation, the islands are a thriving off-shore financial center. More than 68,000 companies were registered in the Cayman Islands as of 2003, including almost 500 banks, 800 insurers, and 5,000 mutual funds. A stock exchange was opened in 1997. Tourism is also a mainstay, accounting for about 70% of GDP and 75% of foreign currency earnings. The tourist industry is aimed at the luxury market and caters mainly to visitors from North America. Total tourist arrivals exceeded 2.1 million in 2003, with about half from the US. About 90% of the islands' food and consumer goods must be imported. The Caymanians enjoy one of the highest outputs per capita and one of the highest standards of living in the world.

CENTRAL AFRICAN REPUBLIC

INTRODUCTION

Background: The former French colony of Ubangi-Shari became the Central African Republic upon independence in 1960. After three tumultuous decades of misrule—mostly by military governments—civilian rule was established in 1993 and lasted for one decade. President Ange-Felix PATASSE's civilian government was plagued by unrest, and in March 2003 he was deposed in a military coup led by General Francois BOZIZE, who established a transitional government. Though the government has the tacit support of civil society groups and the main parties, a wide field of candidates contested the municipal, legislative, and presidential elections held in March and May of 2005 in which General BOZIZE was affirmed as president. The government still does not fully control the countryside, where pockets of lawlessness persist.

ECONOMY

Economy—overview: Subsistence agriculture, together with forestry, remains the backbone of the economy of the Central African Republic (CAR), with more than 70% of the population living in outlying areas. The agricultural sector generates more than half of GDP. Timber has accounted for about 16% of export earnings and the diamond industry, for 40%. Important constraints to economic development include the CAR's landlocked position, a poor transportation system, a largely unskilled work force, and a legacy of misdirected macroeconomic policies. Factional fighting between the government and its opponents remains a drag on economic revitalization. Distribution of income is extraordinarily unequal. Grants from France and the international community can only partially meet humanitarian needs.

tier rating: Tier 2 Watch List—the Central African Republic failed to provide evidence of increasing efforts to combat trafficking in persons during 2005, specifically its inadequate law enforcement response to trafficking crimes

CHAD

INTRODUCTION

Background: Chad, part of France's African holdings until 1960, endured three decades of civil warfare as well as invasions by Libya before a semblance of peace was finally restored in 1990. The government eventually drafted a democratic constitution, and held flawed presidential elections in 1996 and 2001. In 1998, a rebellion broke out in northern Chad, which sporadically flares up despite several peace agreements between the government and the rebels. In 2005 new rebel groups emerged in western Sudan and have made probing attacks into eastern Chad. Power remains in the hands of an ethnic minority. In June 2005, President Idriss DEBY held a referendum successfully removing constitutional term limits.

ECONOMY

Economy—overview: Chad's primarily agricultural economy will continue to be boosted by major foreign direct investment projects in the oil sector that began in 2000. Over 80% of Chad's population relies on subsistence farming and livestock raising for its livelihood. Chad's economy has long been handicapped by its landlocked position, high energy costs, and a history of instability. Chad relies on foreign assistance and foreign capital for most public and private sector investment projects. A consortium led by two US companies has been investing \$3.7 billion to develop oil reserves—estimated at 1 billion barrels—in southern Chad. The nation's total oil reserves have been estimated to be 2 billion barrels. Oil production came on stream in late 2003. Chad began to export oil in 2004. Cotton, cattle, and gum arabic provide the bulk of Chad's non-oil export earnings.

CHILE

INTRODUCTION

Background: Prior to the coming of the Spanish in the 16th century, northern Chile was under Inca rule while Araucanian Indians (also known as Mapuches) inhabited central and southern Chile. Although Chile declared its independence in 1810, decisive victory over the Spanish was not achieved until 1818. In the War of the Pacific (1879–83), Chile defeated Peru

and Bolivia and won its present northern regions. It was not until the 1880s that the Araucanian Indians were completely subjugated. A three-year-old Marxist government of Salvador ALLENDE was overthrown in 1973 by a military coup led by Augusto PINOCHET, who ruled until a freely elected president was installed in 1990. Sound economic policies, maintained consistently since the 1980s, have contributed to steady growth, reduced poverty rates by over

half, and have helped secure the country's commitment to democratic and representative government. Chile has increasingly assumed regional and international leadership roles befitting its status as a stable, democratic nation.

ECONOMY

Economy—overview: Chile has a market-oriented economy characterized by a high level of foreign trade. During the early 1990s, Chile’s reputation as a role model for economic reform was strengthened when the democratic government of Patricio AYLWIN—which took over from the military in 1990—

deepened the economic reform initiated by the military government. Growth in real GDP averaged 8% during 1991–97, but fell to half that level in 1998 because of tight monetary policies implemented to keep the current account deficit in check and because of lower export earnings—the latter a product of the global financial crisis. A severe drought exacerbated the recession in 1999, reducing crop yields and causing hydroelectric shortfalls and electricity rationing, and Chile experienced negative economic growth for the first time in more than 15 years. Despite the effects of the recession, Chile maintained its reputation for strong financial institutions and sound policy that have given it the strongest sovereign bond rating in South America. Between 2000 and 2006 growth ranged between 2%–6%. Throughout these years Chile maintained a low rate of inflation with GDP growth coming from high copper prices, solid export earnings (particularly forestry, fishing, and mining), and growing domestic consumption. Chile continues to attract foreign direct investment, but most foreign investment goes into gas, water, electricity and mining. Unemployment has exhibited a downward trend over the past year, dropping to 7.8% at the end of 2006. Chile deepened its longstanding commitment to trade liberalization with the signing of a free trade agreement with the US, which took effect on 1 January 2004. Chile signed or ratified a number of trade agreements in 2006, including with China and India. Chile claims to have more bilateral or regional trade agreements than any other country. It has 57 such agreements (not all of them full free trade agreements), including with the European Union, Mercosur, South Korea, and Mexico.

partially overlaps Argentine and British claims; the joint boundary commission, established by Chile and Argentina in 2001, has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur)

Illicit drugs: important transshipment country for cocaine destined for Europe; economic prosperity and increasing trade

have made Chile more attractive to traffickers seeking to launder drug profits, especially through the Iquique Free Trade Zone, but a new anti-money-laundering law improves controls; imported precursors passed on to Bolivia; domestic cocaine consumption is rising; significant consumer of cocaine

CHINA

INTRODUCTION

Background: For centuries China stood as a leading civilization, outpacing the rest of the world in the arts and sciences, but in the 19th and early 20th centuries, the country was beset by civil unrest, major famines, military defeats, and foreign occupation. After World War II, the Communists under MAO Zedong established an autocratic socialist system that, while ensuring China's sovereignty, imposed strict controls over everyday life and cost the lives of tens of millions of people. After 1978, his successor DENG Xiaoping and other leaders focused on market-oriented economic development and by 2000 output had quadrupled. For much of the population, living standards have improved dramatically and the room for personal choice has expanded, yet political controls remain tight.

ECONOMY

Economy—overview: China's economy during the last quarter century has changed from a centrally planned system that was largely closed to international trade to a more market-oriented economy that has a rapidly growing private sector and is a major player in the global economy. Reforms started in the late 1970s with the phasing out of collectivized agriculture, and expanded to include the gradual liberalization of prices, fiscal decentralization, increased autonomy for state enterprises, the foundation of a diversified banking system, the development of stock markets, the rapid growth of the non-state sector, and the opening to foreign trade and investment. China has generally implemented reforms in a gradualist or piecemeal fashion, including the sale of equity in China's largest state banks to foreign investors and refinements in foreign exchange and bond markets in 2005. The restructuring of the economy and resulting efficiency gains have contributed to a more than tenfold increase in GDP since 1978. Measured on a purchasing power parity (PPP) basis, China in 2006 stood as the second-largest economy in the world after the US, although in per capita terms the country is still lower middle-income and 130 million Chinese fall below international poverty lines. Economic development has generally been more rapid in coastal provinces than in the interior, and there are large disparities in per capita income between regions. The government has struggled to: (a) sustain adequate job growth for tens of millions of workers laid off from state-owned enterprises, migrants, and new entrants to the work force; (b) reduce corruption and other economic crimes; and (c) contain envi-

ronmental damage and social strife related to the economy's rapid transformation. From 100 million to 150 million surplus rural workers are adrift between the villages and the cities, many subsisting through part-time, low-paying jobs. One demographic consequence of the "one child" policy is that China is now one of the most rapidly aging countries in the world. Another long-term threat to growth is the deterioration in the environment—notably air pollution, soil erosion, and the steady fall of the water table, especially in the north. China continues to lose arable land because of erosion and economic development. China has benefited from a huge expansion in computer Internet use, with more than 100 million users at the end of 2005. Foreign investment remains a strong element in China's remarkable expansion in world trade and has been an important factor in the growth of urban jobs. In July 2005, China revalued its currency by 2.1% against the US dollar and moved to an exchange rate system that references a basket of currencies. In 2006 China had the largest current account surplus in the world—nearly \$180 billion. More power generating capacity came on line in 2006 as large scale investments were completed. Thirteen years in construction at a cost of \$24 billion, the immense Three Gorges Dam across the Yangtze River was essentially completed in 2006 and will revolutionize electrification and flood control in the area. The 11th Five-Year Program (2006–10), approved by the National People's Congress in March 2006, calls for a 20% reduction in energy consumption per unit of GDP by 2010 and an estimated 45% increase in GDP by 2010. The plan states that conserving resources and protecting the environment are basic goals, but it lacks details on the policies and reforms necessary to achieve these goals.

TRANSNATIONAL ISSUES

Disputes—international: based on principles drafted in 2005, China and India continue discussions to resolve all aspects of their extensive boundary and territorial disputes together with a security and foreign policy dialogue to consolidate discussions related to the boundary, regional nuclear proliferation, and other matters; recent talks and confidence-building measures have begun to defuse tensions over Kashmir, site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; lacking any treaty describing the boundary, Bhutan and China continue negotiations to establish a boundary alignment to resolve substantial cartographic discrepancies, the

largest of which lies in Bhutan's northwest; China asserts sovereignty over the Spratly Islands together with Malaysia, Philippines, Taiwan, Vietnam, and possibly Brunei; the 2002 "Declaration on the Conduct of Parties in the South China Sea" eased tensions in the Spratly's but is not the legally binding "code of conduct" sought by some parties; Vietnam and China continue to expand construction of facilities in the Spratly's and in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord on marine seismic activities in the Spratly Islands; China occupies some of the Paracel Islands also claimed by Vietnam and Taiwan; China and Taiwan continue to reject both Japan's claims to the uninhabited islands of Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared equidistance line in the East China Sea, the site of intensive hydrocarbon prospecting; certain islands in the Yalu and Tumen rivers are in dispute with North Korea; China seeks to stem illegal migration of North Koreans; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with their 2004 Agreement; in 2006, China and Tajikistan pledged to commence demarcation of the revised boundary agreed to

in the delimitation of 2002; demarcation of the China-Vietnam land boundary proceeds slowly and although the maritime boundary delimitation and fisheries agreements were ratified in June 2004, implementation remains stalled; in 2004, international environmentalist and political pressure from Burma and Thailand prompted China to halt construction of 13 dams on the Salween River

Refugees and internally displaced persons:

refugees (country of origin): 300,897 (Vietnam), estimated 30,000–50,000 (North Korea)

IDPs: 90,000 (2006)

Trafficking in persons: current situation:

China is a source, transit, and destination country for women, men, and children trafficked for purposes of sexual exploitation and forced labor; the majority of trafficking in China is internal, but there is also international trafficking of Chinese citizens; women are lured through false promises of legitimate employment into commercial sexual exploitation in Taiwan, Thailand, Malaysia, and Japan; Chinese men and women are smuggled to countries throughout the world at enormous personal expense and then forced into commercial sexual exploitation or exploitative labor to repay debts to traf-

fickers; women and children are trafficked into China from Mongolia, Burma, North Korea, Russia, and Vietnam for forced labor, marriage, and sexual slavery; most North Koreans enter northeastern China voluntarily, but others reportedly are trafficked into China from North Korea; domestic trafficking remains the most significant problem in China, with an estimated minimum of 10,000–20,000 victims trafficked each year; the actual number of victims could be much greater; some experts believe that the serious and prolonged imbalance in the male-female birth ratio may now be contributing to Chinese and foreign girls and women being trafficked as potential brides
tier rating: Tier 2 Watch List—China failed to show evidence of increasing efforts to address transnational trafficking; while the government provides reasonable protection to internal victims of trafficking, protection for Chinese and foreign victims of transnational trafficking remain inadequate

Illicit drugs: major transshipment point for heroin produced in the Golden Triangle region of Southeast Asia; growing domestic drug abuse problem; source country for chemical precursors, despite new regulations on its large chemical industry

CHRISTMAS ISLAND

INTRODUCTION

Background: Named in 1643 for the day of its discovery, the island was annexed and settlement began by the UK in 1888. Phosphate mining began in the 1890s. The UK transferred sovereignty to Australia in 1958. Almost two-thirds of the island has been declared a national park.

ECONOMY

Economy—overview: Phosphate mining had been the only significant economic activity, but in December 1987 the Australian Government closed the mine. In 1991, the mine was reopened. With the support of the government, a \$34 million casino opened in 1993, but closed in 1998. The Australian Government in 2001 agreed to support the creation of a commercial space-launching site on the island, expected to begin operations in the near future.

CLIPPERTON ISLAND

INTRODUCTION

Background: This isolated island was named for John CLIPPERTON, a pirate who made it his hideout early in the 18th century. Annexed by France in 1855, it was seized by Mexico in 1897. Arbitration eventually awarded the island to France, which took possession in 1935.

COCOS (KEELING) ISLANDS

INTRODUCTION

Background: There are 27 coral islands in the group. Captain William KEELING discovered the islands in 1609, but they remained uninhabited until the 19th century. From the 1820s to

1978, members of the CLUNIE-ROSS family controlled the islands and the copra produced from local coconuts. Annexed by the UK in 1857, the Cocos Islands were transferred to the Australian Government in 1955. The population on the two inhabited islands generally is split between the ethnic Europeans on West Island and the ethnic Malays on Home Island.

COLOMBIA

INTRODUCTION

Background: Colombia was one of the three countries that emerged from the collapse of Gran Colombia in 1830 (the others are Ecuador and Venezuela). A 40-year conflict between government forces and anti-government insurgent groups and illegal paramilitary groups—both heavily funded by the drug trade—escalated during the 1990s. The insurgents lack the military or popular support necessary to overthrow the government, and violence has been decreasing since about 2002, but insurgents continue attacks against civilians and large swaths of the countryside are under guerrilla influence. More than 32,000 former paramilitaries had demobilized by the end of 2006 and the United Self Defense Forces of Colombia (AUC) as a formal organization had largely ceased to function. Still, some renegades continued to engage in criminal activities. The Colombian Government has stepped up efforts to reassert government control throughout the country, and now has a presence in every one of its municipalities. However, neighboring countries worry about the violence spilling over their borders.

ECONOMY

Economy—overview: Colombia's economy has experienced positive growth over the past three years despite a serious armed conflict. The economy continues to improve in part because of austere government budgets, focused efforts to reduce public debt levels, an export-oriented growth strategy, an improved security situation in the country, and high commodity prices. Ongoing economic problems facing President URIBE range from reforming the pension system to reducing high unemployment, and to achieving congressional passage of a fiscal transfers reform; furthermore, new exploration is needed to offset declining oil production. However, the government's economic policy, democratic security strategy, and the signing of a free trade agreement with the US have engendered a growing sense of confidence in the economy, particularly within the business sector.

females age 18–49: 383,146 (2005 est.)

Military expenditures—percent of GDP: 3.4% (2005 est.)**TRANSNATIONAL ISSUES****Disputes—international:** memorials and countermemorials were filed by the parties in Nicaragua's 1999 and 2001 proceedings against Honduras and Colombia at the ICJ over the maritime boundary and territorial claims in the western Caribbean Sea—final public hearings are scheduled for 2007; dispute with Venezuela over maritime boundary and Venezuelan-administered Los Monjes Islands near the Gulf of Venezuela; Colombian-organized illegal narcotics, guerrilla, and paramilitary activities penetrate all of its neighbors' borders and have caused over 300,000 persons to flee the country, mostly into neighboring states

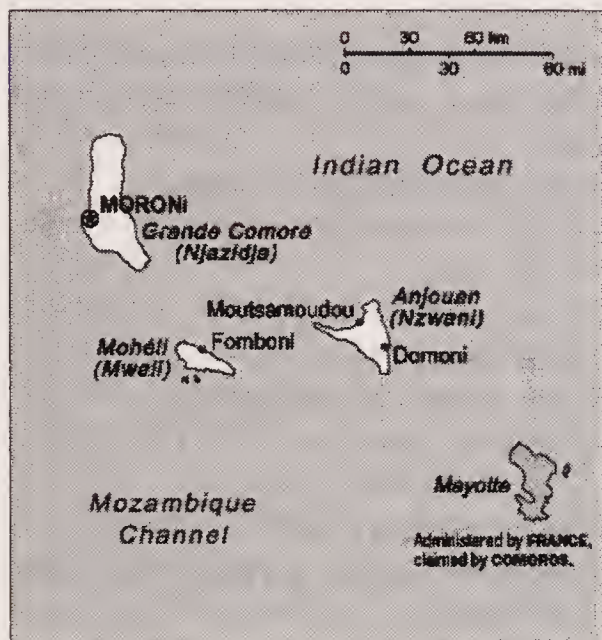

Refugees and internally displaced persons: IDPs: 1.8–3.8 million (conflict between government and illegal armed groups and FARC factions; drug wars) (2006)

Illicit drugs: illicit producer of coca, opium poppy, and cannabis; world's leading coca cultivator with 144,000 hectares in coca cultivation in 2005, a 26% increase over 2004, producing a

potential of 545 mt of pure cocaine; the world's largest producer of coca derivatives; supplies cocaine to most of the US market and the great majority of other international drug markets; in 2005, aerial eradication dispensed herbicide to treat over 130,000 hectares but aggressive replanting on the part of coca growers means Colombia remains a key producer; a significant portion of non-

US narcotics proceeds are either laundered or invested in Colombia through the black market peso exchange; important supplier of heroin to the US market; opium poppy cultivation fell 50% between 2003 and 2004 to 2,100 hectares yielding a potential 3.8 metric tons of pure heroin, mostly for the US market; no poppy estimate was conducted in 2005

COMOROS

INTRODUCTION

Background: Comoros has endured 19 coups or attempted coups since gaining independence from France in 1975. In 1997, the islands of Anjouan and Mohéli declared independence from Comoros. In 1999, military chief Col. AZALI seized power. He pledged to resolve the secessionist crisis through a confederal arrangement named the 2000 Fomboni Accord. In December 2001, voters approved a new constitution and presidential elections took place in the spring of 2002. Each island in the archipelago elected its own president and a new union president took office in May 2002.

ECONOMY

Economy—overview: One of the world's poorest countries, Comoros is made up of three islands that have inadequate transportation links, a young and rapidly increasing population, and few natural resources. The low educational level of the labor force contributes to a subsistence level of economic activity, high unemployment, and a heavy dependence on foreign grants and technical assistance. Agriculture, including fishing, hunting, and forestry, contributes 40% to GDP, employs 80% of the labor force, and provides most of the exports. The country is not self-sufficient in food production; rice, the main staple, accounts for the bulk of imports. The govern-

ment—which is hampered by internal political disputes—is struggling to upgrade education and technical training, privatize commercial and industrial enterprises, improve health services, diversify exports, promote tourism, and reduce the high population growth rate. Increased foreign support is essential if the goal of 4% annual GDP growth is to be met. Remittances from 150,000 Comorans abroad help supplement GDP. **GDP (purchasing power parity):** \$441 million (2002 est.)

CONGO, DEMOCRATIC REPUBLIC OF THE

INTRODUCTION

Background: Established as a Belgian colony in 1908, the Republic of the Congo gained its independence in 1960, but its early years were marred by political and social instability. Col. Joseph MOBUTU seized power and declared himself president in a November 1965

coup. He subsequently changed his name—to MOBUTU Sese Seko—as well as that of the country—to Zaire. MOBUTU retained his position for 32 years through several sham elections, as well as through the use of brutal force. Ethnic strife and civil war, touched off by a massive inflow of refugees in 1994 from fighting in Rwanda and Burundi, led in May 1997 to the toppling of the MOBUTU regime by a rebellion backed by Rwanda and Uganda and fronted by Laurent KABILA. He renamed the country the Democratic Republic of the Congo (DRC), but in August 1998 his regime was itself challenged by a second insurrection again backed by Rwanda and Uganda. Troops from Angola, Chad, Namibia, Sudan, and Zimbabwe intervened to support KABILA's regime. A cease-fire was signed in July 1999 by the DRC, Congolese armed rebel groups, Angola, Namibia, Rwanda, Uganda, and Zimbabwe but sporadic fighting continued. Laurent KABILA was assassi-

nated in January 2001 and his son, Joseph KABILA, was named head of state. In October 2002, the new president was successful in negotiating the withdrawal of Rwandan forces occupying eastern Congo; two months later, the Pretoria Accord was signed by all remaining warring parties to end the fighting and establish a government of national unity. A transitional government was set up in July 2003. Joseph KABILA as president and four vice presidents represented the former government, former rebel groups, and the political opposition. The transitional government held a successful constitutional referendum in December 2005 and elections for the presidency, National Assembly, and provincial legislatures in 2006. KABILA was inaugurated president in December 2006. The National Assembly was installed in September 2006. Its president, Vital KAMERHE, was chosen in December. Provincial assemblies were constituted in

early 2007, and elected governors and national senators in January 2007.

ECONOMY

Economy—overview: The economy of the Democratic Republic of the Congo—a nation endowed with vast potential wealth—is recovering from two decades of decline. Conflict, which began in August 1998, dramatically reduced national output and government revenue, increased external debt, and resulted in the deaths of perhaps 3.5 million people from violence, famine, and disease. Foreign businesses curtailed operations due to uncertainty about the outcome of the conflict, lack of infrastructure, and the difficult operating environment. Conditions began to improve in late 2002 with the withdrawal of a large portion of the invading foreign troops. The transitional government reopened relations with international financial institutions and international donors, and President KABILA has begun implementing reforms. Much economic activity still occurs in the informal sector, and is not reflected in GDP data. Economic stability improved during the period 2003–06, although an uncertain legal framework, corruption, and a lack of transparency in government policy continues to hamper growth. In 2005–06, renewed activity in the mining sector, the source of most export income, boosted Kinshasa's fiscal position and GDP growth. The International Monetary Fund program for the DRC, however, expired at the end of March 2006 and probably will not be reinstated until mid-2007. Government reforms and improved security may lead to increased government revenues, outside budget assistance, and foreign direct investment in 2007.

Illicit drugs: one of Africa's biggest producers of cannabis, but mostly for domestic consumption; while rampant corruption and inadequate supervision leaves the banking system vulnerable to money laundering, the lack of a well-developed financial system limits the country's utility as a money-laundering center

CONGO, REPUBLIC OF THE

INTRODUCTION

Background: Upon independence in 1960, the former French region of Middle Congo became the Republic of the Congo. A quarter century of experimentation with Marxism was abandoned in 1990 and a democratically elected government took office in 1992. A brief civil war in 1997 restored former Marxist President Denis SASSOU-NGUESSO, and ushered in a period of ethnic and political unrest. Southern-based rebel groups agreed to a final peace accord in March 2003, but the calm is tenuous and refugees continue to present a humanitarian crisis. The Republic of Congo was once one of Africa's largest petroleum producers, but with declining production it will need to hope for new offshore oil finds to sustain its oil earnings over the long term.

ECONOMY

Economy—overview: The economy is a mixture of village agriculture and handicrafts, an industrial sector based largely on oil, support services, and a government characterized by budget problems

and overstaffing. Oil has supplanted forestry as the mainstay of the economy, providing a major share of government revenues and exports. In the early 1980s, rapidly rising oil revenues enabled the government to finance large-scale development projects with GDP growth averaging 5% annually, one of the highest rates in Africa. The government has mortgaged a substantial portion of its oil earnings through oil-backed loans that have contributed to a growing debt burden and chronic revenue shortfalls. Economic reform efforts have been undertaken with the support of international organizations, notably the World Bank and the IMF. However, the reform program came to a halt in June 1997 when civil war erupted. Denis SASSO-NGUESSO, who returned to power when the war ended in October 1997, publicly expressed interest in moving forward on economic reforms and privatization and in renewing cooperation with international financial institutions. Economic progress was badly hurt by slumping oil prices and the resumption of armed conflict in December 1998, which worsened the republic's budget deficit. The current administration presides over an uneasy internal peace and faces difficult economic challenges of stimulating recovery and reducing poverty. Recovery of oil prices has boosted the economy's GDP and near-term prospects. In March 2006, the World Bank and the International Monetary Fund (IMF) approved Heavily Indebted Poor Countries (HIPC) treatment for Congo.

COOK ISLANDS

INTRODUCTION

Background: Named after Captain COOK, who sighted them in 1770, the islands became a British protectorate in 1888. By 1900, administrative control

was transferred to New Zealand; in 1965, residents chose self-government in free association with New Zealand. The emigration of skilled workers to New Zealand and government deficits are continuing problems.

ECONOMY

Economy—overview: Like many other South Pacific island nations, the Cook Islands' economic development is hindered by the isolation of the country from foreign markets, the limited size of domestic markets, lack of natural resources, periodic devastation from natural disasters, and inadequate infrastructure. Agriculture, employing about one-third of the working population, provides the economic base with major exports made up of copra and citrus fruit. Black pearls are the Cook Islands' leading export. Manufacturing activities are limited to fruit processing, clothing, and handicrafts. Trade deficits are offset by remittances from emigrants and by foreign aid, overwhelmingly from New Zealand. In the 1980s and 1990s, the country lived beyond its means, maintaining a bloated public service and accumulating a large foreign debt. Subsequent reforms, including the sale of state assets, the strengthening of economic management, the encouragement of tourism, and a debt restructuring agreement, have rekindled investment and growth.

COSTA RICA

INTRODUCTION

Background: Although explored by the Spanish early in the 16th century, initial

attempts at colonizing Costa Rica proved unsuccessful due to a combination of factors, including: disease from mosquito-infested swamps, brutal heat, resistance by natives, and pirate raids. It was not until 1563 that a permanent settlement of Cartago was established in the cooler, fertile central highlands. The area remained a colony for some two and a half centuries. In 1821, Costa Rica became one of several Central American provinces that jointly declared their independence from Spain. Two years later it joined the United Provinces of Central America, but this federation disintegrated in 1838, at which time Costa Rica proclaimed its sovereignty and independence. Since the late 19th century, only two brief periods of violence have marred the country's democratic

development. Although it still maintains a large agricultural sector, Costa Rica has expanded its economy to include strong technology and tourism industries. The standard of living is relatively high. Land ownership is widespread.

GEOGRAPHY

ECONOMY

Economy—overview: Costa Rica's basically stable economy depends on tourism, agriculture, and electronics exports. Poverty has remained at roughly 20% for nearly 20 years, and the strong social safety net that had been put into place by the government has eroded due to increased financial constraints on government expenditures. Immigration from Nicaragua has increasingly become a concern for the government. The estimated 300,000–500,000 Nicaraguans estimated to be in Costa Rica legally and illegally are an important source of (mostly unskilled) labor, but also place heavy demands on the social welfare system. Foreign investors remain attracted by the country's political stability and high education levels, and tourism continues to bring in foreign exchange. The government continues to grapple with its large internal and external deficits and sizable internal debt. Reducing inflation remains a difficult problem because of rising import prices, labor market rigidities, and fiscal deficits. The country also needs to reform its tax system and its pattern of public expenditure. The current administration has made it a priority to pass the necessary reforms to implement the US-Central American Free Trade Agreement (CAFTA). CAFTA implementation would result in an improved investment climate.

CÔTE D'IVOIRE

INTRODUCTION

Background: Close ties to France since independence in 1960, the development

of cocoa production for export, and foreign investment made Côte d'Ivoire one of the most prosperous of the tropical African states, but did not protect it from political turmoil. In December 1999, a military coup—the first ever in Côte d'Ivoire's history—overthrew the government. Junta leader Robert GUEI blatantly rigged elections held in late 2000 and declared himself the winner. Popular protest forced him to step aside and brought runner-up Laurent GBAGBO into power. Ivorian dissidents and disaffected members of the military launched a failed coup attempt in September 2002. Rebel forces claimed the northern half of the country, and in January 2003 were granted ministerial positions in a unity government under the auspices of the Linas-Marcoussis

Peace Accord. President GBAGBO and rebel forces resumed implementation of the peace accord in December 2003 after a three-month stalemate, but issues that sparked the civil war, such as land reform and grounds for citizenship, remain unresolved. The central government has yet to exert control over the northern regions and tensions remain high between GBAGBO and opposition leaders. Several thousand French and West African troops remain in Côte d'Ivoire to maintain peace and facilitate the disarmament, demobilization, and rehabilitation process.

GEOGRAPHY

Location: Western Africa, bordering the North Atlantic Ocean, between Ghana and Liberia

Geographic coordinates: 8 00 N, 5 00 W

Map references: Africa

Area:

total: 322,460 sq km

land: 318,000 sq km

water: 4,460 sq km

Area—comparative: slightly larger than New Mexico

Land boundaries:

total: 3,110 km

border countries: Burkina Faso 584 km, Ghana 668 km, Guinea 610 km, Liberia 716 km, Mali 532 km

Coastline: 515 km

Maritime claims:

territorial sea: 12 nm

exclusive economic zone: 200 nm

continental shelf: 200 nm

Climate: tropical along coast, semiarid in far north; three seasons—warm and dry (November to March), hot and dry (March to May), hot and wet (June to October)

Terrain: mostly flat to undulating plains; mountains in northwest

Elevation extremes:

lowest point: Gulf of Guinea 0 m

highest point: Mont Nimba 1,752 m

Natural resources: petroleum, natural gas, diamonds, manganese, iron ore, cobalt, bauxite, copper, gold, nickel, tantalum, silica sand, clay, cocoa beans, coffee, palm oil, hydropower

ECONOMY

Economy—overview: Côte d'Ivoire is among the world's largest producers and exporters of coffee, cocoa beans, and palm oil. Consequently, the economy is highly sensitive to weather conditions and to fluctuations in international prices for these products. Despite government attempts to diversify the economy, it is still heavily dependent on agriculture and related activities, engaging roughly 68% of the population. Growth was negative in 2000–03 because of the difficulty of meeting the conditions of international donors, continued low prices of key exports, foreign divestment and civil war. Political turmoil has continued to damage the economy since 2004, with a rising risk premium associ-

ated with doing business in the country, foreign investment shriveling, transportation costs increasing, French businesses fleeing, and criminal elements that traffic in weapons and diamonds gaining ground. The government will continue to survive financially off of the sale of cocoa, which represents 90% of foreign exchange earnings, but the government will probably lose between 10% and 20% of its cocoa harvest to northern rebels who smuggle the cocoa they control to neighboring countries where cocoa prices are higher. The government remains hopeful that ongoing exploration of Côte d'Ivoire's offshore oil reserves will result in significant production that could boost daily crude output from roughly 33,000 barrels per day (b/d) to more than 200,000 b/d by the end of the decade.

TRANSNATIONAL ISSUES

Disputes—international: despite the presence of over 9,000 UN forces (UNOCI) in Côte d'Ivoire since 2004, ethnic conflict there has displaced hundreds of thousands of Ivorians in and out of the country as well as driven out migrants from neighboring states who worked in Ivorian cocoa plantations; Ivorian rebels reportedly hide along the borders of neighboring states

Refugees and internally displaced persons:

refugees (country of origin): 39,919 (Liberia)

IDPs: 750,000 (2002 coup; most IDPs are in western regions) (2006)

Illicit drugs: illicit producer of cannabis, mostly for local consumption; utility as a narcotic transshipment point to Europe reduced by ongoing political instability; while rampant corruption and inadequate supervision leave the banking system vulnerable to money laundering, the lack of a developed financial system limits the country's utility as a major money-laundering center

CROATIA

INTRODUCTION

Background: The lands that today comprise Croatia were part of the Austro-Hungarian Empire until the close of

World War I. In 1918, the Croats, Serbs, and Slovenes formed a kingdom known after 1929 as Yugoslavia. Following World War II, Yugoslavia became a federal independent Communist state under

the strong hand of Marshal TITO. Although Croatia declared its independence from Yugoslavia in 1991, it took four years of sporadic, but often bitter, fighting before occupying Serb armies

were mostly cleared from Croatian lands. Under UN supervision, the last Serb-held enclave in eastern Slavonia was returned to Croatia in 1998.

ECONOMY

Economy—overview: Once one of the wealthiest of the Yugoslav republics, Croatia's economy suffered badly during the 1991–95 war as output collapsed and the country missed the early waves of investment in Central and Eastern Europe that followed the fall of the Berlin Wall. Since 2000, however, Croatia's economic fortunes have begun to improve slowly, with moderate but steady GDP growth between 4% and 5% led by a rebound in tourism and credit-driven consumer spending. Inflation over the same period has remained tame and the currency, the kuna, stable. Nevertheless, difficult problems still remain, including a stubbornly high unemployment rate, a growing trade deficit and uneven regional development. The state retains a large role in the economy, as privatization efforts often meet stiff public and political resistance. While macroeconomic stabilization has largely been achieved, structural reforms lag because of deep resistance on the part of the public and lack of strong support from politicians. The EU accession process should accelerate fiscal and structural reform.

TRANSNATIONAL ISSUES

Disputes—International: dispute remains with Bosnia and Herzegovina over several small disputed sections of the boundary related to maritime access that hinders ratification of the 1999 border agreement; the Croatia-Slovenia land and maritime boundary agreement, which would have ceded most of Pirin Bay and maritime access to Slovenia and several villages to Croatia, remains unratified and in dispute; Slovenia also

protests Croatia's 2003 claim to an exclusive economic zone in the Adriatic; as a European Union peripheral state, neighboring Slovenia must conform to the strict Schengen border rules to curb illegal migration and commerce through

southeastern Europe while encouraging close cross-border ties with Croatia
Refugees and Internally displaced persons: IDPs: 4,200–7,000 (Croats and Serbs displaced in 1992–95 war) (2006)
Illicit drugs: transit point along the

Balkan route for Southwest Asian heroin to Western Europe; has been used as a transit point for maritime shipments of South American cocaine bound for Western Europe

CUBA

INTRODUCTION

Background: The native Amerindian population of Cuba began to decline after the European discovery of the island by Christopher COLUMBUS in 1492 and following its development as a Spanish colony during the next several centuries. Large numbers of African slaves were imported to work the coffee and sugar plantations, and Havana became the launching point for the annual treasure fleets bound for Spain from Mexico and Peru. Spanish rule, marked initially by neglect, became increasingly repressive, provoking an independence movement and occasional rebellions that were harshly suppressed. It was US intervention during the Spanish-American War in 1898 that finally overthrew Spanish rule. The subsequent Treaty of Paris established Cuban independence, which was granted in 1902 after a three-year transition period. Fidel CASTRO led a rebel army to victory in 1959; his iron rule has held the regime together since then. Cuba's Communist revolution, with Soviet support, was exported throughout Latin America and Africa during the 1960s, 1970s, and 1980s. The country is now slowly recovering from a severe economic recession in 1990, following the withdrawal of former Soviet subsidies, worth \$4 billion to \$6 billion annually. Cuba portrays its difficulties as the result of the US embargo in place since 1961. Illicit migration to the US—using homemade rafts, alien smugglers, air flights, or via the southwest border—

is a continuing problem. The US Coast Guard intercepted 2,810 individuals attempting to cross the Straits of Florida in fiscal year 2006.

ECONOMY

Economy—overview: The government
 continues to balance the need for eco-
 nomic loosening against a desire for firm
 political control. It has rolled back lim-
 ited reforms undertaken in the 1990s to
 increase enterprise efficiency and alle-
 viate serious shortages of food, consumer
 goods, and services. The average Cuban's

standard of living remains at a lower level than before the downturn of the 1990s, which was caused by the loss of Soviet aid and domestic inefficiencies. Since late 2000, Venezuela has been providing Cuba oil on preferential terms, and it currently supplies about 98,000 barrels per day of petroleum products. Cuba has been paying for the oil, in part, with the services of Cuban personnel, including some 20,000 medical professionals. In 2006, high metals prices continued to boost Cuban earnings from nickel and cobalt production. Havana continued to invest in the country's energy sector to mitigate electrical blackouts that have plagued the country since 2004.

TRANSNATIONAL ISSUES

Disputes—international: US Naval Base at Guantanamo Bay is leased to US and only mutual agreement or US abandonment of the area can terminate the lease

Trafficking in persons: *current situation:* Cuba is a source country for women and children trafficked for the purposes of sexual exploitation and forced child labor; Cuba is a major destination for sex tourism, which largely caters to European, Canadian, and Latin American tourists and involves large numbers of minors; there are reports that Cuban women have been trafficked to Mexico for sexual exploitation; forced labor victims also include children coerced into working in commercial agriculture

tier rating: Tier 3—Cuba does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so

Illicit drugs: territorial waters and air space serve as transshipment zone for US- and European-bound drugs; established the death penalty for certain drug-related crimes in 1999

CYPRUS**INTRODUCTION**

Background: A former British colony, Cyprus became independent in 1960 following years of resistance to British rule. Tensions between the Greek Cypriot majority and Turkish Cypriot minority came to a head in December 1963, when violence broke out in the capital of Nicosia. Despite the deployment of UN peacekeepers in 1964, sporadic inter-communal violence continued forcing most Turkish Cypriots into enclaves throughout the island. In 1974, a Greek Government-sponsored attempt to seize

control of Cyprus was met by military intervention from Turkey, which soon controlled more than a third of the island. In 1983, the Turkish-held area declared itself the "Turkish Republic of Northern Cyprus" (TRNC), but it is recognized only by Turkey. The latest two-year round of UN-brokered talks—between the leaders of the Greek Cypriot and Turkish Cypriot communities to reach an agreement to reunite the divided island—ended when the Greek Cypriots rejected the UN settlement plan in an April 2004 referendum. The entire island entered the EU on 1 May

2004, although the EU acquis—the body of common rights and obligations—applies only to the areas under direct government control, and is suspended in the areas administered by Turkish Cypriots. However, individual Turkish Cypriots able to document their eligibility for Republic of Cyprus citizenship legally enjoy the same rights accorded to other citizens of European Union states. Nicosia continues to oppose EU efforts to establish direct trade and economic links to north Cyprus as a way of encouraging the Turkish Cypriot community to continue to support reunification.

GEOGRAPHY

Location: Middle East, island in the Mediterranean Sea, south of Turkey

Geographic coordinates: 35 00 N, 33 00 E

GOVERNMENT

Country name:

conventional long form: Republic of Cyprus

conventional short form: Cyprus

local long form: Kypriaki Dimokratia/Kibris Cumhuriyeti

local short form: Kypros/Kibris

note: the Turkish Cypriot community, which administers the northern part of the island, refers to itself as the "Turkish Republic of Northern Cyprus" (TRNC)

Government type: republic

note: a separation of the two ethnic communities inhabiting the island began following the outbreak of communal strife in 1963; this separation was further solidified after the Turkish intervention in July 1974 that followed a Greek junta-supported coup attempt gave the Turkish

Cypriots de facto control in the north; Greek Cypriots control the only internationally recognized government; on 15 November 1983 Turkish Cypriot "President" Rauf DENKTASH declared independence and the formation of a "Turkish Republic of Northern Cyprus" (TRNC), which is recognized only by Turkey

Capital:

name: Nicosia (Lefkosia)

geographic coordinates: 35 10 N, 33 22 E

note: the “Turkish Republic of Northern Cyprus” flag has a white field with narrow horizontal red stripes positioned a small distance from the top and bottom edges between which is centered a red crescent and red five-pointed star

ECONOMY

Economy—overview: The area of the Republic of Cyprus under government control has a market economy dominated by the service sector, which accounts for 76% of GDP. Tourism and financial services are the most important sectors; erratic growth rates over the past decade reflect the economy’s reliance on tourism, which often fluctuates with political instability in the region and economic conditions in Western Europe. Nevertheless, the economy in the area under government control grew a healthy 3.7% to 3.8% per year in 2004, 2005, and 2006, well above the EU average. Cyprus joined the European Exchange Rate Mechanism (ERM2) in May 2005. The government has initiated an aggressive austerity program, which has cut the budget deficit to well below 3%, and the EU is expected to invite Cyprus to adopt the euro as its national currency on 1 January 2008. As in the area administered by Turkish Cypriots, water shortages are a perennial problem; a few desalination plants are now on line. After 10 years of drought, the country received substantial rainfall from 2001–04 alleviating immediate concerns. Rainfall in 2005 and 2006, however, was well below average making water rationing likely in 2007. The Turkish Cypriot economy has roughly 45% of the per capita GDP of the south, and economic growth tends to be volatile, given the north’s relative isola-

tion, bloated public sector, reliance on the Turkish lira, and small market size. The Turkish Cypriot economy grew around 10.6% in 2006, fueled by growth in the construction and education sectors, as well as increased employment of Turkish Cypriots in the area under government control. The Turkish Cypriots are heavily dependent on transfers from the Turkish Government. Ankara directly finances around one-third of the "TRNC's" budget. Aid from Turkey has reached over \$400 million annually in recent years. Agriculture and services, together, employ more than half of the work force.

TRANSNATIONAL ISSUES

Disputes—international: hostilities in 1974 divided the island into two de facto autonomous entities, the internationally recognized Cypriot Government and a Turkish-Cypriot community (north Cyprus); the 1,000-strong UN Peacekeeping Force in Cyprus (UNFICYP) has served in Cyprus since 1964 and maintains the buffer zone between north and south; on 1 May 2004, Cyprus entered the European Union still divided, with the EU's body of legislation and standards (*acquis communautaire*) suspended in the north

Refugees and internally displaced persons: *IDPs:* 210,000 (both Turkish and Greek Cypriots; many displaced for over 30 years) (2006)

Trafficking in persons: *current situation:* Cyprus is primarily a destination country for a large number of women trafficked from Eastern and Central Europe, the Philippines, and the Dominican Republic for the purpose of sexual exploitation; traffickers continued to fraudulently recruit victims for work as dancers in cabarets and nightclubs on short-term "artiste" visas, for work in pubs and bars on employment visas, or for illegal work on tourist or student visas; there were credible reports of female domestic workers from India, Sri Lanka, and the Philippines forced to work excessively long hours and denied proper compensation

tier rating: Tier 2 Watch List—Cyprus does not fully comply with the minimum standards for the elimination of trafficking and failed to show evidence of increasing efforts to address its serious trafficking for sexual exploitation problem; however, it is making significant efforts to do so

Illicit drugs: minor transit point for heroin and hashish via air routes and container traffic to Europe, especially from Lebanon and Turkey; some cocaine transits as well; despite a strengthening of anti-money-laundering legislation, remains vulnerable to money laundering; reporting of suspicious transactions in offshore sector remains weak

CZECH REPUBLIC

INTRODUCTION

Background: Following the First World War, the closely related Czechs and

Slovaks of the former Austro-Hungarian Empire merged to form Czechoslovakia. During the interwar years, the new country's leaders were frequently preoc-

cupied with meeting the demands of other ethnic minorities within the republic, most notably the Sudeten Germans and the Ruthenians (Ukrain-

ians). After World War II, a truncated Czechoslovakia fell within the Soviet sphere of influence. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize Communist party rule and create "socialism with a human face." Anti-Soviet demonstrations the following year ushered in a period of harsh repression. With the collapse of Soviet authority in 1989, Czechoslovakia regained its freedom through a peaceful "Velvet Revolution." On 1 January 1993, the country underwent a "velvet divorce" into its two national components, the Czech Republic and Slovakia. The Czech Republic joined NATO in 1999 and the European Union in 2004.

ECONOMY

Economy—overview: The Czech Republic is one of the most stable and prosperous of the post-Communist states of Central and Eastern Europe. Growth in 2000–05 was supported by exports to the EU, primarily to Germany, and a

strong recovery of foreign and domestic investment. Domestic demand is playing an ever more important role in underpinning growth as interest rates drop and the availability of credit cards and mortgages increases. The current account deficit has declined to around 3% of GDP as demand for Czech products in the European Union has increased. Inflation is under control. Recent accession to the EU gives further impetus and direction to structural reform. In early 2004, the government passed increases in the Value Added Tax (VAT) and tightened eligibility for social benefits with the intention to bring the public finance gap down to 4% of GDP by 2006. However, due to significant increases in social spending in the run-up to June 2006 elections, the government is not likely to meet this goal. Negotiations on pension and healthcare reforms are continuing without clear prospects for agreement and implementation. Privatization of the state-owned telecommunications firm Cesky Telecom took place in 2005. Intensified restructuring among large enterprises, improvements in the financial sector, and effective use of available EU funds should strengthen output growth.

DENMARK

INTRODUCTION

Background: Once the seat of Viking raiders and later a major north European power, Denmark has evolved into a modern, prosperous nation that is participating in the general political and economic integration of Europe. It joined NATO in 1949 and the EEC (now the EU) in 1973. However, the country has opted out of certain elements of the European Union's Maastricht Treaty, including the European Economic and Monetary Union (EMU), European defense cooperation, and issues concerning certain justice and home affairs.

GEOGRAPHY

Location: Northern Europe, bordering the Baltic Sea and the North Sea, on a peninsula north of Germany (Jutland); also includes two major islands (Sjaelland and Fyn)

ECONOMY

Economy—overview: The Danish economy has in recent years undergone strong expansion fueled primarily by private consumption growth, but also sup-

ported by exports and investments. This thoroughly modern market economy features high-tech agriculture, up-to-date small-scale and corporate industry, extensive government welfare measures, comfortable living standards, a stable currency, and high dependence on foreign trade. Unemployment is low and capacity constraints are limiting growth potential. Denmark is a net exporter of food and energy and enjoys a comfortable balance of payments surplus. Government objectives include streamlining the bureaucracy and further privatization of state assets. The government has been successful in meeting, and even exceeding, the economic convergence criteria for participating in the third phase (a common European currency) of the European Economic and Monetary Union (EMU), but Denmark has decided not to join 12 other EU members in the euro. Nonetheless, the Danish krone remains pegged to the euro. Economic growth gained momentum in 2004 and the upturn continued through 2006. The controversy over caricatures of the Prophet Muhammad printed in a Danish newspaper in September 2005 led to boycotts of some Danish exports to the Muslim world, especially exports of dairy products, but the boycotts did not have a significant impact on the overall Danish economy. Because of high GDP per capita, welfare benefits, a low Gini index, and political stability, the Danish living standards are among the highest in the world. A major long-term issue will be the sharp decline in the ratio of workers to retirees.

1977. Hassan Gouled APTIDON installed an authoritarian one-party state and proceeded to serve as president until 1999. Unrest among the Afars minority

during the 1990s led to a civil war that ended in 2001 following the conclusion of a peace accord between Afar rebels and the Issa-dominated government. In

1999, Djibouti's first multi-party presidential elections resulted in the election of Ismail Omar GUELLEH; he was re-elected to a second and final term in 2005. Djibouti occupies a strategic geographic location at the mouth of the Red Sea and serves as an important transshipment location for goods entering and leaving the east African highlands. The present leadership favors close ties to France, which maintains a significant military presence in the country, but is also developing stronger ties with the US. Djibouti hosts the only US military base in sub-Saharan Africa and is a front-line state in the global war on terrorism.

ECONOMY

Economy—overview: The economy is based on service activities connected with the country's strategic location and status as a free trade zone in northeast Africa. Two-thirds of the inhabitants live in the capital city; the remainder are mostly nomadic herders. Scanty rainfall limits crop production to fruits and vegetables, and most food must be imported. Djibouti provides services as both a transit port for the region and an international transshipment and refueling center. Djibouti has few natural resources and little industry. The nation is, therefore, heavily dependent on foreign assistance to help support its balance of payments and to finance development projects. An unemployment rate of 50% continues to be a major problem. While inflation is not a concern, due to the fixed tie of the Djiboutian franc to the US dollar, the artificially high value of the Djiboutian franc adversely affects Djibouti's balance of payments. Per capita consumption dropped an estimated 35% over the last seven years because of recession, civil war, and a high population growth rate (including immigrants and refugees). Faced with a multitude of economic difficulties, the government has fallen in arrears on long-term external debt and has been struggling to meet the stipulations of foreign aid donors.

DOMINICA

INTRODUCTION

Background: Dominica was the last of the Caribbean islands to be colonized by Europeans due chiefly to the fierce resistance of the native Caribs. France ceded possession to Great Britain in 1763, which made the island a colony in 1805. In 1980, two years after independence,

Dominica's fortunes improved when a corrupt and tyrannical administration was replaced by that of Mary Eugenia CHARLES, the first female prime minister in the Caribbean, who remained in office for 15 years. Some 3,000 Carib Indians still living on Dominica are the only pre-Columbian population remaining in the eastern Caribbean.

ECONOMY

Economy—overview: The Dominican economy depends on agriculture, primarily bananas, and remains highly vulnerable to climatic conditions and international economic developments. Tourism has increased as the government seeks to promote Dominica as an “eco-tourism” destination. Development of the tourism industry remains difficult,

however, because of the rugged coastline, lack of beaches, and the absence of an international airport. The government began a comprehensive restructuring of the economy in 2003—including elimination of price controls, privatization of the state banana company, and tax increases—to address Dominica's economic crisis and to meet IMF targets. In order to diversify the island's production base, the government is attempting to develop an offshore financial sector and is planning to construct an oil refinery on the eastern part of the island.

TRANSNATIONAL ISSUES

Disputes—international: Dominica is the only Caribbean state to challenge Venezuela's sovereignty claim over Aves Island and joins the other island nations in challenging whether the feature sustains human habitation, a criterion under the UN Convention on the Law of the Sea (UNCLOS), which permits Venezuela to extend its Exclusive Economic Zone (EEZ) and continental shelf claims over a large portion of the eastern Caribbean Sea

Illicit drugs: transshipment point for narcotics bound for the US and Europe; minor cannabis producer; anti-money-laundering enforcement is weak, making the country particularly vulnerable to money laundering

DOMINICAN REPUBLIC

INTRODUCTION

Background: Explored and claimed by Christopher COLUMBUS on his first voyage in 1492, the island of Hispaniola became a springboard for Spanish conquest of the Caribbean and the American mainland. In 1697, Spain recognized French dominion over the western third of the island, which in 1804 became Haiti. The remainder of the island, by then known as Santo Domingo, sought to gain its own independence in 1821, but was conquered and ruled by the Haitians for 22 years; it finally attained independence as the Dominican Republic in 1844. In 1861, the Dominicans voluntarily returned to the Spanish Empire, but two years later they launched a war that restored independence in 1865. A legacy of unsettled, mostly non-representative rule followed, capped by the dictatorship of Rafael Leonidas TRUJILLO from 1930–61. Juan BOSCH was elected president in 1962, but was deposed in a military coup in 1963. In 1965, the United States led an intervention in the midst of a civil war sparked by an uprising to restore BOSCH. In 1966, Joaquin BALAGUER defeated BOSCH in an election to become president. BALAGUER maintained a tight grip on power for most of the next 30 years when international reaction to flawed elections forced him to curtail his term in 1996. Since then, regular competitive elections have been held in which opposition candidates have won the presidency. Former President (1996–2000) Leonel FERNANDEZ Reyna won election to a second term in 2004 following a constitutional amendment allowing presidents to serve more than one term.

ECONOMY

Economy—overview: The Dominican Republic is a Caribbean representative democracy that enjoyed strong GDP growth until 2003. Although the country has long been viewed primarily as an exporter of sugar, coffee, and tobacco, in recent years the service sector has overtaken agriculture as the economy's largest employer due to growth in tourism and free trade zones. Growth turned negative in 2003 with reduced tourism, a major bank fraud, and limited growth in the US economy (the source of about 80% of export revenues), but recovered in 2004–06. With the help of strict fiscal targets agreed in the 2004 renegotiation of an IMF standby loan, President FERNANDEZ has stabilized the country's financial situation. Although the economy continues to grow at a respectable rate, high unemployment and inflation remain important challenges. The country suffers from marked income inequality; the poorest half of the population receives less than one-fifth of GNP, while the richest 10% enjoys nearly 40% of national income. The Dominican Republic's development prospects improved with the ratification of the Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) in September 2005.

EAST TIMOR

INTRODUCTION

Background: The Portuguese began to trade with the island of Timor in the early 16th century and colonized it in mid-century. Skirmishing with the Dutch in the region eventually resulted in an 1859 treaty in which Portugal ceded the western portion of the island. Imperial Japan occupied East Timor from 1942 to 1945, but Portugal resumed colonial authority after the Japanese defeat in World War II. East Timor declared itself independent from Portugal on 28 November 1975 and was invaded and occupied by Indonesian forces nine days later. It was incorporated into Indonesia in July 1976 as the province of East Timor. An unsuccessful campaign of pacification followed over the next two decades, during which an estimated 100,000 to 250,000 individuals lost their lives. On 30 August 1999, in a UN-supervised popular referendum, an overwhelming majority of the people of East Timor voted for independence from Indonesia. Between the referendum and the arrival of a multinational peacekeeping force in late September 1999, anti-independence Timorese militias—organized and supported by the Indonesian military—commenced a large-scale, scorched-earth campaign of retribution. The militias killed approximately 1,400 Timorese and forcibly pushed 300,000 people into West Timor as refugees. The majority of the country's infrastructure, including homes, irrigation systems, water supply systems, and schools, and nearly 100% of the country's electrical grid were destroyed. On 20 September 1999 the Australian-led peacekeeping troops of the International Force for East Timor (INTERFET) deployed to the country and brought the violence to an end. On 20 May 2002, East Timor was interna-

tionally recognized as an independent state. In March of 2006, a military strike led to violence and a near breakdown of law and order. Over 2,000 Australian, New Zealand, and Portuguese police and peacekeepers deployed to East Timor in late May. Although many of the peacekeepers were replaced by UN police officers, 850 Australian soldiers remained as of 1 January 2007.

ECONOMY

Economy—overview: In late 1999, about 70% of the economic infrastructure of East Timor was laid waste by Indonesian troops and anti-independence militias, and 300,000 people fled westward. Over the next three years, however, a massive international program, manned by 5,000 peacekeepers (8,000 at peak) and 1,300 police officers, led to substantial reconstruction in both urban and rural areas. By the end of 2005, all refugees either returned or resettled in Indonesia. The country faces great challenges in continuing the rebuilding of infrastructure, strengthening the infant civil administration, and generating jobs for young people entering the work force. The development of oil and gas resources in nearby waters has begun to supplement government revenues ahead of schedule and above expectations—the result of high petroleum prices—but the technology-intensive industry does little to create jobs for the unemployed, because there are no production facilities in Timor and the gas is piped to Australia. The parliament in June 2005 unanimously approved the creation of a Petroleum Fund to serve as a repository for all petroleum revenues and preserve the value of East Timor's petroleum wealth for future generations. The mid-2006 outbreak of violence and civil unrest disrupted both private and public sector economic activity. Real non-oil GDP growth in 2006 is estimated to have been negative. The underlying economic policy challenge the country faces remains how best

to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and reduce poverty.

ECUADOR

INTRODUCTION

Background: What is now Ecuador formed part of the northern Inca Empire until the Spanish conquest in 1533. Quito became a seat of Spanish colonial government in 1563 and part of the Viceroyalty of New Granada in 1717. The territories of the Viceroyalty—New Granada (Colombia), Venezuela, and Quito—gained their independence

between 1819 and 1822 and formed a federation known as Gran Colombia. When Quito withdrew in 1830, the traditional name was changed in favor of the “Republic of the Equator.” Between 1904 and 1942, Ecuador lost territories in a series of conflicts with its neighbors. A border war with Peru that flared in 1995 was resolved in 1999. Although Ecuador marked 25 years of civilian governance in 2004, the period has been

marred by political instability. Protests in Quito have contributed to the mid-term ouster of Ecuador’s last three democratically elected Presidents.

ECONOMY

Economy—overview: Ecuador has substantial petroleum resources, which have accounted for 40% of the country's export earnings and one-third of central government budget revenues in recent years. Consequently, fluctuations in world market prices can have a substantial domestic impact. In the late 1990s, Ecuador suffered its worst economic crisis, with natural disasters and sharp declines in world petroleum prices driving Ecuador's economy into free fall in 1999. Real GDP contracted by more than 6%, with poverty worsening significantly. The banking system also collapsed, and Ecuador defaulted on its external debt later that year. The currency depreciated by some 70% in 1999, and, on the brink of hyperinflation, the MAHAUD government announced it would dollarize the economy. A coup, however, ousted MAHAUD from office in January 2000, and after a short-lived junta failed to garner military support, Vice President Gustavo NOBOA took over the presidency. In March 2000, Congress approved a series of structural reforms that also provided the framework for the adoption of the US dollar as legal tender. Dollarization stabilized the economy, and growth returned to its pre-crisis levels in the years that followed. Under the administration of Lucio GUTIERREZ—January 2003 to April 2005—Ecuador benefited from higher world petroleum prices. However, the government under Alfredo PALACIO reversed economic reforms that reduced Ecuador's vulnerability to petroleum price swings and financial crises,

allowing the central government greater access to oil windfalls and disbursing surplus retirement funds.

Illicit drugs: significant transit country for cocaine originating in Colombia and Peru, with over half of the US-bound cocaine passing through Ecuadorian Pacific waters; importer of precursor chemicals used in production of illicit narcotics; attractive location for cash-placement by drug traffickers laundering money because of dollarization and weak anti-money-laundering regime; increased activity on the northern frontier by trafficking groups and Colombian insurgents

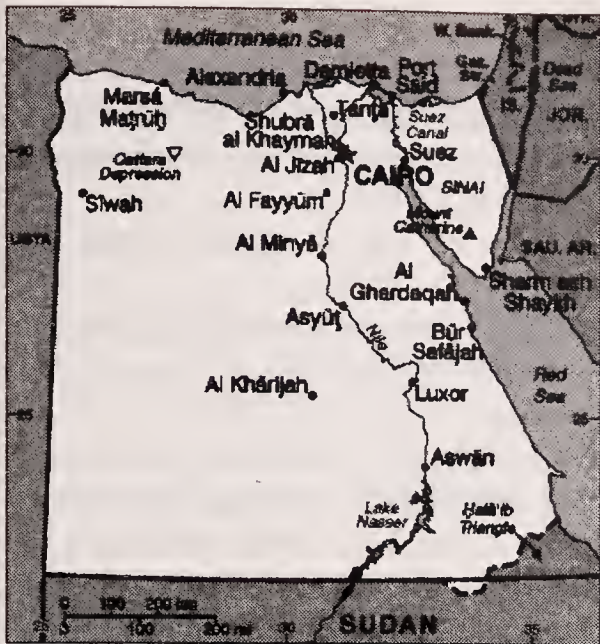

EGYPT

INTRODUCTION

Background: The regularity and richness of the annual Nile River flood, coupled with semi-isolation provided by deserts to the east and west, allowed for the development of one of the world's great civilizations. A unified kingdom arose circa 3200 B.C., and a series of dynasties

ruled in Egypt for the next three millennia. The last native dynasty fell to the Persians in 341 B.C., who in turn were replaced by the Greeks, Romans, and Byzantines. It was the Arabs who introduced Islam and the Arabic language in the 7th century and who ruled for the next six centuries. A local military caste, the Mamluks took control about 1250

and continued to govern after the conquest of Egypt by the Ottoman Turks in 1517. Following the completion of the Suez Canal in 1869, Egypt became an important world transportation hub, but also fell heavily into debt. Ostensibly to protect its investments, Britain seized control of Egypt's government in 1882, but nominal allegiance to the Ottoman

Empire continued until 1914. Partially independent from the UK in 1922, Egypt acquired full sovereignty following World War II. The completion of the Aswan High Dam in 1971 and the resultant Lake Nasser have altered the time-honored place of the Nile River in the agriculture and ecology of Egypt. A rapidly growing population (the largest in the Arab world), limited arable land, and dependence on the Nile all continue to overtax resources and stress society. The government has struggled to ready the economy for the new millennium through economic reform and massive investment in communications and physical infrastructure.

Constitution: 11 September 1971; amended 22 May 1980 and 25 May 2005

Legal system: based on English common law, Islamic law, and Napoleonic codes; judicial review by Supreme Court and Council of State (oversees validity of administrative decisions); accepts compulsory ICJ jurisdiction, with reservations

Suffrage: 18 years of age; universal and compulsory

Executive branch:

chief of state: President Mohammed Hosni MUBARAK (since 14 October 1981)

head of government: Prime Minister Ahmed NAZIF (since 9 July 2004)

cabinet: Cabinet appointed by the president

elections: president elected by popular vote for six-year term (no term limits); note—a national referendum in May 2005 approved a constitutional amendment that changed the presidential election to a multicandidate popular vote; previously the president was nominated by the People's Assembly and the nomination was validated by a national, popular referendum; last referendum held 26 September 1999; first election under terms of constitutional amendment held 7 September 2005; next election scheduled for 2011

election results: Hosni MUBARAK reelected president; percent of vote—Hosni MUBARAK 88.6%, Ayman NOUR 7.6%, Noman GOMAA 2.9%

Legislative branch: bicameral system consists of the People's Assembly or Majlis al-Sha'b (454 seats; 444 elected by popular vote, 10 appointed by the president; members serve five-year terms) and the Advisory Council or Majlis al-Shura that functions only in a consultative role (264 seats; 176 elected by popular vote, 88 appointed by the president; members

serve six-year terms; mid-term elections for half of the elected members)

elections: People's Assembly—three-phase voting—last held 7 and 20 November, 1 December 2005;(next to be held November–December 2010); Advisory Council—last held May–June 2004 (next to be held May–June 2007)

election results: People's Assembly—percent of vote by party—NA; seats by party—NDP 311, NWP 6, Tagammu 2, Tomorrow Party 1, independents 112 (12 seats to be determined by rerun elections, 10 seats appointed by President); Advisory Council—percent of vote by party—NA; seats by party—NA

ECONOMY

Economy—overview: Occupying the northeast corner of the African continent, Egypt is bisected by the highly fertile Nile valley, where most economic activity takes place. In the last 30 years, the government has reformed the highly centralized economy it inherited from President NASSER. In 2005, Prime Minister Ahmed NAZIF reduced personal and corporate tax rates, reduced energy subsidies, and privatized several enterprises. The stock market boomed, and GDP grew about 5% per year in 2005–06. Despite these achievements, the government has failed to raise living standards for the average Egyptian, and has had to continue providing subsidies for basic necessities. The subsidies have contributed to a growing budget deficit—more than 10% of GDP each year—and represent a significant drain on the economy. Foreign direct investment remains low. To achieve higher GDP growth the NAZIF government will need to continue its aggressive pursuit of reform, especially in the energy sector. Egypt's export sectors—particularly natural gas—have bright prospects.

Disputes—International: while Sudan retains claim to the Hala'ib Triangle north of the 1899 Treaty boundary along the 22nd Parallel, both states withdrew their military presence in the 1990s and Egypt has invested in and effectively administers the area; Egypt vigilantly monitors the Sinai and borders with Israel and the Gaza Strip to deter ter-

rorist, smuggling, and other illegal activities; Egypt does not extend domestic asylum to some 70,000 persons who identify themselves as Palestinians but who largely lack UNRWA assistance and, until recently, UNHCR recognition as refugees

Refugees and internally displaced persons:

refugees (country of origin): 60,000—80,000 (Iraq), 70,255 (Palestinian Territories), 13,446 (Sudan) (2006)

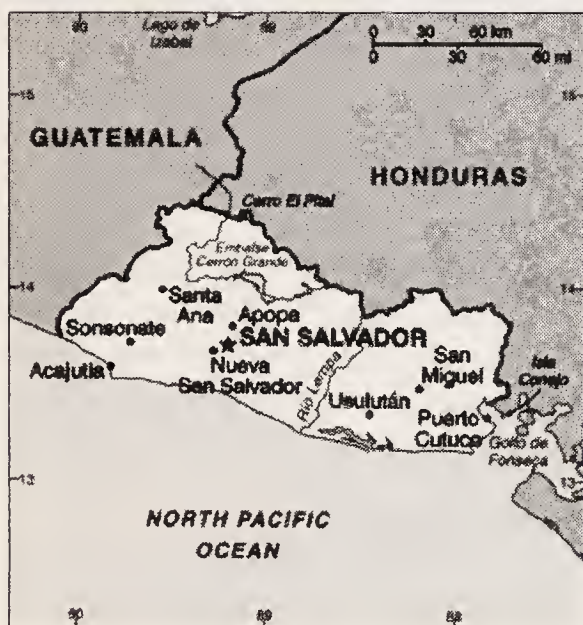

Trafficking in persons:

current situation: Egypt is a transit country for women trafficked from Eastern Europe to Israel for the purpose of sexual exploitation; these women generally arrive as tourists and are subsequently trafficked through the Sinai Desert by Bedouin tribes; men and women from sub-Saharan Africa and

Asia are believed to be trafficked through the Sinai Desert to Israel and Europe for labor exploitation; some Egyptian children from rural areas are trafficked within the country to work as domestic servants or laborers in the agriculture industry

tier rating: Tier 2 Watch List—Egypt is placed on the Tier 2 Watch List for its failure to show evidence of increasing efforts to address trafficking over the past year, particularly in the area of law enforcement

Illicit drugs: transit point for cannabis, heroin, and opium moving to Europe, Israel, and North Africa; transit stop for Nigerian drug couriers; concern as money laundering site due to lax enforcement of financial regulations

EL SALVADOR**INTRODUCTION**

Background: El Salvador achieved independence from Spain in 1821 and from the Central American Federation in 1839. A 12-year civil war, which cost about 75,000 lives, was brought to a close in 1992 when the government and leftist rebels signed a treaty that provided for military and political reforms.

ECONOMY

Economy—overview: The smallest country in Central America, El Salvador has the third largest economy, but growth has been minimal in recent years. Hoping to stimulate the sluggish economy, the government is striving to

open new export markets, encourage foreign investment, and modernize the tax and healthcare systems. Implementation in 2006 of the Central America-Dominican Republic Free Trade Agreement, which El Salvador was the first to ratify, has strengthened an already positive export trend. The trade deficit has been offset by annual remittances from Salvadorans living abroad—equivalent to more than 16% of GDP—and external aid. With the adoption of the US dollar as its currency in 2001, El Salvador has lost control over monetary policy and must concentrate on maintaining a disciplined fiscal policy. The current government has pursued economic diversification, with some success in promoting textile production, international port services, and tourism. It is committed to opening the economy to trade and investment, and has embarked on a wave of privatizations extending to telecom, electricity distribution, banking, and pension funds.

EQUATORIAL GUINEA**INTRODUCTION**

Background: Equatorial Guinea gained independence in 1968 after 190 years of Spanish rule. This tiny country, composed of a mainland portion plus five inhabited islands, is one of the smallest on the African continent. President Teodoro OBIANG NGUEMA MBA-SOGO has ruled the country since 1979 when he seized power in a coup. Although nominally a constitutional democracy since 1991, the 1996 and 2002 presidential elections—as well as the 1999 and 2004 legislative elections—were widely seen as flawed. The president exerts almost total control over the political system and has discouraged political opposition. Equatorial Guinea has experienced rapid economic growth due to the discovery of large offshore oil reserves, and in the last decade has become Sub-Saharan Africa's third largest oil exporter. Despite the country's economic windfall from oil production resulting in a massive increase in government revenue in recent years, there have been few improvements in the population's living standards.

ECONOMY

Economy—overview: The discovery and exploitation of large oil reserves have contributed to dramatic economic growth in recent years. Forestry, farming, and fishing are also major components of GDP. Subsistence farming predominates. Although pre-independence Equatorial Guinea counted on cocoa production for hard currency earnings, the neglect of the rural economy under successive regimes has diminished potential for agriculture-led growth (the government has stated its intention to reinvest some oil revenue into agriculture). A number of aid programs sponsored by the World Bank and the IMF have been cut off since 1993, because of corruption and mismanagement. No longer eligible for concessional financing because of large oil revenues, the government has been trying to agree on a "shadow" fiscal management program with the World Bank and IMF. Government officials and their family members own most businesses. Undeveloped natural resources include titanium, iron ore, manganese, uranium, and alluvial gold. Growth remained strong in 2006, led by oil. Equatorial Guinea now has the fourth highest per capita income in the world, after Luxembourg, Bermuda, and Jersey.

TRANSNATIONAL ISSUES

Disputes—international: in 2002, ICJ ruled on an equidistance settlement of Cameroon-Equatorial Guinea-Nigeria maritime boundary in the Gulf of Guinea, but a dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River and imprecisely defined maritime coordinates in the ICJ decision delay final delimitation; UN urges Equatorial Guinea and Gabon to resolve the sovereignty dispute over Gabon-occupied Mbane and lesser islands and to create a maritime boundary in the hydrocarbon-rich Corisco Bay

Trafficking in persons: *current situation:* Equatorial Guinea is a transit and destination country for women and children trafficked for forced labor, involuntary domestic servitude, and commercial sexual exploitation from surrounding countries—primarily Benin, Nigeria, Mali, and Cameroon; victims work in the agricultural and commercial sectors of Malabo and Bata, where demand is high due to a booming oil sector; children work as farmhands, street vendors, or household servants; girls and women are also trafficked for commercial sexual exploitation

tier rating: Tier 2 Watch List—Equatorial Guinea is placed on the Tier 2 Watch List for its failure to provide adequate evidence of concrete measures to address trafficking during 2005

ERITREA

INTRODUCTION

Background: Eritrea was awarded to Ethiopia in 1952 as part of a federation. Ethiopia's annexation of Eritrea as a province 10 years later sparked a 30-year struggle for independence that ended in 1991 with Eritrean rebels defeating gov-

ernmental forces; independence was overwhelmingly approved in a 1993 referendum. A two-and-a-half-year border war with Ethiopia that erupted in 1998 ended under UN auspices in December 2000. Eritrea currently hosts a UN peacekeeping operation that is monitoring a 25 km-wide Temporary Security

Zone on the border with Ethiopia. An international commission, organized to resolve the border dispute, posted its findings in 2002. However, both parties have been unable to reach agreement on implementing the decision. In November 2006, the international commission informed Eritrea and Ethiopia

they had one year to demarcate the border or the border demarcation would be based on coordinates.

former: Eritrea Autonomous Region in Ethiopia

Government type: transitional government

note: following a successful referendum on independence for the Autonomous Region of Eritrea on 23–25 April 1993, a National Assembly, composed entirely of the People's Front for Democracy and Justice or PFDJ, was established as a transitional legislature; a Constitutional Commission was also established to draft a constitution; ISAIAS Afworki was elected president by the transitional legislature; the constitution, ratified in May 1997, did not enter into effect, pending parliamentary and presidential elections; parliamentary elections were scheduled in December 2001, but were postponed indefinitely; currently the sole legal party is the People's Front for Democracy and Justice (PFDJ)

Capital:

name: Asmara (Asmera)

geographic coordinates: 15 20 N, 38 53 E
time difference: UTC+3 (8 hours ahead of Washington, DC during Standard Time)

Administrative divisions: 6 regions (zobatat, singular—zoba); Anseba, Debub (Southern), Debubawi K'eyih Bahri (Southern Red Sea), Gash Barka, Ma'akel (Central), Semenawi Keyih Bahri (Northern Red Sea)

Independence: 24 May 1993 (from Ethiopia)

National holiday: Independence Day, 24 May (1993)

Constitution: a transitional constitution, decreed on 19 May 1993, was replaced by a new constitution adopted on 23 May 1997, but not yet implemented

Legal system: primary basis is the Ethiopian legal code of 1957, with revisions; new civil, commercial, and penal codes have not yet been promulgated; government also issues unilateral proclamations setting laws and policies; also relies on customary and post-independence-enacted laws and, for civil cases involving Muslims, Islamic law

Suffrage: 18 years of age; universal

Executive branch:

chief of state: President ISAIAS Afworki (since 8 June 1993); note—the president is both the chief of state and head of government and is head of the State Council and National Assembly

head of government: President ISAIAS Afworki (since 8 June 1993)

cabinet: State Council is the collective executive authority; members appointed by the president

elections: president elected by the National Assembly for a five-year term (eligible for a second term); the most recent and only election held 8 June 1993 (next election date uncertain as the National Assembly did not hold a presidential election in December 2001 as anticipated)

election results: ISAIAS Afworki elected president; percent of National Assembly vote—ISAIAS Afworki 95%, other 5%

Legislative branch: unicameral National Assembly (150 seats; members elected by direct popular vote to serve five-year terms)

elections: in May 1997, following the adoption of the new constitution, 75 members of the PFDJ Central Committee (the old Central Committee of the EPLF), 60 members of the 527-member Constituent Assembly, which had been established in 1997 to discuss and ratify the new constitution, and 15 representatives of Eritreans living abroad were formed into a Transitional National Assembly to serve as the country's legislative body until countrywide elections to a National Assembly were held; although only 75 of 150 members of the Transitional National Assembly were elected, the constitution stipulates that once past the transition stage, all members of the National Assembly will be elected by secret ballot of all eligible voters; National Assembly elections scheduled for December 2001 were postponed indefinitely

Judicial branch: High Court—regional, subregional, and village courts; also have military and special courts

Political parties and leaders: People's Front for Democracy and Justice or PFDJ [ISAIAS Afworki] (the only party recognized by the government); note—a

National Assembly committee drafted a law on political parties in January 2001, but the full National Assembly has not yet debated or voted on it

Political pressure groups and leaders:

Eritrean Islamic Jihad or EIJ (also including Eritrean Islamic Jihad Movement or EIJM (also known as the Abu Sihel Movement)); Eritrean Islamic Salvation or EIS (also known as the Arafa Movement); Eritrean Liberation Front or ELF [ABDULLAH Muhammed]; Eritrean National Alliance or ENA (a coalition including EIJ, EIS, ELF, and a number of ELF factions) [HERUY Tedla Biru]; Eritrean Public Forum or EPF [ARADOM Iyob]; Eritrean Democratic Party (EDP) [HAGOS, Mesfin]

ECONOMY

Economy—overview: Since independence from Ethiopia in 1993, Eritrea has faced the economic problems of a small, desperately poor country, accentuated by the recent implementation of restrictive economic policies. Eritrea has a command economy under the control of the sole political party, the People's Front for Democracy and Justice (PFDJ). Like the economies of many African nations, the economy is largely based on subsistence agriculture, with 80% of the population

involved in farming and herding. The Ethiopian-Eritrea war in 1998–2000 severely hurt Eritrea's economy. GDP growth fell to zero in 1999 and to -12.1% in 2000. The May 2000 Ethiopian offensive into northern Eritrea caused some \$600 million in property damage and loss, including losses of \$225 million in livestock and 55,000 homes. The attack prevented planting of crops in Eritrea's most productive region, causing food production to drop by 62%. Even during the war, Eritrea developed its transportation infrastructure, asphaltting new roads, improving its ports, and repairing war-damaged roads and bridges. Since the war ended, the government has maintained a firm grip on the economy, expanding the use of the military and party-owned businesses to complete Eritrea's development agenda. In January 2005, the government essentially banned all imports. The government strictly controls the use of foreign currency, limiting access and availability. Few private enterprises remain in Eritrea. Eritrea's economy is heavily dependent on taxes paid by members of the diaspora. Erratic rainfall and the delayed demobilization of agriculturalists from the military continue to interfere with agricultural production, and Eritrea's recent harvests have not been able to meet the food needs of the country. Eritrea's economic future depends upon its ability to master social problems such as illiteracy, unemployment, and low skills, and more importantly, on the government's willingness to support a true market economy.

ESTONIA**INTRODUCTION**

Background: After centuries of Danish, Swedish, German, and Russian rule, Estonia attained independence in 1918. Forcibly incorporated into the USSR in 1940—an action never recognized by the US—it regained its freedom in 1991, with the collapse of the Soviet Union. Since the last

Russian troops left in 1994, Estonia has been free to promote economic and political ties with Western Europe. It joined both NATO and the EU in the spring of 2004.

GEOGRAPHY

Location: Eastern Europe, bordering the Baltic Sea and Gulf of Finland, between Latvia and Russia

Military branches: Estonian Defense
Forces: Land Force, Navy, Air Force,
Volunteer Defense League (Kaitseliit,
KL) (2006)

Military service age and obligation:

compulsory military service for men
between 19 and 28; conscription lasts 11
months for junior NCOs and reserve pla-
toon leaders; reserve officers and desig-
nated specialists have a different
conscript service obligation; Estonia has
committed to retaining conscription for
men up to 2010 and, unlike Latvia and
Lithuania, has no plan to transition to a
contract armed forces; 17 years of age for

volunteers; reserve commitment up to
the age of 60 (2006)

TRANSNATIONAL ISSUES

Disputes—international: Russia recalled
its signature to the 1996 technical border
agreement with Estonia in 2005, rather
than concede to Estonia's appending pre-
pared a unilateral declaration referencing
Soviet occupation and territorial losses;
Russia demands better accommodation of
Russian-speaking population in Estonia;
Estonian citizen groups continue to press
for realignment of the boundary based on
the 1920 Tartu Peace Treaty that would
bring the now divided ethnic Setu people
and parts of the Narva region within
Estonia; as a member state that forms part
of the EU's external border, Estonia must
implement the strict Schengen border
rules with Russia

Illicit drugs: growing producer of syn-
thetic drugs; increasingly important trans-
shipment zone for cannabis, cocaine,
opiates, and synthetic drugs since joining
the European Union and the Schengen
Accord; potential money laundering
related to organized crime and drug traf-
ficking is a concern, as is possible use of
the gambling sector to launder funds;
major use of opiates and ecstasy

ETHIOPIA

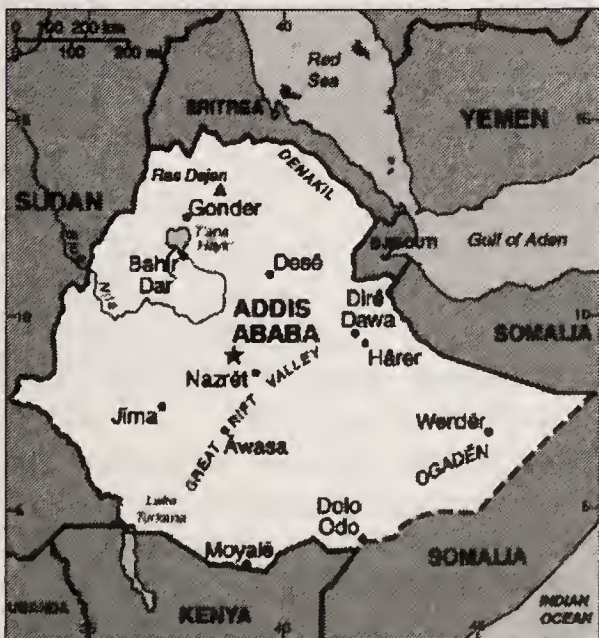

INTRODUCTION

Background: Unique among African
countries, the ancient Ethiopian
monarchy maintained its freedom from
colonial rule with the exception of the
1936–41 Italian occupation during
World War II. In 1974, a military junta,
the Derg, deposed Emperor Haile
SELASSIE (who had ruled since 1930)
and established a socialist state. Torn by
bloody coups, uprisings, wide-scale
drought, and massive refugee problems,
the regime was finally toppled in 1991 by
a coalition of rebel forces, the Ethiopian

People's Revolutionary Democratic Front
(EPRDF). A constitution was adopted in
1994, and Ethiopia's first multiparty elec-
tions were held in 1995. A border war
with Eritrea late in the 1990's ended with
a peace treaty in December 2000. Final
demarcation of the boundary is currently
on hold due to Ethiopian objections to an
international commission's finding
requiring it to surrender territory consid-
ered sensitive to Ethiopia.

Flag description: three equal horizontal bands of green (top), yellow, and red with a yellow pentagram and single yellow rays emanating from the angles between the points on a light blue disk centered on the three bands; Ethiopia is the oldest independent country in Africa, and the three main colors of her flag were so often adopted by other African countries upon independence that they became known as the pan-African colors

ECONOMY

Economy—overview: Ethiopia's poverty-stricken economy is based on agriculture, accounting for almost half of GDP, 60% of exports, and 80% of total employment. The agricultural sector suffers from frequent drought and poor cultivation practices. Coffee is critical to the Ethiopian economy with exports of some \$350 million in 2006, but historically low prices have seen many farmers switching to qat to supplement income.

The war with Eritrea in 1998–2000 and recurrent drought have buffeted the economy, in particular coffee production. In November 2001, Ethiopia qualified for debt relief from the Highly Indebted Poor Countries (HIPC) initiative, and in December 2005 the IMF voted to forgive Ethiopia's debt to the body. Under Ethiopia's land tenure system, the government owns all land and provides long-term leases to the tenants; the system continues to hamper growth in the industrial sector as entrepreneurs are unable to use land as collateral for loans. Drought struck again late in 2002, leading to a 3.3% decline in GDP in 2003. Normal weather patterns helped agricultural and GDP growth recover in 2004–06.

Illicit drugs: transit hub for heroin originating in Southwest and Southeast Asia and destined for Europe, as well as cocaine destined for markets in southern Africa; cultivates qat (khat) for local use and regional export, principally to Djibouti and Somalia (legal in all three countries); the lack of a well-developed financial system limits the country's utility as a money laundering center

FALKLAND ISLANDS (ISLAS MALVINAS)

INTRODUCTION

Background: Although first sighted by an English navigator in 1592, the first landing (English) did not occur until almost a century later in 1690, and the first settlement (French) was not established until 1764. The colony was turned over to Spain two years later and the islands have since been the subject of a territorial dispute, first between Britain and Spain, then between Britain and Argentina. The UK asserted its claim to the islands by establishing a naval garrison there in 1833. Argentina invaded the islands on 2 April 1982. The British responded with an expeditionary force that landed seven weeks later and after fierce fighting forced an Argentine surrender on 14 June 1982.

ECONOMY

Economy—overview: The economy was formerly based on agriculture, mainly sheep farming, but today fishing contributes the bulk of economic activity. In 1987 the government began selling fishing licenses to foreign trawlers operating within the Falkland Islands' exclusive fishing zone. These license fees total more than \$40 million per year, which help support the island's health, education, and welfare system. Squid accounts for 75% of the fish taken. Dairy farming supports domestic consumption; crops furnish winter fodder. Exports feature shipments of high-grade wool to the UK and the sale of postage stamps and coins. The islands are now self-financing except for defense. The British Geological Survey announced a 200-mile oil exploration zone around the islands in 1993, and early seismic surveys suggest substantial reserves capable of producing 500,000 barrels per day; to date, no exploitable site has been identified. An agreement between Argentina and the UK in 1995 seeks to defuse licensing and sovereignty conflicts that would dampen foreign interest in exploiting potential oil reserves. Tourism, especially eco-tourism, is increasing rapidly, with about 30,000 visitors in 2001. Another large source of income is interest paid on money the government has in the bank. The British military presence also provides a sizeable economic boost.

ECONOMY

Economy—overview: The Faroese economy is dependent on fishing, which makes the economy vulnerable to price swings. Since 2003 the Faroese economy has picked up as a result of higher prices for fish and for housing. Unemployment is minimal and government finances are relatively sound. Oil finds close to the Islands give hope for economically

recoverable deposits, which could eventually lay the basis for a more diversified economy and lessen dependence on Danish economic assistance. Aided by a substantial annual subsidy (about 15% of GDP) from Denmark, the Faroese have a standard of living not far below the Danes and other Scandinavians.

FIJI

INTRODUCTION

Background: Fiji became independent in 1970, after nearly a century as a British colony. Democratic rule was interrupted by two military coups in 1987, caused by concern over a government perceived as dominated by the Indian community (descendants of contract laborers brought to the islands by the British in the 19th century). The coups and a 1990 constitution that cemented native Melanesian control of Fiji, led to heavy Indian emigration; the population loss resulted in economic difficulties, but ensured that Melanesians became the majority. A new constitution enacted in 1997 was more equitable. Free and peaceful elections in 1999 resulted in a government led by an Indo-Fijian, but a civilian-led coup in May 2000 ushered in a prolonged period of political turmoil. Parliamentary elections held in August 2001 provided Fiji with a democratically elected government led by Prime Minister Laisenia QARASE. Re-elected in May 2006, QARASE was ousted in a December 2006 military coup led by Commodore Voreqe BAINIMARAMA, who initially appointed himself acting president. In January 2007, BAINIMARAMA was appointed interim prime minister.

ECONOMY

Economy—overview: Fiji, endowed with forest, mineral, and fish resources, is one of the most developed of the Pacific island economies, though still with a large subsistence sector. Sugar exports, remittances from Fijians working abroad, and a growing tourist industry—with 300,000 to 400,000 tourists annually—are the major sources of foreign exchange. Fiji's sugar has special access to European Union markets, but will be harmed by the EU's decision to cut sugar subsidies. Sugar processing makes up one-third of industrial activity but is not efficient. Fiji's tourism industry was damaged by the 2006 coup and is facing an uncertain recovery time. Long-term problems include low investment, uncertain land ownership rights, and the government's inability to manage its budget.

Overseas remittances from Fijians working in Kuwait and Iraq have increased significantly.

FINLAND

INTRODUCTION

Background: Finland was a province and then a grand duchy under Sweden from

the 12th to the 19th centuries, and an autonomous grand duchy of Russia after 1809. It won its complete independence in 1917. During World War II, it was

able to successfully defend its freedom and resist invasions by the Soviet Union—albeit with some loss of territory. In the subsequent half century, the

Finns made a remarkable transformation from a farm/forest economy to a diversified modern industrial economy; per capita income is now on par with Western Europe. A member of the European Union since 1995, Finland was the only Nordic state to join the euro system at its initiation in January 1999.

GEOGRAPHY

ECONOMY

Economy—overview: Finland has a highly industrialized, largely free-market economy with per capita output roughly that of the UK, France, Germany, and Italy. Its key economic sector is manufacturing—principally the wood, metals, engineering, telecommunications, and electronics industries. Trade is impor-

tant; exports equal two-fifths of GDP. Finland excels in high-tech exports, e.g., mobile phones. Except for timber and several minerals, Finland depends on imports of raw materials, energy, and some components for manufactured goods. Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic products. Forestry, an important export earner, provides a secondary occupation for the rural population. High unemployment remains a persistent problem.

FRANCE

INTRODUCTION

Background: Although ultimately a victor in World Wars I and II, France suffered extensive losses in its empire, wealth, manpower, and rank as a domi-

nant nation-state. Nevertheless, France today is one of the most modern countries in the world and is a leader among European nations. Since 1958, it has constructed a presidential democracy resistant to the instabilities experienced

in earlier parliamentary democracies. In recent years, its reconciliation and cooperation with Germany have proved central to the economic integration of Europe, including the introduction of a common exchange currency, the euro, in

January 1999. At present, France is at the forefront of efforts to develop the EU's military capabilities to supplement progress toward an EU foreign policy.

ECONOMY

Economy—overview: France is in the midst of transition from a well-to-do modern economy that has featured extensive government ownership and intervention to one that relies more on

market mechanisms. The government has partially or fully privatized many large companies, banks, and insurers, and has ceded stakes in such leading firms as Air France, France Telecom, Renault, and Thales. It maintains a strong presence in some sectors, particularly power, public transport, and defense industries. The telecommunications sector is gradually being opened to competition. France's leaders remain committed to a capitalism in which they maintain social equity by means of laws, tax policies, and social spending that reduce income disparity and the impact of free markets on public health and welfare. The government in 2006 focused on introducing measures that attempt to boost employment through increased labor market flexibility; however, the population has remained opposed to labor reforms, hampering the government's ability to revitalize the economy. The tax burden remains one of the highest in Europe (nearly 50% of GDP in 2005). The lingering economic slowdown and inflexible budget items probably pushed the budget deficit above the eurozone's 3%-of-GDP limit in 2006; unemployment hovers near 9%. With at least 75 million foreign tourists per year, France is the most visited country in the world and maintains the third largest income in the world from tourism.

TRANSNATIONAL ISSUES

Disputes—International: Madagascar claims the French territories of Bassas da India, Europa Island, Glorioso Islands, and Juan de Nova Island; Comoros

claims Mayotte; Mauritius claims Tromelin Island; territorial dispute between Suriname and the French overseas department of French Guiana; France asserts a territorial claim in Antarctica (Adelie Land); France and Vanuatu claim Matthew and Hunter Islands, east of New Caledonia

Illicit drugs: metropolitan France: transshipment point for South American cocaine, Southwest Asian heroin, and European synthetics

French Guiana: small amount of marijuana grown for local consumption; minor transshipment point to Europe

Martinique: transshipment point for cocaine and marijuana bound for the US and Europe

FRENCH POLYNESIA

INTRODUCTION

Background: The French annexed various Polynesian island groups during the 19th century. In September 1995, France stirred up widespread protests by resuming nuclear testing on the Mururoa atoll after a three-year moratorium. The tests were suspended in January 1996. In recent years, French Polynesia's autonomy has been considerably expanded.

Government—note: under certain acts of France, French Polynesia has acquired autonomy in all areas except those relating to police and justice, monetary policy, tertiary education, immigration, and defense and foreign affairs; the duties of its president are fashioned after those of the French prime minister

ECONOMY

Economy—overview: Since 1962, when France stationed military personnel in

the region, French Polynesia has changed from a subsistence agricultural economy to one in which a high proportion of the work force is either employed by the military or supports the tourist industry. With the halt of French nuclear testing in 1996, the military contribution to the economy fell sharply. Tourism accounts for about one-fourth of GDP and is a primary source of hard currency earnings. Other sources of income are pearl farming and deep-sea commercial fishing. The small manufacturing sector primarily processes agricultural products. The territory benefits substantially from development agreements with France aimed principally at creating new businesses and strengthening social services. **GDP (purchasing power parity):** \$4.58 billion (2003 est.)

FRENCH SOUTHERN AND ANTARCTIC LANDS

INTRODUCTION

Background: In February 2007 the Iles Eparses became an integral part of the French Southern and Antarctic Lands. The Southern Lands are now divided into five administrative districts, two of which are archipelagos, Iles Crozet and Iles Kerguelen; the third is a district composed of two volcanic islands, Ile Saint-Paul and Ile Amsterdam; the

fourth, Iles Eparses, consists of scattered tropical islands around Madagascar. They contain no permanent inhabitants and are visited only by researchers studying the native fauna, fishermen, and military personnel. The fifth district is the Antarctic portion, which consists of "Adelie Land," a thin slice of the Antarctic continent discovered and claimed by the French in 1840.

Ile Amsterdam: The island was discovered in 1522 by Juan Sebastian DEL CANO; and was named Nieuw Amsterdam by a Dutchman. It was claimed by France in 1843. Cattle farming was attempted in 1871, but was short-lived. A French meteorological station was established on the island in 1949 and is still in use.

Ile Saint Paul: Probably discovered in the 1600's by Harwich CLAEZ, a Dutchman, it has been claimed by France since 1893. It was the center of the fishing industry from 1843 to 1914. In 1928 a spiny lobster cannery was established. When the company went bankrupt, seven workers were abandoned and all but two died.

Iles Crozet: A large archipelago formed from the Crozet Plateau, Iles Crozet is divided into two main groups: L'Occidental (the West) includes Ile aux Cochons, Ilots des Agotres, Ile des Pingouins and the reefs Brisants de l'Heroine, and L'Oriental (the east) includes Ile d'Est and Ile de la Possession (the largest island of the Crozets). Marc-Joseph Marion DE FRESNE discovered it in 1772 and claimed it for France. Seals were hunted there, and it was also used as a whaling station. In the beginning, it was a dependency of Madagascar, before becoming a part of the TAAF.

Iles Kerguelen: This island group is made up of one large island (Grand Terre) and about 300 smaller islands and was discovered by Yves-Joseph DE KER-GUELEN-TREMAREC in February 1772. There is a permanent group of 50 to 100 scientists at the main base at Port-aux-Francais.

Adelie Land: The fifth administrative district is on the Antarctic continent. The US Government does not recognize it as a French dependency.

Bassas da India: A French possession since 1897, this atoll is a volcanic seamount surrounded by reefs and awash at high tide.

Europa Island: A French possession since 1897, this atoll is a volcanic seamount surrounded by reefs and awash at high tide.

Glorioso Islands: A French possession since 1892, the Glorioso Islands are composed of two lushly vegetated coral islands (Ile Glorieuse and Ile du Lys) and three rock islets. A military garrison operates a weather and radio station on Ile Glorieuse.

Juan de Nova Island: Named after a famous 15th century Spanish navigator and explorer, the island has been a French possession since 1897. It has been exploited for its guano and phosphate. Presently a small military garrison oversees a meteorological station.

Tromelin Island: First explored by the French in 1776, the island came under the jurisdiction of Reunion in 1814. At present, it serves as a sea turtle sanctuary and is the site of an important meteorological station.

GEOGRAPHY

Location: southeast and east of Africa, islands in the southern Indian Ocean, some near Madagascar and others about equidistant between Africa, Antarctica, and Australia; note—French Southern and Antarctic Lands include Ile Amsterdam, Ile Saint-Paul, Iles Crozet, Iles Kerguelen, and Iles Eparses in the southern Indian Ocean, along with the French-claimed sector of Antarctica, “Adelie Land”; the US does not recognize the French claim to “Adelie Land”

Maritime claims:

territorial sea: 12 nm

exclusive economic zone: 200 nm from Iles Kerguelen and Iles Eparses (does not include the rest of French Southern and

Antarctic Lands); Juan de Nova Island and Tromelin Island claim a continental shelf of 200-m depth or to the depth of exploitation

Climate:

Ile Amsterdam et Ile Saint-Paul: oceanic with persistent westerly winds and high humidity

Iles Crozet: windy, cold, wet, and cloudy

Iles Kerguelen: oceanic, cold, overcast, windy

Iles Eparses: tropical

Terrain:

Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): a volcanic island with steep coastal cliffs; the center floor of the volcano is a large plateau

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): triangular in shape, the island is the top of a volcano, rocky with steep cliffs on the easter side; has active thermal springs

Iles Crozet: a large archipelago formed from the Crozet Plateau is divided into two groups of islands

Iles Kerguelen: the interior of the large island of Grand Terre is composed of rugged terrain of high mountains, hills, valleys, and plains with a number of peninsulas stretching off its coasts

Bassas da India (Iles Eparses): atoll, awash at high tide; shallow (15 m) lagoon

Europa Island, Glorioso Islands, Juan de Nova Island: low, flat, and sandy

Tromelin Island (Iles Eparses): low, flat, sandy; likely volcanic seamount

Elevation extremes:

lowest point: Indian Ocean 0 m

highest point: Mont de la Dives on Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul) 867 m; unnamed location on Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul) 272 m; Pic Marion-Dufresne in Iles Crozet 1,090 m; Mont Ross in Iles Kerguelen 1,850 m; unnamed location on Bassas de India (Iles Eparses) 2.4 m; unnamed location on Europa Island (Iles Eparses) 24 m; unnamed location on Glorioso Islands (Iles Eparses) 12 m; unnamed location on Juan de Nova Island (Iles Eparses) 10 m; unnamed location on Tromelin Island (Iles Eparses) 7 m

Natural resources: fish, crayfish

note: Glorioso Islands and Tromelin Island (Iles Eparses) have guano, phosphates, and coconuts

Land use: Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul)—100% trees, grasses, ferns, and moss; Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul)—100% grass, ferns, and moss; Iles Crozet—100% tussock grass, heath, and fern; Iles Kerguelen—100% tussock grass and Kerguelen cabbage; Bassas da India

(Iles Eparses)—100% rock, coral reef, and sand; Europa Island (Iles Eparses)—100% mangrove swamp and dry woodlands; Glorioso Islands (Iles Eparses)—100% lush vegetation and coconut palms; Juan de Nova Island (Iles Eparses)—90% forest, 10% other; Tromelin Island (Iles Eparses)—100% grasses and scattered brush (2005)

Irrigated land: 0 sq km

Natural hazards: Ile Amsterdam and Ile Saint-Paul are inactive volcanoes; introduction of foreign species on Iles Crozet has caused severe damage to the original ecosystem; overfishing of Patagonia Toothfish; Iles Eparses subject to periodic cyclones; Bassas da India is a maritime hazard since it is under water for a period of three hours prior to and following the high tide and surrounded by reefs

Environment—current issues: NA

Geography—note: islands component is widely scattered across remote locations in the southern Indian Ocean

Bassas da India (Iles Eparses): the atoll is a circular reef that sits atop a long-extinct, submerged volcano

Europa Island and Juan de Nova Island (Iles Eparses): wildlife sanctuary for seabirds and sea turtles

Glorioso Island (Iles Eparses): the islands and rocks are surrounded by an extensive reef system

Tromelin Island (Iles Eparses): climatologically important location for forecasting cyclones in the western Indian Ocean; wildlife sanctuary (seabirds, tortoises)

PEOPLE

Population: no indigenous inhabitants
Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): has no permanent residents but has a meteorological station

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): is uninhabited but is frequently visited by fishermen and has a scientific research cabin for short stays

Iles Crozet: are uninhabited except for 18 to 30 people staffing the Alfred Faure research station on Ile del la Possession

Iles Kerguelen: 50 to 100 scientists are located at the main base at Port-aux-Francais on Grand Terre of Iles Kerguelen
Bassas da India (Iles Eparses): uninhabitable

Europa Island, Glorioso Islands, Juan de Nova Island (Iles Eparses): a small French military garrison and a few meteorologists on each possession; visited by scientists
Tromelin Island (Iles Eparses): uninhabited, except for visits by scientists

GABON

INTRODUCTION

Background: Only two autocratic presidents have ruled Gabon since independence from France in 1960. The current president of Gabon, El Hadj Omar BONGO Ondimba—one of the longest-serving heads of state in the world—has dominated the country's political scene for almost four decades. President BONGO introduced a nominal multi-party system and a new constitution in the early 1990s. However, allegations of electoral fraud during local elections in 2002–03 and the presidential elections in 2005 have exposed the weaknesses of formal political structures in Gabon. Gabon's political opposition remains weak, divided, and financially dependent on the current regime. Despite political conditions, a small population, abundant natural resources, and considerable foreign support have helped make Gabon one of the more prosperous and stable African countries.

ECONOMY

Economy—overview: Gabon enjoys a per capita income four times that of most of sub-Saharan African nations. This has supported a sharp decline in extreme poverty; yet, because of high income

inequality, a large proportion of the population remains poor. Gabon depended on timber and manganese until oil was discovered offshore in the early 1970s. The oil sector now accounts for 50% of GDP. Gabon continues to face fluctuating prices for its oil, timber, and manganese exports. Despite the abundance of natural wealth, poor fiscal management hobbles the economy. Devaluation of its currency by 50% in January 1994 sparked a one-time inflationary surge, to 35%; the rate dropped to 6% in 1996. The IMF provided a one-year standby arrangement in 1994–95, a three-year Enhanced Financing Facility (EFF) at near commercial rates beginning in late 1995, and stand-by credit of \$119 million in October 2000. Those agreements mandated progress in privatization and fiscal discipline. France provided additional financial support in January 1997 after Gabon met IMF targets for mid-1996. In 1997, an IMF mission to Gabon criticized the government for overspending on off-budget items, overborrowing from the central bank, and slipping on its schedule for privatization and administrative reform. The rebound of oil prices in 1999–2000 helped growth, but drops in production hampered Gabon from fully realizing potential gains. In December 2000, Gabon signed a new agreement with the Paris Club to reschedule its official debt. A follow-up bilateral repayment agreement with the US was signed in December 2001. Gabon signed a 14-month Stand-By Arrangement with the IMF in May 2004, and received Paris Club debt rescheduling later that year. Short-term progress depends on an upbeat world economy and fiscal and other adjustments in line with IMF policies.

GAMBIA, THE

INTRODUCTION

Background: The Gambia gained its independence from the UK in 1965. Geographically surrounded by Senegal, it formed a short-lived federation of Senegambia between 1982 and 1989. In

1991 the two nations signed a friendship and cooperation treaty, but tensions have flared up intermittently since then. Yahya A. J. J. JAMMEH led a military coup in 1994 that overthrew the president and banned political activity. A new constitution and presidential elec-

tions in 1996, followed by parliamentary balloting in 1997, completed a nominal return to civilian rule. JAMMEH has been elected president in all subsequent elections, including most recently in late 2006.

ECONOMY

Economy—overview: The Gambia has no confirmed mineral or natural resource deposits and has a limited agricultural base. About 75% of the population depends on crops and livestock for its livelihood. Small-scale manufacturing activity features the processing of peanuts, fish, and hides. Reexport trade normally constitutes a major segment of economic activity, but a 1999 government-imposed preshipment inspection plan, and instability of the Gambian dalasi (currency) have drawn some of the reexport trade away from The Gambia. The Gambia's natural beauty and proximity to Europe has made it one of the larger markets for tourism in West Africa. The government's 1998 seizure of the private peanut firm Alimenta eliminated the largest purchaser of Gambian groundnuts. Despite an announced program to begin privatizing key parastatals, no plans have been made public that would indicate that the government intends to follow through on its promises. Unemployment and underemployment rates remain extremely high; short-run economic progress depends on sustained bilateral and multilateral aid, on responsible government economic management, on continued technical assistance from the IMF and bilateral donors, and on expected growth in the construction sector.

GAZA STRIP

INTRODUCTION

Background: The Israel-PLO Declaration of Principles on Interim Self-Government Arrangements (the DOP), signed in Washington in September 1993, provided for a transitional period of Palestinian interim self-government in the Gaza Strip and the West Bank. A transfer of authority to the Palestinian Authority (PA) for the Gaza Strip and Jericho took place pursuant to the Israel-PLO 4 May 1994 Cairo Agreement on the Gaza Strip and the Jericho Area and, in additional areas of the West Bank, pursuant to the Israel-PLO 28 September 1995 Interim Agreement, the Israel-PLO 15 January 1997 Protocol Concerning Redeployment in Hebron, the Israel-

PLO 23 October 1998 Wye River Memorandum, and the 4 September 1999 Sharm el-Sheikh Agreement. Direct negotiations to determine the permanent status of Gaza and the West Bank began in September 1999 after a three-year hiatus, but were derailed by a second intifadah that broke out a year later. In April 2003, the Quartet (US, EU, UN, and Russia) presented a roadmap to a final settlement of the conflict by 2005 based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. The proposed date for a permanent status agreement has been postponed indefinitely due to violence and accusations that both sides have not followed through on their commitments. Following Palestinian leader Yasir ARAFAT's death in late 2004, Mahmud ABBAS was elected PA president in January 2005. A month later, Israel and the PA agreed to the Sharm el-Sheikh Commitments in an effort to move the peace process forward. In September 2005, Israel withdrew all its settlers and soldiers and dismantled its military facilities in the Gaza Strip and four northern West Bank settlements. Nonetheless, Israel controls maritime, airspace, and most access to the Gaza Strip. A November 2005 PA-Israeli agreement authorized the reopening of the Rafah border crossing between the Gaza Strip

and Egypt under joint PA and Egyptian control. In January 2006, the Islamic Resistance Movement, HAMAS, won control of the Palestinian Legislative Council (PLC). The international community has refused to accept the HAMAS-led government because it does not recognize Israel, will not renounce violence, and refuses to honor previous peace agreements between Israel and the PA. Since March 2006, President Abbas has had little success negotiating with HAMAS to present a political platform acceptable to the international community so as to lift the economic siege on Palestinians. The PLC was unable to convene in late 2006 as a result of Israel's detention of many HAMAS PLC members and Israeli-imposed travel restrictions on other PLC members.

ECONOMY

Economy—overview: High population density, limited land access, and strict internal and external security controls have kept economic conditions in the Gaza Strip—the smaller of the two areas under the Palestinian Authority (PA)—even more degraded than in the West Bank. The beginning of the second intifadah in September 2000 sparked an economic downturn, largely the result of Israeli closure policies; these policies, which were imposed to address security concerns in Israel, disrupted labor and trade access to and from the Gaza Strip. In 2001, and even more severely in 2003, Israeli military measures in PA areas resulted in the destruction of capital, the disruption of administrative structures, and widespread business closures. The Israeli withdrawal from the Gaza Strip in September 2005 offered some medium-term opportunities for economic growth,

which have not yet been realized due to Israeli military activities in the Gaza Strip in 2006, continued crossings closures, and the international community's financial embargo of the PA after HAMAS took office in March 2006.

GEORGIA

INTRODUCTION

Background: The region of present-day Georgia contained the ancient kingdoms of Colchis and Kartli-Iberia. The area came under Roman influence in the first centuries A.D. and Christianity became the state religion in the 330s. Domination by Persians, Arabs, and Turks was followed by a Georgian golden age (11th–13th centuries) that was cut short by the Mongol invasion of 1236. Subsequently, the Ottoman and Persian empires competed for influence in the

region. Georgia was absorbed into the Russian Empire in the 19th century. Independent for three years (1918–1921) following the Russian revolution, it was forcibly incorporated into the USSR until the Soviet Union dissolved in 1991. An attempt by the incumbent Georgian government to manipulate national legislative elections in November 2003 touched off widespread protests that led to the resignation of Eduard SHEVARDNADZE, president since 1995. New elections in early 2004 swept Mikheil SAKASHVILI into

power along with his National Movement party. Progress on market reforms and democratization has been made in the years since independence, but this progress has been complicated by two civil conflicts in the breakaway regions of Abkhazia and South Ossetia. These two territories remain outside the control of the central government and are ruled by de facto, unrecognized governments, supported by Russia. Russian-led peacekeeping operations continue in both regions. The Georgian Government put forward a new peace initiative for the peaceful resolution of the status of South Ossetia in 2005.

ECONOMY

Economy—overview: Georgia's main economic activities include the cultivation of agricultural products such as grapes, citrus fruits, and hazelnuts; mining of manganese and copper; and output of a small industrial sector producing alcoholic and nonalcoholic beverages, metals, machinery, and chemicals. The country imports the bulk of its energy needs, including natural gas and oil products. It has sizeable but underdeveloped hydropower capacity. Despite the severe damage the economy has suffered due to civil strife, Georgia, with the help of the IMF and World Bank, has made substantial economic gains since 2000, achieving positive GDP growth and curbing inflation. Georgia had suffered from a chronic failure to collect tax revenues; however, the new government is making progress and has reformed the tax code, improved tax administration, increased tax enforcement, and cracked down on corruption. Due to concerted reform efforts, collection rates have improved considerably to roughly 60%, both in T'bilisi and throughout the regions. In addition, the reinvigorated privatization process has met with success, supplementing government expenditures on infrastructure, defense, and poverty reduction. Despite customs and financial (tax) enforcement improvements, smuggling remains a drain on the economy. Georgia also suffers from energy shortages due to aging and badly maintained infrastructure, as well as poor management. Continued reform in the management of state-owned power entities is essential to successful privatization and onward sustainability in this sector. The country is pinning its hopes for long-term growth on its role as a transit state for pipelines and trade. The construction on the Baku-T'bilisi-Ceyhan oil pipeline and

the Baku-T'bilisi-Erzurum gas pipeline have brought much-needed investment and job opportunities. Nevertheless, high energy prices have compounded the pressure on the country's inefficient energy sector. Restructuring the sector and finding energy supply alternatives to Russia remain major challenges.

GERMANY

INTRODUCTION

Background: As Europe's largest economy and second most populous nation, Germany is a key member of the continent's economic, political, and defense organizations. European power struggles immersed Germany in two devastating World Wars in the first half of the 20th century and left the country occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the advent of the Cold War, two German states were formed in 1949: the western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The democratic FRG embedded itself in key Western economic and security organizations, the EC, which became the EU, and NATO, while the Communist GDR was on the front line of the Soviet-led Warsaw Pact. The decline of the USSR and the end of the Cold War allowed for German unification in 1990. Since then, Germany has expended considerable funds to bring Eastern productivity and wages up to Western standards. In January 1999, Germany and 10 other EU countries introduced a common European exchange currency, the euro.

ECONOMY**Economy—overview:**

Germany's affluent and technologically powerful economy—the fifth largest in the world in PPP terms—showed considerable improvement in 2006 with 2.2% growth. After a long period of stagnation with an average growth rate of 0.7% between 2001–05 and chronically high unemployment, stronger growth has led to a considerable fall in unemployment to about 7% at the end of 2006. Among the most important reasons for Germany's high unemployment during the past decade were macroeconomic stagnation, the declining level of investment in plant and equipment, company restructuring, flat domestic consumption, structural rigidities in the labor market, lack of competition in the service sector, and high interest rates. The modernization and integration of the eastern German economy continues to be a costly long-term process, with annual transfers from west to east amounting to roughly \$80 billion. The former government of Chancellor Gerhard SCHROEDER launched a comprehensive set of reforms of labor market and welfare-related institutions. The current government of Chancellor Angela MERKEL has initiated other reform measures, such as a gradual increase in the mandatory retirement age from 65 to 67 and measures to increase female participation in the labor market. Germany's aging population, combined with high chronic unemployment, has pushed social security outlays to a level exceeding contributions, but higher government revenues from the cyclical upturn in 2006 reduced Germany's budget deficit to within the EU's 3% debt limit. Corporate restructuring and growing capital markets are setting the foundations that could help Germany meet the long-term challenges of European economic integration and globalization.

GHANA

INTRODUCTION

Background: Formed from the merger of the British colony of the Gold Coast and the Togoland trust territory, Ghana in

1957 became the first sub-Saharan country in colonial Africa to gain its independence. A long series of coups resulted in the suspension of Ghana's third constitution in 1981 and a ban on political parties. A new constitution, restoring multiparty politics, was approved in 1992. Lt. Jerry RAWLINGS, head of state since 1981, won presidential elections in 1992 and 1996, but was constitutionally prevented from running for a third term in 2000. John KUFUOR, who defeated former Vice President John ATTA-MILLS in a free and fair election, succeeded him.

ECONOMY

Economy—overview: Well endowed with natural resources, Ghana has roughly twice the per capita output of the poorest countries in West Africa. Even so, Ghana remains heavily dependent on international financial and technical assistance. Gold, timber, and cocoa production are major sources of foreign exchange. The domestic economy continues to revolve around subsistence agriculture, which accounts for 37% of GDP and employs 60% of the work force, mainly small landholders. Ghana opted for debt relief under the Heavily Indebted Poor Country (HIPC) program in 2002, but was included in a G-8 debt relief program decided upon at the Gleneagles Summit in July 2005. Priorities under its current \$38 million Poverty Reduction and Growth Facility (PRGF) include tighter monetary and fiscal policies, accelerated privatization,

and improvement of social services. Receipts from the gold sector helped sustain GDP growth in 2006 along with record high prices for Ghana's largest cocoa crop to date. Ghana received a Millennium Challenge Corporation (MCC) grant in 2006, which aims to assist in transforming Ghana's agricultural export sector.

GIBRALTAR

INTRODUCTION

Background: Strategically important, Gibraltar was reluctantly ceded to Great Britain by Spain in the 1713 Treaty of Utrecht; the British garrison was formally declared a colony in 1830. In a referendum held in 1967, Gibraltarians voted overwhelmingly to remain a British dependency. Although the current 1969 Constitution for Gibraltar states that the British Government will never allow the people of Gibraltar to pass under the sovereignty of another state against their freely and democratically expressed wishes, a series of talks were

held by the UK and Spain between 1997 and 2002 on establishing temporary joint sovereignty over Gibraltar. In response to these talks, the Gibraltarian Government set up a referendum in late 2002 in which a majority of the citizens voted overwhelmingly against any sharing of sovereignty with Spain. Since the referendum, tripartite talks have been held with Spain, the UK, and Gibraltar, and in September 2006 a three-way agreement was signed. Spain agreed to allow airlines other than British to serve Gibraltar, to speed up customs procedures, and to add more telephone lines into Gibraltar. Britain agreed to pay pensions to Spaniards who had been employed in Gibraltar before the border closed in 1969. Spain will be allowed to open a cultural institute from which the Spanish flag will fly.

ECONOMY

Economy—overview: Self-sufficient Gibraltar benefits from an extensive shipping trade, offshore banking, and its position as an international conference center. The British military presence has been sharply reduced and now contributes about 7% to the local economy, compared with 60% in 1984. The financial sector, tourism (almost 5 million visitors in 1998), shipping services fees, and duties on consumer goods also generate revenue. The financial sector, the shipping sector, and tourism each contribute 25%–30% of GDP. Telecommunications accounts for another 10%. In recent years, Gibraltar has seen major structural change from a public to a private sector economy, but changes in government spending still have a major impact on the level of employment.

GREECE

INTRODUCTION

Background: Greece achieved independence from the Ottoman Empire in 1829. During the second half of the 19th cen-

tury and the first half of the 20th century, it gradually added neighboring islands and territories, most with Greek-speaking populations. In World War II, Greece was first invaded by Italy (1940) and subsequently occupied by Germany (1941–44); fighting endured in a protracted civil war between supporters of the king and Communist rebels. Following the latter's defeat in 1949, Greece joined NATO in 1952. A military dictatorship, which in 1967 suspended many political liberties and forced the king to flee the country, lasted seven years. The 1974 democratic elections and a referendum created a parliamentary republic and abolished the monarchy. In 1981 Greece joined the EC (now the EU); it became the 12th member of the euro zone in 2001.

ECONOMY

Economy—overview: Greece has a capitalist economy with the public sector

accounting for about 40% of GDP and with per capita GDP at least 75% of the leading euro-zone economies. Tourism provides 15% of GDP. Immigrants make up nearly one-fifth of the work force, mainly in agricultural and unskilled jobs. Greece is a major beneficiary of EU aid, equal to about 3.3% of annual GDP. The Greek economy grew by nearly 4.0% per year between 2003 and 2006, due partly to infrastructural spending related to the 2004 Athens Olympic Games, and in part to an increased availability of credit, which has sustained record levels of consumer spending. Greece violated the EU's Growth and Stability Pact budget deficit criteria of no more than 3% of GDP from 2001 to 2005, but finally appears on track to meet that criteria in 2006. Public debt, inflation, and unemployment are above the euro-zone average, but are falling. The Greek Government continues to grapple with cutting government spending, reducing the size of the public sector, and reforming the labor and pension systems, in the face of often vocal opposition from the country's powerful labor unions and the general public.

TRANSNATIONAL ISSUES

Disputes—International: Greece and Turkey continue discussions to resolve their complex maritime, air, territorial, and boundary disputes in the Aegean Sea; Cyprus question with Turkey; Greece rejects the use of the name Macedonia or Republic of Macedonia; the mass migration of unemployed Albanians still remains a problem for developed countries, chiefly Greece and Italy

Illicit drugs: a gateway to Europe for traffickers smuggling cannabis and heroin from the Middle East and Southwest Asia to the West and precursor chemicals to the East; some South American cocaine transits or is consumed in Greece; money laundering related to drug trafficking and organized crime

GREENLAND

INTRODUCTION

Background: Greenland, the world's largest island, is about 81% ice-capped. Vikings reached the island in the 10th century from Iceland; Danish colonization began in the 18th century, and Greenland was made an integral part of

Denmark in 1953. It joined the European Community (now the EU) with Denmark in 1973, but withdrew in 1985 over a dispute centered on stringent fishing quotas. Greenland was granted self-government in 1979 by the Danish parliament; the law went into effect the following year. Denmark con-

tinues to exercise control of Greenland's foreign affairs in consultation with Greenland's Home Rule Government.

ECONOMY

Economy—overview: The economy remains critically dependent on exports of fish and substantial support from the Danish Government, which supplies about half of government revenues. The public sector, including publicly-owned

enterprises and the municipalities, plays the dominant role in the economy. Several interesting hydrocarbon and mineral exploration activities are ongoing. Press reports in early 2007 indicated that two international aluminum companies were considering building smelters in Greenland to take advantage of local hydropower potential. Tourism is the only sector offering any near-term potential, and even this is limited due to a short season and high costs. Air Greenland announced plans to begin summer-season direct flights to the U.S. east coast in May 2007 potentially opening a major new tourism market.

GRENADA

INTRODUCTION

Background: Carib Indians inhabited Grenada when COLUMBUS discovered the island in 1498, but it remained uncolonized for more than a century. The French settled Grenada in the 17th century, established sugar estates, and imported large numbers of African slaves. Britain took the island in 1762 and vigorously expanded sugar production. In the 19th century, cacao eventually surpassed sugar as the main export crop; in the 20th century, nutmeg became the leading export. In 1967, Britain gave Grenada autonomy over its internal affairs. Full independence was attained in 1974 making Grenada one of the smallest independent countries in the Western Hemisphere. Grenada was seized by a Marxist military council on 19 October 1983. Six days later the island was invaded by US forces and those of six other Caribbean nations, which quickly captured the ringleaders and their hundreds of Cuban advisers. Free elections were reinstated the following year and have continued since that time. Hurricane Ivan struck Grenada in September of 2004 causing severe damage.

ECONOMY

Economy—overview: Guatemala is the largest and most populous of the Central American countries with a GDP per capita roughly one-half that of Brazil, Argentina, and Chile. The agricultural

sector accounts for about one-fourth of GDP, two-fifths of exports, and half of the labor force. Coffee, sugar, and bananas are the main products. The 1996 signing of peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investment, and Guatemala since then has pursued important reforms and macroeconomic stabilization. On 1 July 2006, the Central American Free Trade Agreement (CAFTA) entered in to force between the US and Guatemala. The distribution of income remains highly unequal with about 56% of the population below the poverty line. Other ongoing challenges include increasing government revenues, negotiating further assistance from international donors, upgrading both government and private financial operations, curtailing drug trafficking, and narrowing the trade deficit. Remittances from a large expatriate community that moved to the United States during the war have become the primary source of foreign income, exceeding the total value of exports and tourism combined.

TRANSNATIONAL ISSUES

Disputes—International: annual ministerial meetings under the OAS-initiated Agreement on the Framework for Negotiations and Confidence Building Measures continue to address Guatemalan land and maritime claims in Belize and the Caribbean Sea; the Line of Adjacency created under the 2002 Differendum serves in lieu of the contiguous international boundary to control squatting in the sparsely inhabited rain forests of Belize's border region; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States

Refugees and internally displaced persons: *IDPs:* undetermined (estimates vary from none to 1 million displaced from government's scorched-earth offensive in 1980s against indigenous people) (2006)

Illicit drugs: major transit country for cocaine and heroin; in 2005, cultivated 100 hectares of opium poppy after reemerging as a potential source of opium in 2004; potential production of less than 1 metric ton of pure heroin; marijuana cultivation for mostly domestic consumption; proximity to Mexico makes Guatemala a major staging area for drugs (particularly for cocaine); money laundering is a serious problem; corruption is a major problem

GUERNSEY

INTRODUCTION

Background: Guernsey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy, which held sway in both France and England. The islands were the only British soil occupied by German

troops in World War II. Guernsey is a British crown dependency, but is not part of the UK. However, the UK Government is constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Financial services—banking, fund management, insurance—account for about 23% of employment and 32% of total income in this tiny, prosperous Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Financial services, construction, retail, and the public sector have been growing. Light tax and death duties make Guernsey a popular tax haven. The evolving economic integration of the EU nations is changing the environment under which Guernsey operates.

GUINEA

INTRODUCTION

Background: Guinea has had only two presidents since gaining its independence from France in 1958. Lansana CONTE came to power in 1984 when the military seized the government after the death of the first president, Sekou TOURE. Guinea did not hold democratic elections until 1993 when Gen. CONTE (head of the military government) was elected president of the civilian government. He was reelected in 1998 and again in 2003. Guinea has maintained its internal stability despite spillover effects from conflict in Sierra Leone and Liberia. As those countries have rebuilt, Guinea's own vulnerability to political and economic crisis has increased. In 2006, declining economic conditions and popular dissatisfaction with corruption and bad governance prompted two massive strikes that sparked urban unrest in many Guinean cities.

ECONOMY

Economy—overview: Guinea possesses major mineral, hydropower, and agricultural resources, yet remains an underdeveloped nation. The country has almost half of the world's bauxite reserves and is the second-largest bauxite producer. The mining sector accounts for over 70% of exports. Long-run improvements in government fiscal arrangements, literacy, and the legal framework are needed if the country is to move out of poverty. Investor confidence has been sapped by rampant corruption, a lack of electricity and other infrastructure, a lack of skilled workers, and the political uncertainty

due to the failing health of President Lansana CONTE. Guinea is trying to reengage with the IMF and World Bank, which cut off most assistance in 2003, and is working closely with technical advisors from the U.S. Treasury Department, the World Bank and IMF, seeking to return to a fully funded program. Growth rose slightly in 2006, primarily due to increases in global demand and commodity prices on world markets, but the standard of living fell. The Guinea franc depreciated sharply as the prices for basic necessities like food and fuel rose beyond the reach of most Guineans. Dissatisfaction with economic conditions prompted nationwide strikes in February and June 2006.

GUINEA-BISSAU

INTRODUCTION

Background: Since independence from Portugal in 1974, Guinea-Bissau has experienced considerable political and military upheaval. In 1980, a military coup established authoritarian dictator Joao Bernardo 'Nino' VIEIRA as president. Despite setting a path to a market economy and multiparty system, VIEIRA's regime was characterized by the suppression of political opposition and the purging of political rivals. Several coup attempts through the 1980s and early 1990s failed to unseat him. In 1994 VIEIRA was elected president in the country's first free elections. A military mutiny and resulting civil war in 1998 eventually led to VIEIRA's ouster in May 1999. In February 2000, a transitional government turned over power to opposition leader Kumba YALA, after he was elected president in transparent polling. In September 2003, after only three years in office, YALA was ousted by the military in a bloodless coup, and businessman Henrique ROSA was sworn in as interim president. In 2005, former President VIEIRA was re-elected president pledging to pursue economic development and national reconciliation.

ECONOMY

Economy—overview: One of the 10 poorest countries in the world, Guinea-Bissau depends mainly on farming and fishing. Cashew crops have increased remarkably in recent years, and the country now ranks sixth in cashew production. Guinea-Bissau exports fish and seafood along with small amounts of peanuts, palm kernels, and timber. Rice is the major crop and staple food. However, intermittent fighting between Senegalese-backed government troops and a military junta destroyed much of

the country's infrastructure and caused widespread damage to the economy in 1998; the civil war led to a 28% drop in GDP that year, with partial recovery in 1999–2002. Before the war, trade reform and price liberalization were the most successful part of the country's structural adjustment program under IMF sponsorship. The tightening of monetary policy and the development of the private sector had also begun to reinvigorate the economy. Because of high costs, the development of petroleum, phosphate, and other mineral resources is not a near-term prospect. However, offshore oil prospecting has begun and could lead to much-needed revenue in the long run. The inequality of income distribution is one of the most extreme in the world. The government and international donors continue to work out plans to forward economic development from a lamentably low base. In December 2003, the World Bank, IMF, and UNDP were forced to step in to provide emergency budgetary support in the amount of \$107 million for 2004, representing over 80% of the total national budget. Government drift and indecision, however, resulted in continued low growth in 2002–06.

GUYANA

INTRODUCTION

Background: Originally a Dutch colony in the 17th century, by 1815 Guyana had become a British possession. The abolition of slavery led to black settlement of urban areas and the importation of indentured servants from India to work the sugar plantations. This ethnocultural divide has persisted and has led to turbulent politics. Guyana achieved independence from the UK in 1966, and since then it has been ruled mostly by socialist-oriented governments. In 1992, Cheddi JAGAN was elected president in what is considered the

country's first free and fair election since independence. After his death five years later, his wife, Janet JAGAN, became president but resigned in 1999 due to poor health. Her successor, Bharrat JAGDEO, was reelected in 2001 and again in 2006.

ECONOMY

Economy—overview: The Guyanese economy exhibited moderate economic growth in 2001–02, based on expansion in the agricultural and mining sectors, a more favorable atmosphere for business initiatives, a more realistic exchange rate, fairly low inflation, and the continued support of international organizations. Chronic problems include a shortage of skilled labor and a deficient infrastructure. The government is jug-

gling a sizable external debt against the urgent need for expanded public investment. The Inter-American Development Bank in November 2006 canceled Guyana's nearly \$400 million debt with the Bank. The bauxite mining sector should benefit in the near term from restructuring and partial privatization. Export earnings from agriculture and mining have fallen sharply, while the import bill has risen, driven by higher energy prices. Guyana's entrance into the Caricom Single Market and Economy (CSME) in January 2006 will broaden the country's export market, primarily in the raw materials sector.

HAITI

INTRODUCTION

Background: The native Taino Amerindians—who inhabited the island of Hispaniola when it was discovered by COLUMBUS in 1492—were virtually annihilated by Spanish settlers within 25 years. In the early 17th century, the French established a presence on Hispaniola, and in 1697, Spain ceded to the French the western third of the island, which later became Haiti. The French colony, based on forestry and sugar-related industries, became one of the wealthiest in the Caribbean, but only through the heavy importation of African slaves and considerable environmental degradation. In the late 18th century, Haiti's nearly half million slaves revolted under Toussaint L'OUVERTURE. After a prolonged struggle, Haiti became the first black republic to declare its independence in 1804. The poorest country in the Western Hemisphere, Haiti has been plagued by political violence for most of its history. After an armed rebellion led to the departure of President Jean-Bertrand ARISTIDE in February 2004, an interim government took office to organize new elections under the auspices of the United Nations Stabilization Mission in Haiti (MINUSTAH). Continued violence and technical delays prompted repeated postponements, but Haiti finally did inaugurate a democratically elected president and parliament in May of 2006.

ECONOMY

Economy—overview: Haiti is the poorest country in the Western Hemisphere, with 80% of the population living under the poverty line and 54% in abject poverty. Two-thirds of all Haitians depend on the agriculture sector, mainly small-scale subsistence farming, and remain vulnerable to damage from frequent natural disasters, exacerbated by the country's widespread deforestation. A macroeconomic program developed in 2005 with the help of the International Monetary Fund helped the economy grow 1.8% in 2006, the highest growth rate since 1999. Haiti suffers from higher inflation than similar low-income countries, a lack of investment, and a severe trade deficit. In 2005, Haiti paid its arrears to the World Bank, paving the way for reengagement with the Bank. The government relies on formal international economic assistance for fiscal sustainability. In 2006, Haiti held a successful donors conference in which the total aid pledged exceeded Haiti's request. Remittances are the primary source of foreign exchange, equaling nearly a quarter of GDP.

INTRODUCTION

Background: Popes in their secular role ruled portions of the Italian peninsula for

more than a thousand years until the mid 19th century, when many of the Papal States were seized by the newly united Kingdom of Italy. In 1870, the pope's holdings were further circumscribed when Rome itself was annexed. Disputes between a series of "prisoner" popes and Italy were resolved in 1929 by three Lateran Treaties, which established the independent state of Vatican City and granted Roman Catholicism special status in Italy. In 1984, a concordat between the Holy See and Italy modified certain of the earlier treaty provisions, including the primacy of Roman Catholicism as the Italian state religion. Present concerns of the Holy See include religious freedom, international development, the Middle East, terrorism, inter-religious dialogue and reconciliation,

and the application of church doctrine in an era of rapid change and globalization. About 1 billion people worldwide profess the Catholic faith.

ECONOMY

Economy—overview: This unique, non-commercial economy is supported financially by an annual contribution (known as Peter's Pence) from Roman Catholic dioceses throughout the world; by the sale of postage stamps, coins, medals, and tourist mementos; by fees for admission to museums; and by the sale of publications. Investments and real estate income also account for a sizable portion of revenue. The incomes and living standards of lay workers are comparable to those of counterparts who work in the city of Rome.

HONDURAS**INTRODUCTION**

Background: Once part of Spain's vast empire in the New World, Honduras became an independent nation in 1821. After two and a half decades of mostly military rule, a freely elected civilian government came to power in 1982. During the 1980s, Honduras proved a haven for anti-Sandinista contras fighting the Marxist Nicaraguan Government and an ally to Salvadoran Government forces fighting leftist guerrillas. The country was devastated by Hurricane Mitch in 1998, which killed about 5,600 people and caused approximately \$2 billion in damage.

GEOGRAPHY

Location: Central America, bordering the Caribbean Sea, between Guatemala and Nicaragua and bordering the Gulf of Fonseca (North Pacific Ocean), between El Salvador and Nicaragua

Geographic coordinates: 15 00 N, 86 30 W

Coastline: 820 km

Maritime claims:

territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: natural extension of territory or to 200 nm

Climate: subtropical in lowlands, temperate in mountains

Terrain: mostly mountains in interior, narrow coastal plains

Elevation extremes:

lowest point: Caribbean Sea 0 m

highest point: Cerro Las Minas 2,870 m

Natural resources: timber, gold, silver, copper, lead, zinc, iron ore, antimony, coal, fish, hydropower

Land use:

arable land: 9.53%

permanent crops: 3.21%

other: 87.26% (2005)

Irrigated land: 800 sq km (2003)

Natural hazards: frequent, but generally mild, earthquakes; extremely susceptible to damaging hurricanes and floods along the Caribbean coast

Environment—current issues: urban population expanding; deforestation results from logging and the clearing of land for agricultural purposes; further land degradation and soil erosion hastened by uncontrolled development and improper land use practices such as farming of marginal lands; mining activities polluting Lago de Yojoa (the country's largest source of fresh water), as well as several rivers and streams, with heavy metals

Environment—international agreements:

ECONOMY

Economy—overview: Honduras, the second poorest country in Central America and one of the poorest countries in the Western Hemisphere, with an extraordinarily unequal distribution of income and massive unemployment, is banking on expanded trade under the US-Central America Free Trade Agreement (CAFTA) and on debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. The country has met most of its macroeconomic targets, and began a three-year IMF Poverty Reduction and Growth Facility (PRGF) program in February 2004. The economy relies heavily on a narrow range of exports, notably bananas and coffee, making it vulnerable to natural disasters and shifts in commodity prices, but in recent years has experienced a rapid rise in exports of light manufacturers. Growth remains dependent on the

economy of the US, its largest trading partner, and on reduction of the high crime rate, as a means of attracting and maintaining investment.

a joint ecological park around the cays should Guatemala consent to a maritime corridor in the Caribbean under the OAS-sponsored 2002 Belize-Guatemala Differendum; memorials and counter-memorials were filed by the parties in

Nicaragua's 1999 and 2001 proceedings against Honduras and Colombia at the ICJ over the maritime boundary and territorial claims in the western Caribbean Sea—final public hearings are scheduled for 2007

HONG KONG

INTRODUCTION

Background: Occupied by the UK in 1841, Hong Kong was formally ceded by China the following year; various adjacent lands were added later in the 19th century. Pursuant to an agreement signed by China and the UK on 19 December 1984, Hong Kong became the Hong Kong Special Administrative Region (SAR) of China on 1 July 1997. In this agreement, China has promised that, under its "one country, two systems" formula, China's socialist economic system will not be imposed on Hong Kong and that Hong Kong will enjoy a high degree of autonomy in all matters except foreign and defense affairs for the next 50 years.

ECONOMY

Economy—overview: Hong Kong has a free market economy highly dependent on international trade. The territory has become more closely linked to mainland China over the past few years. Even before Hong Kong reverted to Chinese administration on 1 July 1997, it had extensive trade and investment ties with China. Hong Kong's service industry over the past decade has grown rapidly as its manufacturing industry has moved to the mainland. Hong Kong also has stepped up its efforts to gain approval to offer more mainland financial services in a bid to remain competitive with China's growing financial centers. Hong Kong's natural resources are limited, and food and raw materials must be imported. Gross imports and exports (including reexports to and from third countries) each exceed GDP in dollar value. Per capita GDP exceeds that of the four big economies of Western Europe. GDP growth averaged a strong 5% from 1989 to 2006, but Hong Kong suffered two recessions in the past eight years because of the Asian financial crisis in 1997–98 and the global downturn in 2001–02. Although the Severe Acute Respiratory Syndrome (SARS) outbreak in 2003 also

battered Hong Kong's economy, a solid rise in exports, a boom in tourism from the mainland because of China's easing of travel restrictions, and a return of consumer confidence resulted in the resumption of strong growth from late 2003 through 2006. Moreover, several large initial public offerings of Chinese companies on the Hong Kong stock exchange since late 2005 have helped to boost Hong Kong's status as a financial hub and have contributed to the improved performance of the market in late 2006.

HUNGARY

INTRODUCTION

Background: Hungary was part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under Communist rule following World War II. In 1956, a revolt and an announced withdrawal from the Warsaw Pact were met with a

massive military intervention by Moscow. Under the leadership of Janos KADAR in 1968, Hungary began liberalizing its economy, introducing so-called "Goulash Communism." Hungary held its first multiparty elections in 1990 and initiated a free market economy. It joined NATO in 1999 and the EU in 2004.

ECONOMY

Economy—overview: Hungary has made the transition from a centrally planned to a market economy, with a per capita income nearly two-thirds that of the EU-25 average. Hungary continues to demonstrate strong economic growth and acceded to the EU in May 2004. The private sector accounts for over 80% of GDP. Foreign ownership of and investment in Hungarian firms are widespread, with cumulative foreign direct investment totaling more than \$60 billion since 1989. Hungary issues investment-grade sovereign debt. International observers, however, have expressed concerns over Hungary's fiscal and current account deficits. Inflation has declined from 14% in 1998 to 3.7% in 2006. Unemployment has persisted above 6%. Hungary's labor force participation rate of 57% is one of the lowest in the Organization for Economic Cooperation and Development (OECD). Germany is by far Hungary's largest economic partner. Policy challenges include cut-

ting the public sector deficit to 3% of GDP by 2008, from about 6.5% in 2006, and tackling a persistent trade deficit. The current government has announced and begun to implement an austerity program designed to address these issues, leading to eventual adoption of the euro.

TRANSNATIONAL ISSUES

Disputes—international: bilateral government, legal, technical and economic working group negotiations continue in 2006 with Slovakia over Hungary's failure to complete its portion of the Gabcikovo-Nagymaros hydroelectric dam project along the Danube; as a member state that forms part of the EU's external border, Hungary must implement the strict Schengen border rules

Illicit drugs: transshipment point for Southwest Asian heroin and cannabis and for South American cocaine destined for Western Europe; limited producer of precursor chemicals, particularly for amphetamine and methamphetamine; efforts to counter money laundering, related to organized crime and drug trafficking, are improving, but remain vulnerable; significant consumer of ecstasy

ICELAND

INTRODUCTION

Background: Settled by Norwegian and Celtic (Scottish and Irish) immigrants during the late 9th and 10th centuries A.D., Iceland boasts the world's oldest functioning legislative assembly, the Althing, established in 930. Independent for over 300 years, Iceland was subsequently ruled by Norway and Denmark. Fallout from the Askja volcano of 1875 devastated the Icelandic economy and caused widespread famine. Over the next quarter century, 20% of the island's population emigrated, mostly to Canada and the US. Limited home rule from Denmark was granted in 1874 and complete independence attained in 1944. Literacy, longevity, income, and social cohesion are first-rate by world standards.

ECONOMY

Economy—overview: Iceland's Scandinavian-type economy is basically capitalistic, yet with an extensive welfare system (including generous housing subsidies), low unemployment, and remarkably even distribution of income. In the absence of other natural resources (except for abundant geothermal power), the economy depends heavily on the fishing industry, which provides nearly 70% of export earnings and employs 6% of the work force. The economy remains sensitive to declining fish stocks as well as to fluctuations in world prices for its main exports: fish and fish products, aluminum, and ferrosilicon. Government policies include reducing the current account deficit, limiting foreign borrowing, containing inflation, revising agricultural and fishing policies, and diversifying the economy. The government remains opposed to EU membership, primarily because of Icelanders' concern about losing control over their fishing resources. Iceland's economy has been diversifying into manufacturing and service industries in the last decade, and new developments in software production, biotechnology, and financial services are taking place. The tourism sector is also expanding, with the recent trends in ecotourism and whale watching. Since 2000 growth has varied from -1% in 2002 to 8% in 2004. The 2006 closure of the US military base at Keflavik had very little impact on the national economy; Iceland's low unemployment rate aided former base employees in finding alternate employment.

ILES EPARSES

INTRODUCTION

Background: The Iles Eparses, or scattered islands, are a group of five French

entities—Bassas da India, Europa Island, Gloriosos Islands, Juan de Nova Island, and Tromelin Island—which on 1 April 1960 came under the authority of the Minister in charge of overseas possessions. On 19 September 1960 by decree, the islands were transferred to the charge of the Prefet of Reunion where they remained until 3 January 2005 when they were transferred by another decree to the Senior Administrator of the Territory of the French Southern and Antarctic Lands (TAAF).

Bassas da India: A French possession since 1897, this atoll is a volcanic seamount surrounded by reefs and awash at high tide.

Europa Island: A French possession since 1897, the island is heavily wooded; it is the site of a small military garrison that staffs a weather station.

Gloriosos Islands: A French possession since 1892, the Gloriosos Islands are com-

posed of two lushly vegetated coral islands (Ile Glorieuse and Ile du Lys) and three rock islets. A military garrison operates a weather and radio station on Ile Glorieuse.

Juan de Nova Island: Named after a famous 15th century Spanish navigator and explorer, the island has been a French possession since 1897. It has been exploited for its guano and phosphate. Presently a small military garrison oversees a meteorological station.

Tromelin Island: First explored by the French in 1776, the island came under the jurisdiction of Reunion in 1814. At present, it serves as a sea turtle sanctuary and is the site of an important meteorological station.

GEOGRAPHY

Location: Southern Africa, in the Indian Ocean

Bassas da India: atoll in the southern Mozambique Channel, about half way from Madagascar to Mozambique

Europa Island: island in the Mozambique Channel, about half way between southern Madagascar and southern Mozambique

Glorioso Islands: group of islands in the Indian Ocean, northwest of Madagascar

Juan de Nova Island: island in the Mozambique Channel, about one-third of the way between Madagascar and Mozambique

Tromelin Island: island in the Indian Ocean, east of Madagascar

Geographic coordinates:

Bassas da India: 21 30 S, 39 50 E

Europa Island: 22 20 S, 40 22 E

Glorioso Islands: 11 30 S, 47 20 E

Juan de Nova Island: 17 03 S, 42 45 E

Tromelin Island: 15 52 S, 54 25 E

Map references: Africa

Area:

Bassas da India: total—80 sq km; land—0.2 sq km; water—79.8 sq km (lagoon)

Europa Island: total—28 sq km; land—28 sq km; water—0 sq km

Glorioso Islands: total—5 sq km; land—5 sq km; water—0 sq km

Juan de Nova Island: total—4.4 sq km; land—4.4 sq km; water—0 sq km

Tromelin Island: total—1 sq km; land—1 sq km; water—0 sq km

Area—comparative:

Bassas da India: land area about one-third the size of The Mall in Washington, DC

Europa Island: about one-sixth the size of Washington, DC

Glorioso Islands: about eight times the size of The Mall in Washington, DC

Juan de Nova Island: about seven times the size of The Mall in Washington, DC

Tromelin Island: about 1.7 times the size of The Mall in Washington, DC

Land boundaries: none

Coastline:

Bassas da India: 35.2 km

Europa Island: 22.2 km

Glorioso Islands: 35.2 km

Juan de Nova Island: 24.1 km

Tromelin Island: 3.7 km

Maritime claims:

territorial sea: 12 nm

exclusive economic zone: 200 nm; note—*Juan de Nova Island* and *Tromelin Island* claim a continental shelf of 200-m depth or to the depth of exploitation

Climate: tropical

Terrain:

Bassas da India: atoll, awash at high tide; shallow (15 m) lagoon

Europa Island, *Glorioso Islands*, *Juan de Nova Island*: low, flat, and sandy

Tromelin Island: low, flat, sandy; likely volcanic seamount

Elevation extremes:

lowest point: Indian Ocean 0 m

highest point: *Bassas da India* 2.4 m; *Europa Island* 24 m; *Glorioso Islands* 12 m; *Juan de Nova Island* 10 m; *Tromelin Island* 7 m (all unnamed locations)

Natural resources:

Bassas da India and *Europa Island*: none

Glorioso Islands and *Juan de Nova Island*: guano, phosphates; coconuts

Tromelin Island: fish

Land use: *Bassas da India*—100% rock, coral reef, and sand; *Europa Island*—100% mangrove swamp and dry woodlands; *Glorioso Islands*—100% lush vegetation and coconut palms; *Juan de Nova Island*—90% forest, 10% other; *Tromelin Island*—100% grasses and scattered brush

Natural hazards: all islands subject to periodic cyclones

Bassas da India: maritime hazard since it is under water for a period of three hours prior to and following the high tide and surrounded by reefs

Geography—note:

Bassas da India: the atoll is a circular reef that sits atop a long-extinct, submerged volcano

Europa Island and *Juan de Nova Island*: wildlife sanctuary for seabirds and sea turtles

Glorioso Islands: the islands and rocks are surrounded by an extensive reef system

Tromelin Island: climatologically important location for forecasting cyclones in the western Indian Ocean; wildlife sanctuary (seabirds, tortoises)

PEOPLE

INDIA

INTRODUCTION

Background: The Indus Valley civilization, one of the oldest in the world, dates

back at least 5,000 years. Aryan tribes from the northwest infiltrated onto Indian lands about 1500 B.C.; their merger with the earlier Dravidian inhab-

itants created the classical Indian culture. Arab incursions starting in the 8th century and Turkish in the 12th were followed by those of European traders,

beginning in the late 15th century. By the 19th century, Britain had assumed political control of virtually all Indian lands. Indian armed forces in the British army played a vital role in both World Wars. Nonviolent resistance to British colonialism led by Mohandas GANDHI and Jawaharlal NEHRU brought independence in 1947. The subcontinent was divided into the secular state of India and the smaller Muslim state of Pakistan. A third war between the two countries in 1971 resulted in East Pakistan becoming the separate nation of Bangladesh. Despite impressive gains in economic investment and output, India faces pressing problems such as the ongoing dispute with Pakistan over Kashmir, significant overpopulation, environmental degradation, extensive poverty, and ethnic and religious strife.

GEOGRAPHY

Location: Southern Asia, bordering the Arabian Sea and the Bay of Bengal, between Burma and Pakistan

Geographic coordinates: 20°00' N, 77°00' E

ECONOMY

Economy—overview: India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Services are the major source of economic growth, accounting for more than half of India's output with less than one third of its labor force. About three-fifths of the work force is in agriculture, leading the UPA government to articulate an economic reform program that includes developing basic infrastructure to improve the lives of the rural poor and boost economic performance. The government has reduced controls on foreign trade and investment. Tariffs averaged 12.5% on non-agricultural items in 2006. Higher limits on foreign direct investment were permitted in a few key sectors, such as telecommunications. However, tariff spikes in sensitive categories, including agriculture, and incremental progress on economic reforms still hinder foreign access to India's vast and growing market. Privatization of government-owned industries remained stalled in 2006, and continues to generate political debate; populist pressure from within the UPA government and from its Left Front allies continues to restrain needed initiatives. The economy has posted an average growth rate of more than 7% in the decade since 1996, reducing poverty by about 10 percentage points. India achieved 8.5% GDP growth in 2006, significantly expanding manufacturing. India is capitalizing on its large numbers of well-educated people skilled in the English language to become a major exporter of software services and software workers. Economic expansion has helped New Delhi continue to make progress in reducing its federal fiscal deficit. However, strong growth—more than 8 percent growth in each of the last three years—combined with easy consumer credit and a real estate boom is fueling inflation concerns. The huge and growing population is the fundamental social, economic, and environmental problem.

COMMUNICATIONS

Telephones—main lines in use: 49.75 million (2005)

Telephones—mobile cellular: 69.193 million (2006)

Telephone system:

general assessment: recent deregulation and liberalization of telecommunications laws and policies have prompted rapid growth; local and long distance service provided throughout all regions of the country, with services primarily concentrated in the urban areas; steady improvement is taking place with the recent admission of private and private-public investors, but telephone density remains low at about 10 for each 100 persons nationwide and only 1 per 100 persons in rural areas; there remains a national waiting list of over 1.7 million; fastest growth is in cellular service with modest growth in fixed lines

domestic: expansion of domestic service, although still weak in rural areas, resulted from increased competition and dramatic reductions in price led in large part by wireless service; mobile cellular service (both CDMA and GSM) introduced in 1994 and organized nationwide into four metropolitan cities and 19 telecom circles each with about three private service providers and one state-owned service provider; in recent years significant trunk capacity added in the form of fiber-optic cable and one of the

world's largest domestic satellite systems, the Indian National Satellite system (INSAT), with 6 satellites supporting 33,000 very small aperture terminals (VSAT)

international: country code—91; satellite earth stations—8 Intelsat (Indian Ocean) and 1 Inmarsat (Indian Ocean region); 9 gateway exchanges operating from Mumbai (Bombay), New Delhi, Kolkata (Calcutta), Chennai (Madras), Jalandhar, Kanpur, Gandhinagar, Hyderabad, and Ernakulam; 6 submarine cables, including Sea-Me-We-3 with landing sites at Cochin and Mumbai (Bombay), Sea-Me-We-4 with landing site at Chennai, Fiber-Optic Link Around the Globe (FLAG) with landing site at Mumbai (Bombay), South Africa—Far East (SAFE) with landing site at Cochin, i2icn linking to Singapore with landing sites at Mumbai (Bombay) and Chennai (Madras), and Tata Indicom linking Singapore and Chennai (Madras), provide a significant increase in the bandwidth available for both voice and data traffic (2006)

TRANSNATIONAL ISSUES

Disputes—international: since China and India launched a security and foreign policy dialogue in 2005, consolidated discussions related to the dispute over most of their rugged, militarized boundary, regional nuclear proliferation,

Indian claims that China transferred missiles to Pakistan, and other matters continue; various talks and confidence-building measures have cautiously begun to defuse tensions over Kashmir, particularly since the October 2005 earthquake in the region; Kashmir nevertheless remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India and Pakistan have maintained the 2004 cease fire in Kashmir and initiated discussions on defusing the armed stand-off in the Siachen glacier region; Pakistan protests India's fencing the highly militarized Line of Control and construction of the Baglihar Dam on the Chenab River in Jammu and Kashmir, which is part of the larger dispute on water sharing of the Indus River and its tributaries; UN Military Observer Group in India and Pakistan (UNMOGIP) has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show its Junagadh claim in Indian Gujarat State; discussions with Bangladesh remain stalled to delimit a small section of river boundary, to exchange territory for 51 Bangladeshi exclaves in India and 111 Indian exclaves in Bangladesh, to allocate divided villages, and to stop illegal cross-border trade, migration, violence, and transit of terrorists through the porous border; Bangladesh protests India's attempts to fence off high-traffic sections of the border; dispute with Bangladesh over New Moore/South Talpatty/Purbasha Island in the Bay of Bengal deters maritime boundary delimitation; India seeks cooperation from Bhutan and Burma to keep Indian Nagaland and Assam separatists from hiding in remote areas along the borders; Joint Border Committee with Nepal continues to examine contested boundary sections, including the 400 square kilometer dispute over the source of the Kalapani River; India maintains a strict border regime to keep out Maoist insurgents and control illegal cross-border activities from Nepal

IDPs: at least 600,000 (about half are Kashmiri Pandits from Jammu and Kashmir) (2006)

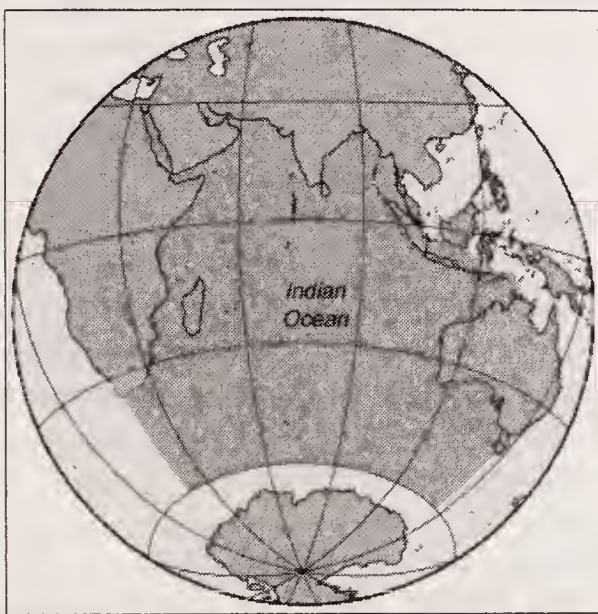

Trafficking in persons: *current situation:* India is a source, destination, and transit country for men, women, and children trafficked for the purposes of forced or bonded labor and commercial sexual exploitation; the large population of men, women, and children—numbering in the millions—in debt bondage face involuntary servitude in brick kilns, rice mills, and embroidery factories, while some children endure involuntary servitude as domestic servants; internal trafficking of women and girls for the purposes of commercial sexual exploitation and forced

marriage also occurs; the government estimates that 90 percent of India's sex trafficking is internal; India is also a destination for women and girls from Nepal and Bangladesh trafficked for the purpose of commercial sexual exploitation; boys from Afghanistan, Pakistan, and Bangladesh are trafficked through India to the Gulf states for involuntary servitude as child camel jockeys; Indian men and women migrate willingly to the Persian Gulf region for work as domestic servants and low-skilled laborers, but some later find themselves in situations of involuntary servitude including extended working hours, nonpayment of wages, restrictions on their movement by withholding of

their passports or confinement to the home, and physical or sexual abuse
tier rating: Tier 2 Watch List—India has been on the Tier 2 Watch List since 2004 for its failure to show evidence of increasing efforts to address trafficking in persons

Illicit drugs: world's largest producer of licit opium for the pharmaceutical trade, but an undetermined quantity of opium is diverted to illicit international drug markets; transit point for illicit narcotics produced in neighboring countries; illicit producer of methaqualone; vulnerable to narcotics money laundering through the hawala system; licit ketamine and precursor production

INDIAN OCEAN

INTRODUCTION

Background: The Indian Ocean is the third largest of the world's five oceans (after the Pacific Ocean and Atlantic Ocean, but larger than the Southern Ocean and Arctic Ocean). Four critically important access waterways are the Suez Canal (Egypt), Bab el Mandeb (Djibouti-Yemen), Strait of Hormuz (Iran-Oman), and Strait of Malacca (Indonesia-Malaysia). The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Indian Ocean south of 60 degrees south latitude.

GEOGRAPHY

Location: body of water between Africa, the Southern Ocean, Asia, and Australia

Geographic coordinates: 20 00 S, 80 00 E
Map references: Political Map of the World

Area:

total: 68.556 million sq km

note: includes Andaman Sea, Arabian Sea, Bay of Bengal, Flores Sea, Great Australian Bight, Gulf of Aden, Gulf of

Oman, Java Sea, Mozambique Channel, Persian Gulf, Red Sea, Savu Sea, Strait of Malacca, Timor Sea, and other tributary water bodies

Area—comparative: about 5.5 times the size of the US

Coastline: 66,526 km

Climate: northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the northern Indian Ocean and January/February in the southern Indian Ocean

Terrain: surface dominated by counter-clockwise gyre (broad, circular system of currents) in the southern Indian Ocean; unique reversal of surface currents in the northern Indian Ocean; low atmospheric pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Elevation extremes:

lowest point: Java Trench -7,258 m

highest point: sea level 0 m

Natural resources: oil and gas fields, fish, shrimp, sand and gravel aggregates, placer deposits, polymetallic nodules

Natural hazards: occasional icebergs pose navigational hazard in southern reaches

Environment—current issues: endangered marine species include the dugong, seals, turtles, and whales; oil pollution in the Arabian Sea, Persian Gulf, and Red Sea

Geography—note: major chokepoints include Bab el Mandeb, Strait of Hormuz, Strait of Malacca, southern access to the Suez Canal, and the Lombok Strait

ECONOMY

Economy—overview: The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of petroleum and petroleum products from the oilfields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

TRANSPORTATION

Ports and terminals: Chennai (Madras; India), Colombo (Sri Lanka), Durban (South Africa), Jakarta (Indonesia), Kolkata (Calcutta; India) Melbourne (Australia), Mumbai (Bombay; India), Richards Bay (South Africa)

TRANSNATIONAL ISSUES

Disputes—international: some maritime disputes (see littoral states)

INDONESIA

INTRODUCTION

Background: The Dutch began to colonize Indonesia in the early 17th century; the islands were occupied by Japan from 1942 to 1945. Indonesia declared its independence after Japan's surrender, but it required four years of intermittent negotiations, recurring hostilities, and UN mediation before the Netherlands agreed to relinquish its colony. Indonesia is the world's largest archipelagic state and home to the world's largest Muslim population. Current issues include: alleviating poverty, preventing terrorism, consolidating democracy after four decades of authoritarianism, implementing financial sector reforms, stemming corruption, holding the military and police accountable for human rights violations, and controlling avian influenza. In 2005, Indonesia reached a historic peace agreement with armed separatists in Aceh, which led to democratic elections in December 2006. Indonesia continues to face a low intensity separatist guerilla movement in Papua.

ECONOMY

Economy—overview: Indonesia, a vast polyglot nation, has struggled to overcome the Asian financial crisis, and still grapples with persistent poverty and unemployment, inadequate infrastruc-

ture, endemic corruption, a fragile banking sector, a poor investment climate, and unequal resource distribution among regions. The country continues the slow work of rebuilding from the devastating December 2004 tsunami and from an earthquake in central Java in May 2006 that caused over \$3 billion in damage and losses. Declining oil production and lack of new exploration investment turned Indonesia into a net oil importer in 2004. The cost of subsidizing domestic fuel placed increasing strain on the budget in 2005, and combined with indecisive monetary policy, contributed to a run on the currency in August, prompting the government to enact a 126% average fuel price hike in October. The resulting inflation and interest rate hikes dampened growth through mid-2006, while large increases in rice prices pushed millions more people under the national poverty line. Economic reformers introduced three policy packages in 2006 to improve the investment climate, infrastructure, and the financial sector, but translating them into reality has not been easy. Keys to future growth remain internal reform, building up the confidence of international and domestic investors, and strong global economic growth. Significant progress has been made in rebuilding Aceh after the devastating December 2004 tsunami, and the province now shows more economic activity than before the disaster. Unfortunately, Indonesia suffered new disasters in 2006 and early 2007 including: a major earthquake near Yogyakarta, an industrial accident in Sidoarjo, East Java that created a "mud volcano," a tsunami in South Java, and major flooding in Jakarta, all of which caused additional damages in the billions of dollars. Donors are assisting Indonesia with its disaster mitigation and early warning efforts.

Batam Island; Indonesian secessionists, squatters, and illegal migrants create repatriation problems for Papua New Guinea; piracy remains a problem in the Malacca Strait; maritime delimitation talks continue with Palau; Indonesian groups challenge Australia's claim to Ashmore Reef; Australia has closed parts of the Ashmore and Carrier Reserve to Indonesian traditional fishing and placed restrictions on certain catches

Indonesia is a source, transit, and destination country for women, children and men trafficked for the purposes of sexual exploitation and forced labor; Indonesian victims are trafficked to Malaysia, Saudi Arabia, Kuwait, UAE, Hong Kong, Taiwan, Japan, South Korea, and Singapore; a significant number of Indonesian women who go overseas each year to work as domestic servants or "cultural performers" are subjected to conditions of involuntary servitude and commercial sexual exploitation; to a minimal extent, Indonesia is a destination for women from East Asia, Europe, and South America who are trafficked for sexual exploitation; there is extensive trafficking within Indonesia from rural to urban metropolitan areas particularly for sexual exploitation and involuntary domestic servitude

tier rating: Tier 2 Watch List—Indonesia is placed on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking**Illicit drugs:** illicit producer of cannabis largely for domestic use; producer of methamphetamine and ecstasy**IRAN****INTRODUCTION****Background:** Known as Persia until 1935, Iran became an Islamic republic in 1979 after the ruling monarchy was overthrown and the shah was forced into exile. Conservative clerical forces established a theocratic system of government with ultimate political authority vested in a learned religious scholar referred to commonly as the Supreme Leader who,

according to the constitution, is accountable only to the Assembly of Experts. Iranian-US relations have been strained since a group of Iranian students seized the US Embassy in Tehran on 4 November 1979 and held it until 20 January 1981. During 1980–88, Iran fought a bloody, indecisive war with Iraq that eventually expanded into the Persian Gulf and led to clashes between US Navy and Iranian military forces

between 1987 and 1988. Iran has been designated a state sponsor of terrorism for its activities in Lebanon and elsewhere in the world and remains subject to US economic sanctions and export controls because of its continued involvement. Following the election of the reformist Hojjat ol-Eslam Mohammad KHATAMI as president in 1997 and similarly a reformist Majles (parliament) in 2000, a campaign to foster political reform in

response to popular dissatisfaction was initiated. The movement floundered as conservative politicians prevented reform measures from being enacted, increased repressive measures, and made electoral gains against reformers. Starting with nationwide municipal elections in 2003 and continuing through Majles elections in 2004, conservatives reestablished control over Iran's elected government institutions, which culminated with the August 2005 inauguration of an ultra-conservative layman as president.

Independence: 1 April 1979 (Islamic Republic of Iran proclaimed)

National holiday: Republic Day, 1 April (1979)

Constitution: 2–3 December 1979; revised 1989 to expand powers of the presidency and eliminate the prime ministership

Legal system: the Constitution codifies Islamic principles of government

Suffrage: 18 years of age; universal

Executive branch:

chief of state: Supreme Leader Ali Hoseini-KHAMENEI (since 4 June 1989)

head of government: President Mahmud AHMADI-NEJAD (since 3 August 2005); First Vice President Parviz DAVUDI (since 11 September 2005)

cabinet: Council of Ministers selected by the president with legislative approval; the Supreme Leader has some control over appointments to the more sensitive ministries

note: also considered part of the Executive branch of government are three oversight bodies: 1) Assembly of Experts, a popularly elected body of 86 religious scholars constitutionally charged with determining the succession of the Supreme Leader—based on his qualifications in the field of jurisprudence and commitment to the principles of the revolution, reviewing his performance, and deposing him if deemed necessary; 2) Expediency Council or the Council for the Discernment of Expediency, is a policy advisory and implementation board consisting of permanent members, who number over 40 and represent all major government factions and include the heads of the three branches of government, and the clerical members of the Council of Guardians (see next); permanent members are appointed by the Supreme Leader for five-year terms; temporary members, including Cabinet members and Majles committee chairmen, are selected when issues under their jurisdiction come before the Expediency Council; the Expediency Council exerts supervisory authority over the executive, judicial, and legislative branches and resolves legislative issues on which the Majles and the Council of Guardians disagree and since 1989 has been used to advise national religious leaders on matters of national policy; in 2005 the Council's powers were expanded, at least on paper, to act as a supervisory body for the government; 3) Council of Guardians of the Constitution or Council of Guardians or Guardians Council is a 12-member board made up of six clerics chosen by the Supreme Leader and six jurists selected by the Majles from a list of candidates

recommended by the judiciary (which in turn is controlled by the Supreme Leader) for six-year terms; this Council determines whether proposed legislation is both constitutional and faithful to Islamic law, vets candidates for suitability, and supervises national elections

elections: Supreme Leader appointed for life by the Assembly of Experts; Assembly of Experts elected by popular vote for an eight-year term; last election held 15 December 2006 concurrently with municipal elections; president elected by popular vote for a four-year term (eligible for a second term and third nonconsecutive term); last held 17 June 2005 with a two-candidate runoff on 24 June 2005 (next presidential election slated for 2009)

election results: Mahmud AHMADI-NEJAD elected president; percent of vote—Mahmud AHMADI-NEJAD 62%, Ali Akbar Hashemi-RAFSANJANI 36%

Legislative branch: unicameral Islamic Consultative Assembly or Majles-e-Shura-ye-Eslami or Majles (290 seats; members elected by popular vote to serve four-year terms)

elections: last held 20 February 2004 with a runoff held 7 May 2004 (next to be held in February 2008)

election results: percent of vote—NA; seats by party—conservatives/Islamists 190, reformers 50, independents 43, religious minorities 5, and 2 seats unaccounted for

Judicial branch: The Supreme Court and the four-member High Council of the Judiciary have a single head and overlapping responsibilities; together they supervise the enforcement of all laws and establish judicial and legal policies; lower courts include a special clerical court, a revolutionary court, and a special administrative court

Political parties and leaders: formal political parties are a relatively new phenomenon in Iran and most conservatives still prefer to work through political pressure groups rather than parties, and often political parties or groups are formed prior to elections and disbanded soon thereafter; a loose pro-reform coalition called the 2nd Khardad Front, which includes political parties as well as less formal pressure groups and organizations, achieved considerable success at elections to the sixth Majles in early 2000; groups in the coalition include: Islamic Iran Participation Front (IIPF), Executives of Construction Party (Kargozaran), Solidarity Party, Islamic Labor Party, Mardom Salari, Mojahedin of the Islamic Revolution Organization (MIRO), and Militant Clerics Society

(Ruhaniyun); the coalition participated in the seventh Majles elections in early 2004; following his defeat in the 2005 presidential elections, former MCS Secretary General Mehdi KARUBI formed the National Trust Party; a new apparently conservative group, the Builders of Islamic Iran, took a leading position in the new Majles after winning a majority of the seats in February 2004

Political pressure groups and leaders: the Islamic Revolutionary Party (IRP) was Iran's sole political party until its dissolution in 1987; Iran now has a variety of groups engaged in political activity; some are oriented along political lines or based on an identity group; others are more akin to professional political parties seeking members and recommending candidates for office; some are active participants in the Revolution's political life while others reject the state; political pressure groups conduct most of Iran's political activities; groups that generally support the Islamic Republic include Ansar-e Hizballah, Muslim Students Following the Line of the Imam, Tehran Militant Clergy Association (Ruhaniyat), Islamic Coalition Party (Motalefeh), and Islamic Engineers Society; active pro-reform student groups include the Office of Strengthening Unity (OSU); opposition groups include Freedom Movement of Iran, the National Front, Marz-e Por Gohar, and various ethnic and Monarchist organizations; armed political groups that have been repressed by the government include Mujahidin-e Khalq Organization (MEK or MKO), People's Fedayeen, Democratic Party of Iranian Kurdistan (KDPI), and Komala

International organization participation: ABEDA, CP, ECO, FAO, G-15, G-24, G-77, IAEA, IBRD, ICAO, ICC, ICCt (signatory), ICRM, IDA, IDB, IFAD, IFC, IFRCS, IHO, ILO, IMF, IMO, Interpol, IOC, IOM, IPU, ISO, ITU, MIGA, NAM, OIC, OPCW, OPEC, PCA, SCO (observer), UN, UNCTAD, UNESCO, UNHCR, UNIDO, UNMEE, UNWTO, UPU, WCL, WCO, WFTU, WHO, WIPO, WMO, WTO (observer)

Diplomatic representation in the US: none; note—Iran has an Interests Section in the Pakistani Embassy; address: Iranian Interests Section, Pakistani Embassy, 2209 Wisconsin Avenue NW, Washington, DC 20007; telephone: [1] (202) 965-4990; FAX [1] (202) 965-1073

ECONOMY

Economy—overview: Iran's economy is marked by a bloated, inefficient state sector, over reliance on the oil sector, and statist policies that create major distortions throughout. Most economic activity is controlled by the state. Private sector activity is typically small-scale workshops, farming, and services. President Mahmud AHMADI-NEJAD has continued to follow the market reform plans of former President RAF-SANJANI, with limited progress. Relatively high oil prices in recent years have enabled Iran to amass nearly \$60 billion in foreign exchange reserves, but have not eased economic hardships such as high unemployment and inflation. The proportion of the economy devoted to the development of weapons of mass destruction remains a contentious issue with leading Western nations.

TRANSNATIONAL ISSUES

Disputes—international: Iran protests Afghanistan's limiting flow of dammed tributaries to the Helmand River in

periods of drought; Iraq's lack of a maritime boundary with Iran prompts jurisdiction disputes beyond the mouth of the Shatt al Arab in the Persian Gulf; Iran and UAE dispute Tunb Islands and Abu Musa Island, which are occupied by Iran; Iran stands alone among littoral states in insisting upon a division of the Caspian Sea into five equal sectors

Refugees and internally displaced persons: *refugees (country of origin):* 662,355 (Afghanistan), 54,000 (Iraq) (2006)

Trafficking in persons: *current situation:*

Iran is a source, transit, and destination country for women and girls trafficked for the purposes of sexual exploitation and involuntary servitude; according to foreign observers, women and girls are trafficked to Pakistan, Turkey, the Persian Gulf, and Europe for sexual exploitation, while boys from Bangladesh, Pakistan, and Afghanistan are trafficked through Iran en route to Persian Gulf states where they are ultimately forced to work as camel jockeys, beggars, or laborers; Afghan women and girls are trafficked to the country for forced marriages and sexual exploitation; women and children are also trafficked internally for the purposes of forced marriage, sexual exploitation, and involuntary servitude

tier rating: Tier 3—Iran is downgraded to Tier 3 after persistent, credible reports of Iranian authorities punishing victims of trafficking with beatings, imprisonment, and execution

Illicit drugs: despite substantial interdiction efforts, Iran remains a key transshipment point for Southwest Asian heroin to Europe; highest percentage of the population in the world using opiates; lacks anti-money-laundering laws

IRAQ

INTRODUCTION

Background: Formerly part of the Ottoman Empire, Iraq was occupied by Britain during the course of World War I; in 1920, it was declared a League of Nations mandate under UK administration. In stages over the next dozen years, Iraq attained its independence as a kingdom in 1932. A "republic" was proclaimed in 1958, but in actuality a series of military strongmen ruled the country until 2003, the last was SADDAM Husayn. Territorial disputes with Iran led to an inconclusive and costly eight-year war (1980–88). In August 1990, Iraq seized Kuwait, but was expelled by US-led, UN coalition forces during the Gulf War of January–February

1991. Following Kuwait's liberation, the UN Security Council (UNSC) required Iraq to scrap all weapons of mass destruction and long-range missiles and to allow UN verification inspections. Continued Iraqi noncompliance with UNSC resolutions over a period of 12 years led to the US-led invasion of Iraq in March 2003 and the ouster of the SADDAM Husayn regime. Coalition forces remain in Iraq under a UNSC mandate, helping to provide security and to support the freely elected government. The Coalition Provisional Authority, which temporarily administered Iraq after the invasion, transferred full governmental authority on 28 June 2004 to the Iraqi Interim Government, which governed under the Tran-

sitional Administrative Law for Iraq (TAL). Under the TAL, elections for a 275-member Transitional National Assembly (TNA) were held in Iraq on 30 January 2005. Following these elections, the Iraqi Transitional Government (ITG) assumed office. The TNA was charged with drafting Iraq's permanent constitution, which was approved in a 15 October 2005 constitutional referendum. An election under the constitution for a 275-member Council of Representatives (CoR) was held on 15 December 2005. The CoR approval in the selection of most of the cabinet ministers on 20 May 2006 marked the transition from the ITG to Iraq's first constitutional government in nearly a half-century.

zontal line centered in the white band; the phrase ALLAHU AKBAR (God is Great) in green Arabic script—Allahu to the right of the middle star and Akbar to the left of the middle star—was added in January 1991 during the Persian Gulf crisis; similar to the flag of Syria, which has two stars but no script, Yemen, which has a plain white band, and that of Egypt which has a gold Eagle of Saladin centered in the white band; design is based upon the Arab Liberation colors

ECONOMY

Economy—overview: Iraq's economy is dominated by the oil sector, which has traditionally provided about 95% of foreign exchange earnings. Iraq's seizure of Kuwait in August 1990, subsequent international economic sanctions, and damage from military action by an international coalition beginning in January 1991 drastically reduced economic activity. Although government policies supporting large military and internal security forces and allocating resources to key supporters of the regime hurt the economy, implementation of the UN's oil-for-food program, which began in December 1996, helped improve conditions for the average Iraqi citizen. Iraq was allowed to export limited amounts of oil in exchange for food, medicine, and some infrastructure spare parts. In December 1999, the UN Security Council authorized Iraq to export under the program as much oil as required to meet humanitarian needs. The military victory of the US-led coalition in March–April 2003 resulted in the shutdown of much of the central economic administrative structure. Although a comparatively small amount of capital plant was damaged during the hostilities, looting, insurgent attacks, and sabotage have undermined efforts to rebuild the economy. Attacks on key economic facilities—especially oil pipelines and infrastructure—have prevented Iraq from reaching projected export volumes, but total government revenues have been higher than anticipated due to high oil prices. Despite political uncertainty, Iraq is making some progress in building the institutions needed to implement economic policy and has negotiated a debt reduction agreement with the Paris Club and a Standby Arrangement with the IMF. An International Compact with Iraq is being established to integrate Iraq into the regional and global economy, while recognizing the need to resolve destabilizing security and political conflicts. Additionally, the Iraqi government is seeking to pass laws to

strengthen the economy, this legislation includes a hydrocarbon law to encourage contracting with foreign investors and a revenue sharing law to equitably divide oil revenues within the nation. Controlling inflation, reducing corruption, and implementing structural reforms such as bank restructuring and developing the private sector, will be key to Iraq's economic prospects.

IRELAND

INTRODUCTION

Background: Celtic tribes arrived on the island between 600–150 B.C. Invasions by Norsemen that began in the late 8th century were finally ended when King Brian BORU defeated the Danes in 1014. English invasions began in the 12th century and set off more than seven centuries of Anglo-Irish struggle marked by fierce rebellions and harsh repressions. A failed 1916 Easter Monday Rebellion touched off several years of guerrilla warfare that in 1921 resulted in independence from the UK for 26 southern counties; six northern (Ulster) counties remained part of the UK. In 1948 Ireland withdrew from the British Commonwealth; it joined the European Community in 1973. Irish governments have sought the peaceful unification of Ireland and have cooperated with Britain against terrorist groups. A peace settlement for Northern Ireland is being implemented with some difficulties. In 2006, the Irish and British governments developed and began working to implement the St. Andrews Agreement, building on the Good Friday Agreement approved in 1998.

ECONOMY

Economy—overview: Ireland is a small, modern, trade-dependent economy with growth averaging 6% in 1995–2006. Agriculture, once the most important sector, is now dwarfed by industry and services. Industry accounts for 46% of GDP, about 80% of exports, and 29% of the labor force. Although exports remain the primary engine for Ireland's growth, the economy has also benefited from a

rise in consumer spending, construction, and business investment. Per capita GDP is 40% above that of the four big European economies and the second highest in the EU behind Luxembourg. Over the past decade, the Irish Government has implemented a series of national economic programs designed to curb price and wage inflation, reduce government spending, increase labor force skills, and promote foreign investment. Ireland joined in circulating the euro on 1 January 2002 along with 11 other EU nations.

TRANSNATIONAL ISSUES

Disputes—international: Ireland, Iceland, and the UK dispute Denmark's claim that the Faroe Islands' continental shelf extends beyond 200 nm

Illicit drugs: transshipment point for and consumer of hashish from North

Africa to the UK and Netherlands and of European-produced synthetic drugs; increasing consumption of South American cocaine; minor transshipment point for heroin and cocaine destined for Western Europe; despite recent legislation, narcotics-related money laundering—using bureaux de change, trusts, and shell companies involving the offshore financial community—remains a concern

ISLE OF MAN

INTRODUCTION

Background: Part of the Norwegian Kingdom of the Hebrides until the 13th century when it was ceded to Scotland, the isle came under the British crown in 1765. Current concerns include reviving the almost extinct Manx Gaelic language. Isle of Man is a British crown dependency, but is not part of the UK. However, the UK Government remains constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Offshore banking, manufacturing, and tourism are key sectors of the economy. The government offers incentives to high-technology companies and financial institutions to locate on the island; this has paid off in expanding employment opportunities in high-income industries. As a result, agriculture and fishing, once the mainstays of the economy, have declined in their shares of GDP. The Isle of Man also attracts online gambling sites and the film industry. Trade is mostly with the UK. The Isle of Man enjoys free access to EU markets.

ISRAEL

INTRODUCTION

Background: Following World War II, the British withdrew from their mandate of Palestine, and the UN partitioned the area into Arab and Jewish states, an arrangement rejected by the Arabs. Subsequently, the Israelis defeated the Arabs in a series of wars without ending the deep tensions between the two sides. The territories Israel occupied since the 1967 war are not included in the Israel country profile, unless otherwise noted. On 25 April 1982, Israel withdrew from the Sinai pursuant to the 1979 Israel-Egypt Peace Treaty. Israel and Palestinian officials signed on 13 September 1993 a Declaration of Principles (also known as the "Oslo Accords") guiding an interim period of Palestinian self-rule. Outstanding territorial and other disputes with Jordan were resolved in the 26 October 1994

Israel-Jordan Treaty of Peace. In addition, on 25 May 2000, Israel withdrew unilaterally from southern Lebanon, which it had occupied since 1982. In keeping with the framework established at the Madrid Conference in October 1991, bilateral negotiations were conducted between Israel and Palestinian representatives and Syria to achieve a permanent settlement. In April 2003, US President BUSH, working in conjunction with the EU, UN, and Russia—the "Quartet"—took the lead in laying out a roadmap to a final settlement of the conflict by 2005, based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. However, progress toward a permanent status agreement was undermined by Israeli-Palestinian violence between September 2003 and February 2005. An Israeli-Palestinian agreement reached at Sharm al-Sheikh in February 2005, along with an internally-brokered Palestinian ceasefire, significantly reduced the violence. In the summer of 2005, Israel unilaterally disengaged from the Gaza Strip, evacuating settlers and its military. The election of HAMAS in January 2006 to head the Palestinian Legislative Council froze relations between Israel and the Palestinian Authority. Ehud OLMERT became prime minister in March 2006; following an Israeli military operation in Gaza in June–July 2006, he shelved plans to unilaterally evacuate from most of the West Bank. The kidnapping of two Israeli soldiers by Lebanese Hizballah led to a 34-day conflict in Lebanon in June–August 2006.

ECONOMY

Economy—overview: Israel has a technologically advanced market economy with substantial, though diminishing, government participation. It depends on imports of crude oil, grains, raw materials, and military equipment. Despite limited natural resources, Israel has intensively developed its agricultural and industrial sectors over the past 20 years. Israel imports substantial quantities of grain, but is largely self-sufficient in other agricultural products. Cut diamonds, high-technology equipment, and agricultural products (fruits and vegetables) are the leading exports. Israel usually posts sizable trade deficits, which are covered by large transfer payments from abroad and by foreign loans. Roughly half of the government's external debt is owed to the US, which is its major source of economic and military aid. The bitter Israeli-Palestinian conflict; difficulties in the high-technology, construction, and

tourist sectors; and fiscal austerity in the face of growing inflation led to small declines in GDP in 2001 and 2002. The economy rebounded in 2003–05, growing at a 4% to 5.2% rate each year, as the government tightened fiscal policy and implemented structural reforms to boost competition and efficiency in the markets. The conflict with Lebanon in summer 2006 slightly dampened GDP growth, but continuing strong foreign investment, tax revenue, and private consumption levels helped the economy recover quickly.

TRANSNATIONAL ISSUES

Disputes—international: West Bank and Gaza Strip are Israeli-occupied with current status subject to the Israeli-Palestinian Interim Agreement—permanent status to be determined through further negotiation; Israel continues con-

struction of a “seam line” separation barrier along parts of the Green Line and within the West Bank; Israel withdrew its settlers and military from the Gaza Strip and from four settlements in the West Bank in August 2005; Golan Heights is Israeli-occupied (Lebanon claims the Shab’a Farms area of Golan Heights); since 1948, about 350 peacekeepers from the UN Truce Supervision Organization (UNTSO) headquartered in Jerusalem monitor ceasefires, supervise armistice agreements, prevent isolated incidents from escalating, and assist other UN personnel in the region

Refugees and internally displaced persons: IDPs: 150,000–420,000 (Arab villagers displaced from homes in northern Israel) (2006)

Trafficking in persons: *current situation:*

Israel is a destination country for low-skilled workers from Eastern Europe and Asia who migrate voluntarily for contract labor in the construction, agriculture, and health care industries, some of whom are subsequently subjected to conditions of involuntary servitude; many labor recruitment agencies in source countries and in Israel require workers to pay large up-front fees that often lead to debt bondage and vulnerability to forced labor; Israel is also a destination country for women trafficked from Eastern Europe for the purpose of sexual exploitation

tier rating: Tier 2 Watch List—Israel is placed on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to address trafficking, namely the conditions of involuntary servitude allegedly facing thousands of foreign migrant workers

Illicit drugs: increasingly concerned about ecstasy, cocaine, and heroin abuse; drugs arrive in country from Lebanon and, increasingly, from Jordan; money-laundering center

ITALY

INTRODUCTION

Background: Italy became a nation-state in 1861 when the regional states of the peninsula, along with Sardinia and Sicily, were united under King Victor EMMANUEL II. An era of parliamentary government came to a close in the early 1920s when Benito MUSSOLINI established a Fascist dictatorship. His disastrous alliance with Nazi Germany led to Italy’s defeat in World War II. A democratic republic replaced the

monarchy in 1946 and economic revival followed. Italy was a charter member of NATO and the European Economic Community (EEC). It has been at the forefront of European economic and political unification, joining the Economic and Monetary Union in 1999. Persistent problems include illegal immigration, organized crime, corruption, high unemployment, sluggish economic growth, and the low incomes and technical standards of southern Italy compared with the prosperous north.

GEOGRAPHY

ECONOMY

Economy—overview: Italy has a diversified industrial economy with roughly the same total and per capita output as France and the UK. This capitalistic economy remains divided into a developed industrial north, dominated by private companies, and a less-developed, welfare-dependent, agricultural south, with 20% unemployment. Most raw materials needed by industry and more than 75% of energy requirements are imported. Over the past decade, Italy has pursued a tight fiscal policy in order to meet the requirements of the Economic and Monetary Unions and has benefited from lower interest and inflation rates. The current government has enacted numerous short-term reforms aimed at improving competitiveness and long-term growth. Italy has moved slowly, however, on implementing needed structural reforms, such as lightening the high tax burden and overhauling Italy's rigid labor market and over-generous pension system, because of the current economic slowdown and opposition from labor unions. But the leadership faces a severe

economic constraint: the budget deficit has breached the 3% EU ceiling. The economy experienced low growth in 2006, and unemployment remained at a high level.

JAMAICA

INTRODUCTION

Background: The island—discovered by Christopher COLUMBUS in 1494—was settled by the Spanish early in the 16th century. The native Taino Indians, who had inhabited Jamaica for centuries, were gradually exterminated, replaced by African slaves. England seized the island in 1655 and a plantation economy—based on sugar, cocoa, and coffee—was established. The abolition of slavery in 1834 freed a quarter million slaves, many of whom became small farmers. Jamaica gradually obtained increasing independence from Britain, and in 1958 it joined other British Caribbean colonies in forming the Federation of the West Indies. Jamaica gained full independence when it withdrew from the Federation in 1962. Deteriorating economic conditions during the 1970s led to recurrent violence as rival gangs affiliated with the major political parties evolved into powerful organized crime networks involved in international drug smuggling and money laundering. The cycle of violence, drugs, and poverty has served to impoverish large sectors of the populace. Nonetheless, many rural and resort areas remain relatively safe and contribute substantially to the economy.

ECONOMY

Economy—overview: The Jamaican economy is heavily dependent on services, which now account for more than 60% of GDP. The country continues to derive most of its foreign exchange from tourism, remittances, and bauxite/alumina. Jamaica's economy, already saddled with a record of sluggish growth, was hit hard by Hurricane Ivan in late 2004, but has made a gradual recovery. The economy faces serious long-term problems: high but declining interest rates, increased foreign competition, exchange rate instability, a sizable merchandise trade deficit, large-scale unemployment and underemployment, and a high debt burden—the result of government bailouts to ailing sectors of the economy, most notably the financial sector in the mid-to-late 1990s. Following a strategy begun in 2004,

Jamaica has reduced its public debt to 133.3% of GDP. Inflation also had declined to 5.8% at the end of 2006. High unemployment exacerbates the serious crime problem, including gang violence fueled by the drug trade. The government faces the difficult prospect of having to achieve fiscal discipline in order to maintain debt payments while simultaneously attacking a serious and growing crime problem that is hampering economic growth.

TRANSNATIONAL ISSUES

Disputes—international: none

Trafficking in persons: *current situation:*

Jamaica is a source country for men, women, and children trafficked for the purposes of sexual exploitation and labor; information suggests that women from the Dominican Republic and Eastern Europe are also trafficked to Jamaica for sexual exploitation; women and children are trafficked internally from rural to urban and tourist areas for sexual exploitation; there may also be trafficking for domestic servitude and forced labor

tier rating: Tier 2 Watch List—Jamaica is placed on the Tier 2 Watch List based on the determination that it is making significant efforts to undertake future action

Illicit drugs: transshipment point for cocaine from South America to North America and Europe; illicit cultivation and consumption of cannabis; government has an active manual cannabis eradication program; corruption is a major concern; substantial money-laundering activity; Colombian narcotics traffickers favor Jamaica for illicit financial transactions

JAN MAYEN

INTRODUCTION

Background: This desolate, arctic, mountainous island was named after a Dutch whaling captain who indisputably discovered it in 1614 (earlier claims are inconclusive). Visited only occasionally by seal hunters and trappers over the following centuries, the island came under

Norwegian sovereignty in 1929. The long dormant Haakon VII Toppen/Beerenberg volcano resumed activity in 1970; the most recent eruption occurred in 1985. It is the northernmost active volcano on earth.

JAPAN

INTRODUCTION

Background: In 1603, a Tokugawa shogunate (military dictatorship) ushered in a long period of isolation from foreign influence in order to secure its power. For 250 years this policy enabled Japan to enjoy stability and a flowering of its indigenous culture. Following the Treaty of Kanagawa with the US in 1854, Japan opened its ports and began to intensively modernize and industri-

alize. During the late 19th and early 20th centuries, Japan became a regional power that was able to defeat the forces of both China and Russia. It occupied Korea, Formosa (Taiwan), and southern Sakhalin Island. In 1931–32 Japan occupied Manchuria, and in 1937 it launched a full-scale invasion of China. Japan attacked US forces in 1941—triggering America's entry into World War II—and soon occupied much of East and Southeast Asia. After its defeat in World War II, Japan recovered to become an economic power and a staunch ally of the US. While the emperor retains his throne as a symbol of national unity, actual power rests in networks of powerful politicians, bureaucrats, and business executives. The economy experienced a major slowdown starting in the 1990s following three decades of unprecedented growth, but Japan still remains a major economic power, both in Asia and globally.

GEOGRAPHY

ECONOMY

Economy—overview: Government-industry cooperation, a strong work ethic, mastery of high technology, and a comparatively small defense allocation (1% of GDP) helped Japan advance with extraordinary rapidity to the rank of second most technologically powerful economy in the world after the US and the third-largest economy in the world after the US and China, measured on a purchasing power parity (PPP) basis. One notable characteristic of the economy has been how manufacturers, suppliers, and distributors have worked

together in closely-knit groups called keiretsu. A second basic feature has been the guarantee of lifetime employment for a substantial portion of the urban labor force. Both features have now eroded. Japan's industrial sector is heavily dependent on imported raw materials and fuels. The tiny agricultural sector is highly subsidized and protected, with crop yields among the highest in the world. Usually self sufficient in rice, Japan must import about 60% of its food on a caloric basis. Japan maintains one of the world's largest fishing fleets and accounts for nearly 15% of the global catch. For three decades, overall real economic growth had been spectacular—a 10% average in the 1960s, a 5% average in the 1970s, and a 4% average in the 1980s. Growth slowed markedly in the 1990s, averaging just 1.7%, largely because of the after effects of overinvestment and an asset price bubble during the late 1980s that required a protracted period of time for firms to reduce excess debt, capital, and labor. From 2000 to 2001, government efforts to revive economic growth proved short-lived and were hampered by the slowing of the US, European, and Asian economies. In 2002–06, growth improved and the lingering fears of deflation in prices and economic activity lessened. Japan's huge government debt, which totals 176% of GDP, and the aging of the population are two major long-run problems. Some fear that a rise in taxes could endanger the current economic recovery. Debate also continues on the role of and effects of reform in restructuring the economy, particularly with respect to the 2007–17 privatization of Japan Post, which has functioned not only as the national postal delivery system but also, through its banking and insurance facilities, as Japan's largest financial institution.

TRANSNATIONAL ISSUES

Disputes—international: the sovereignty dispute over the islands of Etorofu, Kunashiri, and Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kuril Islands,” occupied by the Soviet Union in 1945, now administered by Russia and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Japan and South Korea claim Liancourt Rocks (Take-shima/Tok-do) occupied by South Korea since 1954; China and Taiwan dispute both Japan’s claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan’s unilaterally declared exclusive economic zone in the East China Sea, the site of intensive hydrocarbon prospecting

JERSEY

INTRODUCTION

Background: Jersey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy that held sway in both France and England. These islands were the only British soil occupied by German troops in World War II. Jersey is a British crown

dependency, but is not part of the UK. However, the UK Government is constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Jersey's economy is based on international financial services, agriculture, and tourism. In 2005 the finance sector accounted for about 50% of the island's output. Potatoes, cauliflower, tomatoes, and especially flowers are important export crops, shipped mostly to the UK. The Jersey breed of dairy cattle is known worldwide and represents an important export income earner. Milk products go to the UK and

other EU countries. Tourism accounts for one-quarter of GDP. In recent years, the government has encouraged light industry to locate in Jersey, with the result that an electronics industry has developed alongside the traditional manufacturing of knitwear. All raw material and energy requirements are imported, as well as a large share of Jersey's food needs. Light taxes and death duties make the island a popular tax haven. Living standards come close to those of the UK.

JORDAN

INTRODUCTION

Background: Following World War I and the dissolution of the Ottoman Empire, the UK received a mandate to govern much of the Middle East. Britain separated out a semi-autonomous region of Transjordan from Palestine in the early 1920s, and the area gained its independence in 1946; it adopted the name of

Jordan in 1950. The country's long-time ruler was King HUSSEIN (1953–99). A pragmatic leader, he successfully navigated competing pressures from the major powers (US, USSR, and UK), various Arab states, Israel, and a large internal Palestinian population, despite several wars and coup attempts. In 1989 he reinstituted parliamentary elections and gradual political liberalization; in 1994 he signed a peace treaty with Israel. King ABDALLAH II, the son of King HUSSEIN, assumed the throne following his father's death in February 1999. Since then, he has consolidated his power and undertaken an aggressive economic reform program. Jordan acceded to the World Trade Organization in 2000, and began to participate in the European Free Trade Association in 2001. After a two-year delay, parliamentary and municipal elections took place in the summer of 2003. The prime minister appointed in November 2005 stated the government would focus on political reforms,

improving conditions for the poor, and fighting corruption.

ECONOMY

Economy—overview: Jordan is a small Arab country with insufficient supplies of water, oil, and other natural resources. Poverty, unemployment, and inflation are fundamental problems, but King ABDALLAH, since assuming the throne in 1999, has undertaken some broad economic reforms in a long-term effort to improve living standards. Since Jordan's graduation from its most recent IMF program in 2002, Amman has continued to follow IMF guidelines, practicing careful monetary policy, and making substantial headway with privatization. In 2006, Jordan reduced its debt to GDP ratio significantly. The government also has liberalized the trade regime sufficiently to secure Jordan's membership in the WTO (2000), a free trade accord with the US (2001), and an association agreement with the EU (2001). These measures have helped improve productivity and have put Jordan on the foreign investment map. Jordan imported most of its oil from Iraq, but the US-led war in Iraq in 2003 made Jordan more dependent on oil from other Gulf nations, and has forced the Jordanian Government to raise retail petroleum product prices and the sales tax base. Jordan's export market, which is heavily dependent on exports to Iraq, was also affected by the war but recovered quickly while contributing to the Iraq recovery effort. The main challenges facing Jordan are reducing dependence on foreign grants, reducing the budget deficit, and attracting investment to promote job creation.

KAZAKHSTAN

INTRODUCTION

Background: Native Kazakhs, a mix of Turkic and Mongol nomadic tribes who migrated into the region in the 13th century, were rarely united as a single nation. The area was conquered by Russia in the 18th century, and Kazakhstan became a Soviet Republic in 1936. During the 1950s and 1960s agricultural “Virgin Lands” program, Soviet citizens were encouraged to help cultivate Kazakhstan’s northern pastures. This influx of immigrants (mostly Russians, but also some other deported nationalities) skewed the ethnic mixture and enabled non-Kazakhs to outnumber natives. Independence in 1991 caused many of these newcomers to emigrate. Kazakhstan’s economy is larger than those of all the other Central Asian states combined, largely due to the country’s vast natural resources and a recent history of political stability. Current issues include: developing a cohesive national identity; expanding the development of the country’s vast energy resources and exporting them to world markets; achieving a sustainable economic growth; diversifying the economy outside the oil, gas, and mining sectors; enhancing Kazakhstan’s competitiveness; and strengthening relations with neighboring states and other foreign powers.

Irrigated land: 35,560 sq km (2003)

Natural hazards: earthquakes in the south, mudslides around Almaty

Environment—current issues: radioactive or toxic chemical sites associated with former defense industries and test ranges scattered throughout the country pose health risks for humans and animals; industrial pollution is severe in some cities; because the two main rivers which flowed into the Aral Sea have been diverted for irrigation, it is drying up and leaving behind a harmful layer of chemical pesticides and natural salts; these substances are then picked up by the wind and blown into noxious dust storms; pollution in the Caspian Sea; soil pollution from overuse of agricultural

chemicals and salination from poor infrastructure and wasteful irrigation practices

Environment—international agreements:

party to: Air Pollution, Biodiversity, Climate Change, Desertification, Endangered Species, Hazardous Wastes, Ozone Layer Protection, Ship Pollution, Wetlands

signed, but not ratified: Climate Change-Kyoto Protocol

Geography—note: landlocked; Russia leases approximately 6,000 sq km of territory enclosing the Baykonur Cosmodrome; in January 2004, Kazakhstan and Russia extended the lease to 2050

ECONOMY

Economy—overview: Kazakhstan, the largest of the former Soviet republics in territory, excluding Russia, possesses enormous fossil fuel reserves and plentiful supplies of other minerals and metals. It also has a large agricultural sector featuring livestock and grain. Kazakhstan's industrial sector rests on the extraction and processing of these natural resources and also on a growing machine-building sector specializing in construction equipment, tractors, agricultural machinery, and some defense items. The breakup of the USSR in December 1991 and the collapse in demand for Kazakhstan's traditional heavy industry products resulted in a short-term contraction of the economy, with the steepest annual decline occurring in 1994. In 1995–97, the pace of the government program of economic reform and privatization quickened, resulting in a substantial shifting of assets into the private sector. Kazakhstan enjoyed double-digit growth in 2000–01—8% or more per year in 2002–06—thanks largely to its booming energy sector, but also to economic reform, good harvests, and foreign investment. The opening of the Caspian Consortium pipeline in 2001, from western Kazakhstan's Tengiz oilfield to the Black Sea, substantially raised export capacity. Kazakhstan in 2006 completed the Atasu-Aiashankou portion of an oil pipeline to China that is planned to extend from the country's Caspian coast eastward to the Chinese border in future construction. The country has embarked upon an industrial policy designed to diversify the economy away from overdependence on the oil sector by developing light industry. The policy aims to reduce the influence of foreign investment and foreign personnel. The government has engaged in several disputes with foreign oil companies over the terms of production agreements; tensions continue. Upward pressure on the local currency continued in 2006 due to massive oil-related foreign-exchange inflows. Aided by strong growth and foreign exchange earnings, Kazakhstan aspires to become a regional

financial center and has created a banking system comparable to those in Central Europe.

KENYA

INTRODUCTION

Background: Founding president and liberation struggle icon Jomo KENYATTA led Kenya from independence in 1963 until his death in 1978, when President Daniel Toroitich arap MOI took power in a constitutional succession. The country was a de facto one-party state from 1969 until 1982 when

the ruling Kenya African National Union (KANU) made itself the sole legal party in Kenya. MOI acceded to internal and external pressure for political liberalization in late 1991. The ethnically fractured opposition failed to dislodge KANU from power in elections in 1992 and 1997, which were marred by violence and fraud, but were viewed as having generally reflected the will of the Kenyan people. President MOI stepped down in December 2002 following fair and peaceful elections. Mwai KIBAKI, running as the candidate of the multi-ethnic, united opposition group, the National Rainbow Coalition (NARC), defeated KANU candidate Uhuru KENYATTA and assumed the presidency following a campaign centered on an anticorruption platform. KIBAKI's NARC coalition splintered in 2005 over the constitutional review process. Government defectors joined with KANU to form a new opposition coalition, the Orange Democratic Movement, which defeated the govern-

ment's draft constitution in a popular referendum in November 2005.

ECONOMY

Economy—overview: The regional hub for trade and finance in East Africa, Kenya has been hampered by corruption and by reliance upon several primary goods whose prices have remained low. In 1997, the IMF suspended Kenya's Enhanced Structural Adjustment Program due to the government's failure to maintain reforms and curb corruption. A severe drought from 1999 to 2000 compounded Kenya's problems, causing water and energy rationing and reducing agricultural output. As a result, GDP contracted by 0.2% in 2000. The IMF, which had resumed loans in 2000 to help Kenya through the drought, again halted lending in 2001 when the government failed to institute several anticorruption measures. Despite the return of strong rains in 2001, weak commodity prices, endemic corruption, and low investment limited Kenya's economic growth to 1.2%. Growth lagged at 1.1% in 2002 because of erratic rains, low investor confidence, meager donor support, and political infighting up to the elections. In the key December 2002 elections, Daniel Arap MOI's 24-year-old reign ended, and a new opposition government took on the formidable economic problems facing the nation. In 2003, progress was made in rooting out corruption and encouraging donor support. Since then, however, the KIBAKI government has been rocked by high-level graft scandals. The World Bank suspended aid for most of 2006, and the IMF has delayed loans pending further action by the government on corruption. The scandals have not seemed to affect growth, with GDP growing more than 5% in 2006.
